We're told that the future will be brighter. But what if human happiness really lies in the past? Hobart, 2022: a city with a declining population, in the grip of a dark recession. A rusty ship sails into the harbour and begins to unload its cargo on the site of the once famous but now abandoned Gallery of Future Art, known to the world as GoFA. One day the city's residents are awoken by a high-pitched sound no one has heard for two generations: a factory whistle. GoFA's owner, world-famous billionaire Dundas Faussett, is creating his most ambitious installation yet. He's going to defeat technology's dominance over our lives by establishing a new Year Zero: 1948. Those whose jobs have been

destroyed by Amazon and Uber and Airbnb are invited to fight back in the only way that can possibly succeed: by living as if the internet had never been invented. The hold of Bezos, Musk, Zuckerberg and their ilk starts to loosen as the revolutionary example of Factory 19 spreads. Can nostalgia really defeat the future? Can the little people win back the world? We are about to find out. 'Like Orwell, of whom he has written so brilliantly, Dennis Glover's work is charged with courage, intelligence and purpose. He is the complete writer, and one made for our times.' —Don Watson 'Savagely hilarious and unlike anything else you'll read this year. It boils with the anger of the present moment.' —Rohan Wilson

Ever since their introduction in 1972, the S-Class saloons from Mercedes-Benz have been considered the pinnacle of automotive excellence. For most of that time, ownership of an S-Class - at least, of a reasonably recent one - has been symbolic of material success and of restrained yet impeccable good taste. Several other car makers have nibbled at the edges of the S-Class market, but none has produced a viable and lasting alternative to the big Benz. Mercedes-Benz S-Class 1972-2013 charts the evolution and success of the series, from the W116 model, the first to be designed from the ground up as a large luxury saloon, through to the C126 coupe, one of the all-time Mercedes-Benz classic designs. Topics covered include: development and production of the W126 saloons and classic W126 coupes; the W140 saloons in the 1990s; the 140 coupes, the W220 models and the elegant 215 coupes; the W221 models, introduced at the Frankfurt International Motor Show in 2005; the C216 coupes and

the future of Mercedes-Benz S-Class. Superbly illustrated with 288 colour photographs.

Over the past 40 years, Tom Stanley and his daughter Sarah Stanley Fallaw have been involved in research examining how self-made, economically successful Americans became that way. Despite the publication of *The Millionaire Next Door*, *The Millionaire Mind*, and others, myths about wealth in American still abound. Government officials, journalists, and many American still tend to confuse income with wealth. A new generation of household financial managers are hearing from so-called experts in personal financial management due to the proliferation of the cottage industry of financial blogs, podcasts, and the like. In many cases, these outlets are simply experiences shared without science, case studies without data based on broader populations. Therefore, the authors decided to take another look at millionaires in the United States to examine what changes could be seen 20 years after the original publication of *The Millionaire Next Door*. In this book the authors highlight how specific decisions, behaviors, and characteristics align with the discipline of wealth building, covering areas such as consumption, budgeting, careers, investing, and financial management in

general. They include results from quantitative studies of wealth as well as case studies of individuals who have been successful in building wealth. They discuss general paths to building wealth on your own, focusing specifically on careers and lifestyles associated with each path, and what it takes to be successful in each.
