by the leading figures

in social anthropology, the Handbook includes a substantive introduction by Richard Fardon, a think piece by Jean and John Comaroff, and a concluding last word on futures by Marilyn Strathern. The authors - each at the leading edge of the discipline - contribute in-depth chapters on both the foundational ideas and the latest research. Comprehensive and detailed, this magisterial Handbook overviews the last 25 years of the social anthropological imagination. It will speak to scholars in Social Anthropology and its many related disciplines.

Kimono in the Boardroom Routledge
The contemporary Japanese woman is frequently viewed as

dependent, deferential, and far less ambitious than her American counterpart. In this surprising new look at women in Japan, Sumiko Iwao shows that these women are not the submissive females typically portrayed; rather, they hold positions equal to and sometimes more powerful than those of men.

Japanese Women in Science and Engineering Rowman & Littlefield

This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. In 'Japanese Women and Sport', Robin Kietlinski sets out to problematize the hegemonic image of the delicate Japanese

woman, highlighting an overlooked area in the history of modern Japan. Previous studies of gender in the Japanese context do not explore the history of female participation in sport, and recent academic studies of women and sport tend to focus on Western countries. Kietlinski locates the discussion of Japanese women in sport within a larger East Asian context and considers the socio-economic position and history of modern Japan. Reaching from the early 20th century to the present day, Kietlinski traces the progression of Japanese women's participation in sport from the first female school for physical education and the foundations of competitive sport

through to their growing presence in the Olympics and international sport. Women and Women's Issues in Post World War II Japan Taylor & Francis

Since Japan's economic recession began in the 1990s, the female workforce has experienced revolutionary changes as greater numbers of women have sought to establish careers. Employment trends indicate that increasingly white-collar professional women are succeeding in breaking through the "glass ceiling", as digital technologies blur and redefine work in spatial, gendered,

and ideological terms. This book examines what motivates Japanese women to pursue professional careers in the contemporary neoliberal economy, and how they reconfigure notions of selfhood while doing so. It analyses how professional women contest conventional notions of femininity in contemporary Japan and in turn, negotiate new gender roles and cultural assumptions about women, whilst reorganizing the Japanese workplace and wider socio-economic relationships. Further, the book explores how professional women create new social identities through the mutual conditioning of structure and self, and asks how women come

to understand their experiences; how their actions change the gendering of the workforce; and how their lives shape the economic, political, social, and cultural landscapes of this post-industrial nation. Based on extensive fieldwork, *Career Women in Contemporary Japan* will have broad appeal across a range of disciplines including Japanese culture and society, gender and family studies, women's studies, anthropology, ethnology and sociology.

Women Managers in Neoliberal Japan Simon and Schuster
Bardwell L. Smith offers a fresh perspective on c, the Japanese ceremony performed to bring solace to those who have experienced miscarriage, stillbirth, or abortion. Showing how old and new forms of myth, symbol, doctrine, praxis, and organization combine and overlap in contemporary mizuko kuyō, Smith provides critical insight from many angles: the sociology of the family, the power of the

medical profession, the economics of temples, the import of ancestral connections, the need for healing in both private and communal ways and, perhaps above all, the place of women in modern Japanese religion. At the heart of Smith's research is the issue of how human beings experience the death of a life that has been and remains precious to them. While universal, these losses are also personal and unique. The role of society in helping people to heal from these experiences varies widely and has changed enormously in recent decades. In examples of grieving for these kinds of losses one finds narratives not only of deep sorrow but of remarkable dignity.

Young women in Japan: Transitions to adulthood received a CHOICE "Outstanding Academic Title of the Year 2010" award from the American Library Association. This book examines young women in Japan, focusing in particular on their transitions to adulthood, their

conceptions of adulthood and relations with Japanese society more generally. Drawing on detailed primary research including a year-long observation of high schools and subsequent interviews over a 12 year period, it traces the experiences of a group of working class women from their last year of high-schooling in 1989 through to 2001 as they approached their thirties. It considers important aspects of the transition to adulthood including employment, marriage, divorce, childbirth and custody. It shows how the role and identities of young women changed over the course of the 1990s, exploring the impact of changes within

Japanese society and global forces, and explains fully the implications for ordinary young people and their everyday lives. It considers to what extent young women's perceptions of themselves and society are shifting, and how far this can be explained by external constraints and their own experiences and decisions.

Japanese Language, Gender, and Ideology Global

Oriental Women in Asia: Tradition, Modernity and Globalisation surveys the transformation in the status of women since 1970 in a diverse range of nations: Malaysia, China, Indonesia, Singapore, the Philippines, India, Taiwan, Vietnam, Hong

Kong, Korea, Japan and Burma. Within these 13 national case studies the book presents new arguments about being women, being Asian and being modern in contemporary Asia. Recent social changes in women's place in society are untangled in recognition that not all change is 'progress' and that not all 'modernity' enhances women's status. The authors suggest that the improvements in women's status within the Asian region vary dramatically according to the manner in which women interact with the particular economic and ideological forces in each nation. Each contributor has focussed on a particular country in their area of expertise. They present

innovative arguments relating to the problem of 'being women' in Asia during a period of dramatic social and political changes. Each national case study explores key social and economic markers of women's status such as employment rates, wage differentials, literacy rates and participation in politics or business. The effects of population control programs, legislation on domestic violence and female infanticide, and women's role in the family and the workforce are also discussed. The book poses questions as to how women have negotiated these shifts and in the process created a 'modern' Asian woman. Specialists from a variety of disciplines

including history, anthropology, sociology, demography, gender studies and psychology grapple with the complexities and ambivalences presented by the multiple faces of the modern Asian woman. Complete with a list of recommended readings and a website with links to electronic resources, the book will be of particular interest to undergraduate students of Asian studies and women's studies as well as scholars and postgraduate students interested in comparative women's studies.

Integrating political

events with cultural, economic, and intellectual movements, Modern Japan provides a balanced and authoritative survey of modern Japanese history. A summary of Japan's early history, emphasizing institutions and systems that influenced Japanese society, provides a well-rounded introduction to this essential volume, which focuses on the Tokugawa period to the present. The fifth edition of Modern Japan is updated throughout to include the latest information on Japan's international relations, including secret diplomatic correspondence recently disclosed on WikiLeaks. This edition brings Japanese history

up to date in the post 9/11 era, detailing current issues such as: the impact of the Gulf Wars on Japanese international relations, the March 2011 earthquake, tsunami, and subsequent nuclear accident, the

recent tumultuous change of political leadership, and Japan's current economic and global status. An updated chronological chart, list of prime ministers, and bibliography are also included.
