## **LEILA ERICK**

---

*Interdisciplinary  
Aspects of Information  
Systems Studies IGI  
Global*  
This book introduces  
and develops the novel

concept of Lean  
Construction 4.0. The  
capability of Lean  
Construction to  
effectively adapt the  
architecture-  
engineering-  
construction (AEC)  
industry to this new  
era of digital  
transformation requires

a reconceptualization of the triad people-processes-technology as a foundation for the theoretical and practical framework of Lean Construction. Therefore, a shift towards Lean Construction 4.0 is required. Lean Construction 4.0 is a new systems-wide thinking approach where synergies and overlaps between Lean Construction and digital/smart technologies go far beyond BIM to reshape the way we design, manage, and operate capital projects in the modern age of automation. This pioneering new book brings together the views of world experts at the interface of Lean Construction and digital/smart technologies, in order

to channel research efforts, to introduce and discuss current research and practice, challenges and drivers, and future perspectives of Lean Construction 4.0. It is not the aim of the book to keep adding digits to the term 'Lean Construction' to 'catch up' with the industry revolutions as they go on. Instead, after reading this book, it will be undeniable for readers that the triad process-people-technology as proposed by Lean Construction 4.0 is required to achieve an effective, long-lasting digital transformation of the AEC industry. Thus, the aim of Lean Construction 4.0 is better explained by what it evokes: a future vision of construction systems

comprising people, processes, and technology using Industry 4.0/5.0 as a basis for technological innovation in the AEC industry coupled with Lean Construction theory and practice as a jettison for improved processes and systems integration. The Lean Construction 4.0 concept coined and developed in this edited book is unique and the chapters provide practitioners and academics with a provocative reflection on the theoretical and practical aspects that shape the Lean Construction 4.0 concept. More importantly, Lean Construction 4.0 proposes a rationale for the AEC industry not only to survive, but to thrive!

Information Systems

Foundations Taylor & Francis

"This book assesses the impact of e-business technologies on different organizations, which include higher education institutions, multinational automotive corporations, and health providers"--  
Provided by publisher.

**Handbook of Research on Expanding Business Opportunities With Information Systems and Analytics** John Wiley & Sons

Of those in management education who debates whether business ethics should be taught as a stand-alone course or in an embedded manner, most recommend combining both approaches for optimal

results. This book provides unique insights into the experience of seasoned academics who embed business ethics in teaching management theory and practice. Its multidisciplinary approach enriches its content, since the insights of our colleagues from within their fields are invaluable. It therefore complements other business textbooks. After general themes (curriculum integration, adult learning, learner commitment, and generation Y classrooms), this volume covers ethics and responsibility in people management, team building, change management; operations management, business law, and digital

marketing communications. The book provides a platform to share experiences of teaching ethical profitability. It contributes to resolving concerns experienced when faculty wish to incorporate ethics into their teaching but feel they lack preparation or ideas on how to do it. The chapters describe each discipline briefly, raise the typical ethical issues therein, and suggest teaching strategies and exercises or projects. The 'developing versus developed country perspectives' sections may interest schools with high student diversity. The book also meets in-company training needs for attaining and

sustaining an ethical culture.

*ENTERprise Information Systems, Part II* Firenze University Press Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

*Handbook of Technology Application in Tourism in Asia*

Academic Conferences International Limited  
Smaller companies are abundant in the business realm and outnumber large companies by a wide margin. Understanding the inner workings of small businesses offers benefits to the consumers and the economy. The Handbook of Research on Small and Medium Enterprises in Developing Countries is an essential handbook for the latest research on the intentions, performance, and application models of independent firms. Featuring exhaustive coverage on a broad range of topics such as green IT, entrepreneurial ventures, and social capital, this publication is ideally designed for

researchers, academicians, and practitioners seeking current research on the different opportunities and challenges in relation to this specific sector of business around the globe.

Information Systems and Technology for Organizational Agility, Intelligence, and Resilience IGI Global Knowledge of scientific and technological developments, and the flexible communication and decision making, knowledge sharing, and collaboration that stem from them, can enable organizations and individuals to be successful and viable competitors in today's global economy.

Information Systems and Technology for Organizational Agility, Intelligence, and Resilience aims to

advise and support organizational agents who want ensure success in terms of financial, social, and environmental aspects, as well as in the aspect of human development, in a more sustainable way. The premier reference work provides examples of conceptual research, methodologies, empirical cases, and success cases for academics, researchers, intermediaries, and organizations looking to use information systems and technology to boost their agility, intelligence, and resilience.

Configurations of Knowledge Intensive Processes and Collaborative Technologies Pearson

Educación  
E-Strategies for  
Technological Diffusion  
and Adoption: National  
ICT Approaches for  
Socioeconomic  
Development provides  
comprehensive  
coverage and  
definitions of the most  
important issues,  
concepts, trends, and  
technologies related to  
the adoption, diffusion,  
and adaptation of  
national electronic  
strategies for ICTs in  
socioeconomic  
development.

E-Strategies for  
Technological Diffusion  
and Adoption: National  
ICT Approaches for  
Socioeconomic  
Development ANU E  
Press

The social and  
economic systems of  
any country are  
influenced by a range  
of factors including  
income and education.

As such, it is vital to  
examine how these  
factors are creating  
opportunities to  
improve both the  
economy and the lives  
of people within these  
countries. Socio-  
Economic  
Development:  
Concepts,  
Methodologies, Tools,  
and Applications  
provides a critical look  
at the process of social  
and economic  
transformation based  
on environmental and  
cultural factors  
including income, skills  
development,  
employment, and  
education. Highlighting  
a range of topics such  
as economics, social  
change, and e-  
governance, this multi-  
volume book is  
designed for  
policymakers,  
practitioners, city-  
development planners,

academicians, government officials, and graduate-level students interested in emerging perspectives on socio-economic development.

### Knowledge

Management IGI Global Information value and quality can be considered an essential factor to evaluate both conceptual and practical contributions in organizational, technical, and scientific tasks and projects. It is important to effectively observe and implement these concepts in real organizational plans and efforts. Rethinking the Conceptual Base for New Practical Applications in Information Value and Quality discusses the re-evaluation of the conceptual base of information value and

quality found in different forms of media; and how these concepts can be analyzed in real applications and business scenarios.

This book is a vital reference source for scholars, practitioners, IT specialists, and students interested in information and knowledge management.

*Impact of E-Business Technologies on Public and Private Organizations: Industry Comparisons and Perspectives* IGI Global Management Information Systems, 14e, is designed for readers who want an in-depth view of how business firms nowadays use information technologies and systems to achieve operational excellence,

develop new products and services, improve decision making, and achieve competitive advantage. Learners will find here the most up-to-date and comprehensive coverage of information systems used by business firms today. New to this Edition: \* Social, Mobile, Local: New e-commerce content in Chapter 10 describes how social tools, mobile technology, and location-based services are transforming marketing and advertising \* Big Data: Chapter 6 on Databases and Information Management updated to provide in-depth coverage of Big Data and new data management technologies \* Cloud Computing: Updated

coverage of cloud computing in Chapter 5 (IT Infrastructure) with more detail on various types of cloud services, private and public clouds, hybrid clouds, and managing cloud services \* Social Business: Extensive coverage of social business, introduced in Chapter 2 and discussed across the text. Detailed discussions of enterprise (internal corporate) social networking as well as social networking in e-commerce \* Some More New Topics: Consumerization of IT and bring your own device (BYOD), location analytics, location-based services, building an e-commerce presence, mobile application development, mobile and native apps,

expanded coverage of business analytics, including big data analytics, 3-D printing, etc., and much more \*  
 Adapting to the Indian Scenario: India is fast emerging as a global IT hub and a number of organizations are implementing information systems either to enhance core competency or to gain competitive advantage. Keeping this in mind, one case in the Indian context has been added in every chapter. Some of the cases included are 'Social Media Analytics in Indian Politics', 'Reliance Installing the 4G Project', 'Centralization of Operations at Tata Power', and 'One Organization, One Data, One Information: ONGC's Global System' among others.

## **Emerging Issues and Challenges in Business & Economics**

IGI Global  
 It is a great pleasure to share with you the Springer CCIS proceedings of the First International Conference on Reforming Education, Quality of Teaching and Technology-Enhanced Learning: Learning Technologies, Quality of Education, Educational Systems, Evaluation, Pedagogies--TECH-EDUCATION 2010, Which was a part of the World Summit on the Knowledge Society Conference Series. TECH-EDUCATION 2010 was a bold effort aiming to foster a debate on the global need in our times to invest in education. The topics of the conference dealt with

six general pillars:  
Track 1. Quality of Education--A new Vision Track 2. Technology-Enhanced Learning--Learning Technologies--Personalization-E-learning Track 3. Educational Strategies Track 4. Collaborative/ Constructive/ Pedagogical/ Didactical Approaches Track 5. Formal/ Informal/ and Life-Long Learning Perspectives Track 6. Contribution of Education to Sustainable Development Within this general context the Program Committee of the conference invited contributions that fall in to the following list of topics. Track 1: Quality of the Education--A new Vision • Teaching Methodologies and

Case Studies • Reforms in Degrees • The European Educational Space • Academic Curricula Designs • Quality of Teaching and Learning • Quality and Academic Assessment • The School / University of the Future • Challenges for Higher Education in the 21st Century • New Managerial Models for Education • Financing the New Model for Education of the 21st Century • The Quality Milestones for Education of the 21st Century • Evaluation in Academia • The Role of Teachers • International Collaborations for Joint Programs/Degrees • Industry-Academia Synergies • Research Laboratories Management *Cases on Emerging*

For any organization to be successful, it must operate in such a manner that knowledge and information, human resources, and technology are continually taken into consideration and managed effectively. Business concepts are always present regardless of the field or industry - in

education, government, healthcare, not-for-profit, engineering, hospitality/tourism, among others.

Maintaining organizational awareness and a strategic frame of mind is critical to meeting goals, gaining competitive advantage, and ultimately ensuring sustainability. The Encyclopedia of Organizational Knowledge, Administration, and Technology is an inaugural five-volume publication that offers 193 completely new and previously unpublished articles authored by leading experts on the latest concepts, issues, challenges, innovations, and opportunities covering

all aspects of modern organizations. Moreover, it is comprised of content that highlights major breakthroughs, discoveries, and authoritative research results as they pertain to all aspects of organizational growth and development including methodologies that can help companies thrive and analytical tools that assess an organization's internal health and performance. Insights are offered in key topics such as organizational structure, strategic leadership, information technology management, and business analytics, among others. The knowledge compiled in this publication is designed for

entrepreneurs, managers, executives, investors, economic analysts, computer engineers, software programmers, human resource departments, and other industry professionals seeking to understand the latest tools to emerge from this field and who are looking to incorporate them in their practice. Additionally, academicians, researchers, and students in fields that include but are not limited to business, management science, organizational development, entrepreneurship, sociology, corporate psychology, computer science, and information technology will benefit from the research compiled within this publication.

**Lean Construction****4.0 Springer Nature**

Features articles on a call for future research on management accounting service quality; budget ratcheting and performance; effect of trust-in-superior and trustfulness on budgetary slack; relationship between purposes of budget use and budgetary slack; strategic budgeting in public schools; and, more.

*Software Applications: Concepts, Methodologies, Tools, and Applications* IGI Global

Includes articles in topic areas such as autonomic computing, operating system architectures, and open source software technologies and applications.

*Reframing Information*

*Architecture* IGI Global  
 "This book investigates the creation and implementation of enterprise information systems, covering a wide array of topics such as flow-shop scheduling, information systems outsourcing, ERP systems utilization, Dietz transaction methodology, and advanced planning systems"--Provided by publisher.

*Handbook of Research on Social Dimensions of Semantic Technologies and Web Services* Routledge

Microfinance is a double bottom line sector which is growing fast, making money and doing well in a variety of socially interesting ways. The growth of its institutions requires good strategies, good

control systems and informed decision-making, all of which require an appropriate Management Information System (MIS). While a good MIS is needed in any sector, the management of a double bottom line requires systems which yield information on economic, financial and social metrics. The essays in this book explore the metrics required for success in this field. Communicating on these metrics may provide competitive advantage in fund-raising. Reaching out to the bottom of the pyramid requires low-cost catalytic innovations, disrupting the existing way of doing things. These necessitate not only social innovations, but

also technological innovations to reduce costs drastically. The book presents various alternative ways of distributing software for microfinance, including case studies on open-source and cloud-based software, indicating how software providers are seeking to create competitive advantage. It offers a detailed analysis of the problems that are often faced and innovative techniques for implementing MIS in microfinance. This volume represents essential reading for anyone interested in learning about not only microfinance and MIS, but also social innovations and competitive advantage strategies. The contributors to the book are executives,

consultants and academics who have considerable research experience in working and researching in these areas. Their work has been reviewed and developed by comments from both academics and practitioners to yield a book which is useful to students, academics and practitioners alike.

**Management Information System**

IGI Global

This book constitutes the refereed proceedings of the 13th International Working Conference on Requirements Engineering: Foundation for Software Quality, REFSQ 2007, held in Trondheim, Norway. It covers goal-driven requirements engineering (RE), products and product-

lines, value-based RE and the value of RE, requirements elicitation, requirements specification, industrial experience of RE, and requirements quality and quality requirements.

**Rethinking the Conceptual Base for New Practical Applications in Information Value and Quality** IGI Global

"This book highlights innovative technologies used for the design and implementation of advanced e-commerce systems facilitating digital rights management and protection"--Provided by publisher.

**Social and Political Implications of Data Mining: Knowledge Management in E-Government**
