### **MADALYNN SULLIVAN**

**Advances in Environmental Pollution Management: Wastewater Impacts and Treatment Technologies** Abhishek Publications

This is the tenth edition of the authoritative API Textbook of Medicine, completely revised, updated and expanded, with 28 brand new chapters. The textbook is comprised of two volumes, divided into 29 sections. Beginning with an introduction to the practice of medicine, and a disease profile and epidemiology of communicable and non-communicable diseases, each subsequent section covers a separate medical specialty. The second section on 'Clinical Approach to Key Manifestation' has been expanded with six new chapters, including the appropriate selection of imaging modalities. Other new topics in this edition include advanced cardiac life support system, life-style changes in the management of diabetes, diabetes in the elderly, prevention of cardiovascular disease, acute and chronic pancreatitis, and tumours of the liver. Chapters on

chronic and sleep-related pulmonary disorders have been completely re-written to highlight their increased prevalence, and a new chapter on pulmonary rehabilitation has been added. An entirely new section on the 'Future of Medicine' including regenerative medicine, nanotechnology and nanomedicine, robotic surgery, and an introduction to 'space medicine', brings the API Textbook of Medicine to its conclusion. With 1090 full colour images and illustrations, spanning over 3000 pages, this all-encompassing textbook is a comprehensive guide to the practice of medicine, brought fully up-to-date for physicians, surgeons and post-graduate medical students. Key Points  
 New edition of this comprehensive, two volume textbook Fully revised, updated and expanded with 28 new chapters  
 New section on the future of medicine 1090 full colour images and illustrations  
 Previous edition published 2012  
*Indian Books in Print* Channel View Publications  
 Advances in Environmental Pollution Management: Wastewater Impacts and Treatment Technologies has been designed to bind novel knowledge of wastewater pollution-induced impacts on various aspects of our environment. The book also contains novel methods and tools for the

monitoring and treatment of produced wastewater.

**Positive Neuropsychology** Lancer Publishers

This book is a compilation of research and readings on the Chausathi Yogini temple at Hirapur (near Bhubaneswar, Odisha, India). This book was motivated by the desire to delve deeply into the tantric roots in which the Yogini cult is embedded and to link it to the significance of this site as a potential cultural tourism destination.

**GST and Its Aftermath** CABI

**UNMANNED AIRCRAFT SYSTEMS** UNMANNED AIRCRAFT SYSTEMS An unmanned aircraft system (UAS), sometimes called a drone, is an aircraft without a human pilot on board ??? instead, the UAS can be controlled by an operator station on the ground or may be autonomous in operation. UAS are capable of addressing a broad range of applications in diverse, complex environments. Traditionally employed in mainly military applications, recent regulatory changes around the world are leading to an explosion of interest and wide-ranging new applications for UAS in civil airspace. Covering the design, development, operation, and mission profiles of unmanned aircraft systems,

this single, comprehensive volume forms a complete, stand-alone reference on the topic. The volume integrates with the online Wiley Encyclopedia of Aerospace Engineering, providing many new and updated articles for existing subscribers to that work. The chapters cover the following items: Airframe configurations and design (launch systems, power generation, propulsion) Operations (missions, integration issues, and airspace access) Coordination (multivehicle cooperation and human oversight) With contributions from leading experts, this volume is intended to be a valuable addition, and a useful resource, for aerospace manufacturers and suppliers, governmental and industrial aerospace research establishments, airline and aviation industries, university engineering and science departments, and industry analysts, consultants, and researchers.

*Transit Oriented Development* Springer Nature

Nepal today is at a critical crossroad, with hopes of its resurgence as a nation-state clouded in a mire of doubts and confusion. This book is primarily based on the author's ground assessment reached through interactions with innumerable people, both high and low, during his recent trek through Nepal. They include, besides the man on the street, some key personalities from the worlds of politics, academia, bureaucracy and business."

**API Textbook of Medicine (Volume I & II)** Prabhat Prakashan

Guru Dutt is now named along with the masters of world cinema—like Orson Welles, Mizoguchi, Hitchcock, Jancso, Ophüls—for his innovative cinematic form and his deep humanism and compassion. In *Guru Dutt: A Tragedy in Three Acts*, a renowned film-maker and scholar Arun Khopkar sheds new light on Dutt's genius through a close examination of Dutt's three best-known films—*Pyaasa*, *Kaagaz Ke Phool* and *Sahib Bibi Aur Ghulam*. With a nuanced eye, Khopkar explores the historical context which influenced Dutt's deeply melancholic style while also analysing the intricacies of the medium—acting, lighting, music, editing, rhythm—that Dutt carefully deployed to create his masterpieces. Originally written in Marathi, this exquisite English translation paints a layered portrait of a troubled genius for whom art was not merely a thing of beauty but a vital part of living itself.

*Travel and Tourism Management* CRC Press

This edited volume, *Intellectual Property Rights – Patent*, is a collection of reviewed and relevant research chapters, offering a comprehensive overview of recent developments in the field of patents and its issues. The book comprises chapters authored by various researchers and edited by experts active in the pharmaceutical research area. All chapters are complete in itself but united under a common research study topic. This publication aims to provide a thorough overview of the latest research efforts on patenting and the related issues for legal experts and the scientific community and open new possible research paths for further novel developments.

**Handbook of IoT and Blockchain** Ashgate Publishing, Ltd.

The overarching principle that once integrated India's institutions is often described by the word 'dharma'. The notion of dharma goes well beyond what is known as 'rule of law'. Rule of law is about publicly disclosed legal codes and processes. Dharma, on the other hand, is the holding principle that encompasses the whole of nature, including human nature. Dharma is much more nuanced and yet, paradoxically, more unambiguous than rule of law. The research presented in *Globalizing Indian Thought* tells us that India will do well to hark back to its 'sanatana dharma'. The book decodes and deliberates on a few big ideas with the hope to shape India's story on the world stage. It would be of interest to anyone who wishes to know how we can bring in ideas that are inherently Indian to broaden the discourse on matters of national and international importance. *Critical Debates in Tourism* Springer

This book presents the selected peer-reviewed proceedings of the International Conference on Recent Trends and Innovations in Civil Engineering (ICRTICE 2019). The volume focuses on latest research and advances in the field of civil engineering and materials science such as design and development of new environmental materials, performance testing and verification of smart materials, performance analysis and simulation of steel structures, design and performance optimization of concrete structures, and building materials analysis. The book also covers studies in geotechnical engineering, hydraulic engineering, road and bridge engineering, building services design, engineering management, water resource engineering and renewable energy. The contents of this book will be useful for students, researchers and professionals working in civil engineering.

**Proceedings of the Indian Science Congress** SAGE Publishing India

Annotation. As a result of the ongoing growth in the tourism industry, many destinations around the world are undergoing transformations. New destinations are being 'discovered' in regions previously ignored, as people search for regions that are yet unspoiled by the ravages of mass tourism. At the same time, traditional destinations are experiencing rapid environmental, socio-cultural and economic modifications. These changes have the most effect on the destination community - the location where tourists spend their time and money, and influence development or degradation of the local environment. *Tourism in Destination Communities* describes both the positive and negative effects of tourism on the destination community. The chapters are divided into three sections which address the relationship between tourism and the destination community, the various impacts of tourism on the destination community and the challenges and opportunities for destination communities. Each chapter contains brief case studies and empirical examples.

*SUSTAINABLE DEVELOPMENT AND ENVIRONMENTAL ISSUES* CRC Press

Colorectal cancer (CRC) is a major global health challenge as the third leading cause for cancer related mortalities worldwide. Despite advances in therapeutic strategies, the five-year survival rate for CRC patients has remained the same over time due to the fact that patients are often diagnosed in advanced metastatic stages. Drug resistance is another common reason for poor prognosis. Researchers are now developing advanced therapeutic strategies such as immunotherapy, targeted therapy, and combination nanotechnology for drug delivery. In addition, the identification of new biomarkers will potentiate early stage diagnosis. This book is the second of three volumes on recent developments in colorectal diagnosis and therapy. Each volume can be read on its own, or together. Each volume focuses on different novel therapeutic advances, biomarkers, and identifies therapeutic targets for treatment. Written by leading international experts in the field, coverage addresses the role of diet habits and lifestyle in reducing gastrointestinal disorders and incidence of CRC. Chapters discuss current and future diagnostic and therapeutic options for colorectal cancer patients, focusing on immunotherapeutics, nanomedicine, biomarkers, and dietary factors for the effective management of colon cancer. *Tourism in Destination Communities* Amer Pharmacists Assn

Rich with human detail and penetrating analysis, this insider account chronicles the remarkable negotiations between the United States and India after three nuclear devices shook the Thar Desert in 1998, initiating one of the most suspenseful diplomatic dramas of recent memory. *Globalizing Indian Thought* Brookings Institution Press

"Embark on a journey through the dynamic world of travel and tourism management with our comprehensive guide. From the intricacies of hospitality to the strategies of destination marketing, this book offers a rich tapestry of insights into the ever-evolving landscape of the industry. Delve into topics ranging from sustainable tourism practices to the utilization of digital technology in enhancing customer experiences. Whether you're a seasoned professional or an aspiring entrepreneur, this invaluable resource provides the tools and knowledge to navigate the complexities of the global tourism market with confidence and success."

*Unmanned Aircraft Systems* SAGE Publishing India

This book presents the latest developments and breakthroughs in fuzzy theory and performance prediction of queuing and reliability models by using the stochastic modeling and optimization theory. The main focus is on analytics that use fuzzy logic, queuing and reliability theory for the performance prediction and optimal design of real-time engineering systems including call centers, telecommunication, manufacturing, service organizations, etc. For the day-to-day as well as industrial queuing situations and reliability prediction of machining parts embedded in computer, communication and manufacturing systems, the book assesses various measures of performance and effectiveness that can provide valuable insights and help arrive at the best decisions with regard to service and engineering systems. In twenty chapters, the book presents both theoretical developments and applications of the fuzzy logic, reliability and queuing models in a diverse range of scenarios. The topics discussed will be of interest to researchers, educators and undergraduate students in the fields of Engineering, Business Management, and the Mathematical Sciences. **Destination Recommendation Systems** JP Medical Ltd

Bringing together the work of leading researchers, this book provides a clear and accessible overview of current research on destination recommendation systems. These systems guide consumer behaviour by enabling Internet users to quickly and effectively find relevant information

about travel destinations, attractions, accommodation and transportation. The chapters in this book cover consumer behaviour, perceptual factors influencing consumer choice, and the design of destination recommendation systems. The book examines four different types of destination marketing system and concludes by analysing the future of recommendation systems for travellers.

*Swachh Bharat* Routledge

This is build upon based on twenty-five excellent research articles and main focused plant species are *Boswellia serrata*, *Butea monosperma*, *Colebrookea oppositifolia*, *Cymbopogon khasianus*, *Dendrophthe falcata*, *Dysoxylum binectariferum*, *Echinacea purpurea*, *Grewia asiatica*, *Picrorrhiza kurroa*, *Saussurea costus*, *Withania somnifera*, *Zanthoxylum armatum*, different species of *Aconitum* and *Panax*, *Ashtavarga* groups (*Habenaria intermedia*, *Habenaria edgeworthii*, *Malaxis acuminata*, *Malaxis muscifera*, *Lilium polyphyllum*, *Polygonatum verticillatum*, *Polygonatum cirrhifolium* and *Roscoea procera*), and hundreds of potential life-saving plants used by different ethnic tribes of Himalaya as food, shelter and medicine in their day-to-day life. Various research studies and clinical trials mentioned in the book will add and contribute a lot in discovering quick leads for medicine formulations and products development. In addition to research suggestions and valuation of plants for humans contained within each of the articles, an introduction section emphasizes particular research avenues for attention in the drug development programmes. As the reader will note, these compilations represent a wide collection of views, reflecting the diversity of sciences and interests of thousands of ideas that enabled thoughtful deliberations from a wide range of scientific perspectives.

*Tourism in Central Asia* Scientific Publishers

In an Indian household; the cleaning up of the house is the first step towards the celebration of an approaching festival. Not only it is hygienic but the symbolic significance of the festival is enhanced many times by this act of cleaning. It symbolizes purity of mind and clarity of thoughts before one goes to pray and celebrate an event of importance. These acts lead us to the attainment of the ultimate elation; where the body is in the pink of health and the mind is in the depths of joy. Such insight and farsightedness in thought and actions have been the hallmark of the Indian history. These actions are nothing but the manifestations of our rich cultural heritage. A festival is a symbol of a prosperous society and a rich culture; it signifies growth and development. Therefore; any development; any growth is no less than a festival and the primary step to a celebration; which starts with cleanliness. For India; 'Swachh Bharat Abhiyan' is nothing but the first step towards celebrating development and prosperity. Certainly this book will facilitate the fulfillment of Swachh Bharat Abhiyan.

**Recent Trends in Civil Engineering** Springer Science & Business Media

This book comprises select papers presented at the International Conference on Trends and Recent Advances in Civil Engineering (TRACE 2018). The book covers a wide range of topics related to recent advancements in structural engineering, structural health monitoring, rehabilitation and retrofitting of structures, and earthquake-resistant structures. Based on case studies and laboratory investigations, the book highlights latest techniques and innovative methods for building repair and maintenance. Recent development in materials being used in structural rehabilitation and retrofitting is also discussed. The contents of this book can be useful for researchers and professionals working in structural engineering and allied areas.

*Tourist Safety and Security* Excel Books India

An internationally acclaimed reference work recognized as one of the most authoritative and comprehensive sources of information on excipients used in pharmaceutical formulation with this new edition providing 340 excipient monographs. Incorporates information on the uses, and chemical and physical properties of excipients systematically collated from a variety of international sources including: pharmacopeias, patents, primary and secondary literature, websites, and manufacturers' data; extensive data provided on the applications, licensing, and safety of excipients; comprehensively cross-referenced and indexed, with many additional excipients described as related substances and an international supplier's directory and detailed information on trade names and specific grades or types of excipients commercially available. *Anatomy Head, Neck & Brain, (Vol. 1)* Agro Environ Media, Publication Cell of AESA, Agriculture and Environmental Science Academy,

A thought-provoking assessment of the major tax reform in India and its consequences.
