Charting And Technical Analysis  
Modern day charting and technical analysis uses

the basic foundation of the Dow Theory and encompasses modern charting techniques and strategies to give the investor and trader a distinct advantage. Read more  
Charting and Technical Analysis: Fred Mcallen ...  
Technical analysis uses a wide variety of charts that show

price over time. Technical analysis is applicable to stocks, indices, commodities, futures or any tradable instrument where the price is influenced by the forces of supply and demand.  
Technical Analysis [ChartSchool]  
Technical traders analyze price charts to attempt to predict price

movement. The two primary variables for technical analysis are the time frames considered and the particular technical indicators that a trader chooses to utilize. The technical analysis time frames shown on charts range from one-minute to monthly, or even yearly, time spans. Technical Analysis - Beginner's Guide to Technical Charts Technical analysis seeks to interpret the story of a stock's price action. Charts act as the canvas where the story is painted. The common types of charts are candlestick, bar and line charts. Technical Analysis of Stock Trends and Charts Unlike fundamental analysts who attempt to evaluate a security's intrinsic value, technical analysts focus on charts of price movement and various analytical tools to evaluate a security's strength or weakness and forecast future price changes. Technical Analysis — TradingView In technical analysis, transitions between rising and falling trends are often signaled by price patterns.
