Tales of love, madness and death is the result of that tormented life and it is where he displays all his gifts. In these stories, the mystery is master and lord, although always immersed in everyday situations, which increases the impact. Madness and love are constantly intertwined, to inevitably lead to death. His stories, charged with implicit violence, produce an asphyxiating tension that is only released with the most unexpected of endings. The jungle and wild setting of the Missions that he knew, frame his stories.

“Riveting. . . a testament to a misconceived war, and to the ease with which ordinary men, under certain conditions, can transform into monsters.”—New York Times Book Review This is the story of a small group of soldiers from the 101st Airborne Division’s fabled 502nd Infantry Regiment—a unit

known as “the Black Heart Brigade.” Deployed in late 2005 to Iraq’s so-called Triangle of Death, a veritable meat grinder just south of Baghdad, the Black Hearts found themselves in arguably the country’s most dangerous location at its most dangerous time. Hit by near-daily mortars, gunfire, and roadside bomb attacks, suffering from a particularly heavy death toll, and enduring a chronic breakdown in leadership, members of one Black Heart platoon—1st Platoon, Bravo Company, 1st Battalion—descended, over their year-long tour of duty, into a tailspin of poor discipline, substance abuse, and brutality. Four 1st Platoon soldiers would perpetrate one of the most heinous war crimes U.S. forces have committed during the Iraq War—the rape of a fourteen-year-old Iraqi girl and the cold-blooded execution of her and her family. Three other 1st Platoon soldiers would be overrun at a remote outpost—one killed immediately and two taken from the scene, their mutilated corpses found days later booby-trapped with explosives. Black Hearts is an unflinching account of the epic, tragic deployment of 1st Platoon. Drawing on hundreds of hours of in-depth interviews with Black Heart soldiers and first-hand reporting from the Triangle of Death, Black Hearts is a timeless story about men in combat and the fragility of character in the savage crucible

of warfare. But it is also a timely warning of new dangers emerging in the way American soldiers are led on the battlefields of the twenty-first century.

Why do some men become convinced—despite what doctors tell them—that their penises have, simply, disappeared. Why do people across the world become convinced that they are cursed to die on a particular date—and then do? Why do people in Malaysia suddenly “run amok”? In *The Geography of Madness*, acclaimed magazine writer Frank Bures investigates these and other “culture-bound” syndromes, tracing each seemingly baffling phenomenon to its source. It’s a fascinating, and at times rollicking, adventure that takes the reader around the world and deep into the oddities of the human psyche. What Bures uncovers along the way is a poignant and stirring story of the persistence of belief, fear, and hope.

J, a recent college grad, met the Director almost a decade ago when he approached her at a coffee shop on the Upper West Side. He complimented her beauty and told her that she was what he

needed in order to realize his next film. Their exchange of phone numbers that afternoon marked the beginning of a five-year-long abusive relationship. The national #metoo movement has inspired many, including J. K. Stein, to challenge the stigmas surrounding sexual assault and to share their personal stories. These unedited journals and their subsequent analyses offer readers a glimpse into the painful realities of sexual abuse and the ways in which giving consent is more complicated than a simple yes or no. J. K. Steins memoir invites readers to step inside the mind of a young woman trying to find herself in the face of power, manipulation, and self-hatred. At its heart, this book offers analyses of abjection; the grotesque; consent; what it means to override ones feelings when the stakes are high; the ways in which selling ones body, even when never paid, might be read as a form of prostitution; the impact of these actions on self-image; the ways in which the authors choices were motivated by her distorted body image and long-standing eating disorder; and finally what it means to have an opinion but no voice. Today the author has found her voice.

A trenchant look at how the coronavirus reveals the dangerous fault lines of contemporary society With medical mysteries, rising death tolls, and conspiracy theories beamed minute by minute through the vast web universe, the coronavirus pandemic has irrevocably altered societies around the world. In this sharp essay, world-renowned philosopher Bernard-Henri Lévy interrogates the many meanings and metaphors we have assigned to the pandemic—and what they tell us about ourselves. Drawing on the philosophical tradition from Plato and Aristotle to Lacan and Foucault, Lévy asks uncomfortable questions about reality and mythology: he rejects the idea that the virus is a warning from nature, the inevitable result of global capitalism; he questions the heroic status of doctors, asking us to think critically about the loci of authority and power; he challenges the panicked polarization that dominates online discourse. Lucid, incisive, and always original, Lévy takes a bird's-eye view of the most consequential historical event of our time and proposes a way to defend human society from threats to our collective future.

Death Grip chronicles a top climber's near-fatal struggle with anxiety and depression, and his nightmarish journey through the dangerous world of prescription drugs. Matt Samet lived to climb, and craved the challenge, risk, and exhilaration of conquering sheer rock faces around the United States and internationally. But Samet's depression, compounded by the extreme diet and fitness practices of climbers, led him to seek professional help. He entered the murky, inescapable world of psychiatric medicine, where he developed a dangerous addiction to prescribed medications—primarily "benzos," or benzodiazepines—that landed him in institutions and nearly killed him. With dramatic storytelling, persuasive research data, and searing honesty, Matt Samet reveals the hidden epidemic of benzo addiction, which some have suggested can be harder to quit than heroin. Millions of adults and teenagers are prescribed these drugs, but few understand how addictive they are—and how dangerous long-term usage can be, even when prescribed by doctors. After a difficult struggle with addiction, Samet slowly makes his way to a life in recovery through perseverance and a deep love of rock climbing. Conveying both the exhilaration of climbing in the wilderness and the utter madness of addiction, *Death Grip* is a powerful and revelatory memoir.

Ferit Güven illuminates the historically constitutive roles of madness and death in philosophy by examining them in the light of contemporary discussions of the intersection of power and knowledge and ethical relations with the other. Historically, as Güven shows, philosophical treatments of madness and death have limited or subdued their disruptive quality. Madness and death are linked to the question of how to conceptualize the unthinkable, but Güven illustrates how this conceptualization results in a reduction to positivity of the very radical negativity these moments represent. Tracing this problematic through Plato, Hegel, Heidegger, and, finally, in the debate on madness between Foucault and Derrida, Güven gestures toward a nonreducible, disruptive form of negativity, articulated in Heidegger's critique of Hegel and Foucault's engagement with Derrida, that might allow for the preservation of real otherness and open the possibility of a true ethics of difference.

THE SUNDAY TIMES BESTSELLER Updated with a new afterword "An excellent take on the lunacy affecting much of the world today. Douglas is one of the bright lights that could lead us out of the darkness." - Joe Rogan "Douglas Murray fights the good fight for freedom of speech ... A truthful look at today's most divisive issues" - Jordan B. Peterson Are we living through the great derangement of our times? In *The Madness of Crowds* Douglas Murray investigates the dangers of 'woke' culture and the rise of identity politics. In lively, razor-sharp prose he examines the most controversial issues of our moment: sexuality, gender, technology and race, with interludes on the Marxist foundations of 'wokeness', the impact of tech and how, in an increasingly online culture, we must relearn the ability to forgive. One of the few writers who dares to counter the prevailing view and question the dramatic changes in our society - from gender reassignment for children to the impact of transgender rights on women - Murray's penetrating book, now published with a new afterword taking account of the book's reception and responding to the worldwide Black Lives Matter protests, clears a path of sanity through the fog of our modern predicament.

Madness, Violence, and Power: A Critical Collection disengages from the common forms of discussion about violence related to mental health service users and survivors which position those users or survivors as more likely to enact violence or become victims of violence. Instead, this book seeks to broaden understandings of violence manifest in the lives of mental health service users/survivors, 'push' current considerations to explore the impacts of systems and institutions that manage 'abnormality', and to create and foster space to explore the role of our own communities in justice and accountability dialogues. This critical collection constitutes an integral contribution to critical scholarship on violence and mental illness by addressing a gap in the existing literature by broadening the "violence lens," and inviting an interdisciplinary conversation that is not narrowly biomedical and neuro-scientific.

THE SUNDAY TIMES BESTSELLER 'Immensely moving and disarmingly witty' Nigella Lawson 'Such a moving, tough, funny, raw, honest read' Matt Haig 'Beautifully written, moving and gut-wrenching, but also at times very funny' Ian Rankin 'Captures brilliantly, beautifully, bravely the comedy as well as the tragedy of bereavement' The Times 'Will strike a chord with anyone who has grieved' Independent Whether it is pastoral care for the bereaved, discussions about the afterlife, or being called out to perform the last rites, death is part of the Reverend Richard Coles's life and work. But when his partner the Reverend David Coles died, shortly before Christmas in 2019, much about death took Coles by surprise. For one thing, David's death at the early age of forty-three was unexpected. The man that so often assists others to examine life's moral questions now found himself in need of help. He began to look to others for guidance to steer him through his grief. The flock was leading the shepherd. Much about grief surprised him: the volume of 'sadmin' you have to do when someone dies, how much harder it is travelling for work alone, even the pain of typing

a text message to your partner - then realising you are alone. The Reverend Richard Coles's deeply personal account of life after grief will resonate, unforgettably, with anyone who has lost a loved one.

A captivating espionage novel that explores the life of theatrical genius—and spy—Christopher Marlowe, whose violent death remains one of the most fascinating mysteries of the Elizabethan Age. In Elizabethan England, the queen's chief spymaster, Francis Walsingham, and his team of agents must maintain the highest levels of vigilance to ward off Catholic plots and an ever-present threat of invasion from Spain. One agent in particular—a young Cambridge undergraduate of humble origins, controversial beliefs, and literary genius who goes by the name of Kit Marlowe—is relentless in his pursuit of intelligence for the Crown. When he is killed outside an inn in Deptford, his mysterious death becomes the subject of rumor and suspicion that are never satisfactorily resolved. Years later, when Thomas Phelippes, a former colleague of Marlowe's, finds himself imprisoned in the Tower of London, there is one thing that might give him his freedom back. He must give the king every detail he is able to recall about his murdered friend's life—and death. But why is King James so fascinated about Kit Marlowe—and does Phelippes know enough to secure his own redemption?

An unsentimental yet profoundly moving look at one family's experience with mental illness. "A haunting, poignant story of a son's life with, and without, his father. A rare and moving portrait of one of life's major struggles—the devastation created by severe mental illness." —John Oldham, M.D., Director of New York State Psychiatric Institute In 1978, Charles Lachenmeyer was a happily married professor of sociology who lived in the New York suburbs with his wife and nine-year-old son, Nathaniel. But within a few short years, schizophrenia—a devastating mental illness with no known cure—would cost him everything: his sanity, his career, his family, even the roof over his head. Upon learning of his father's death in 1995, Nathaniel set out to search for the truth behind his father's haunted, solitary existence. Rich in imagery and poignant symbolism, *The Outsider* is a beautifully written memoir of a father's struggle to survive with dignity, and a son's struggle to know the father he lost to schizophrenia long before he finally lost him to death. • Recipient of the Kenneth Johnson Memorial Research Library Book Award • Winner of the 2000 Bell of Hope Award
