This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role in the

Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history.

Are you having trouble demonstrating to management what a manufacturing execution system (MES) is and what it can do for you? Or do you simply need to justify why you even need a MES? Perhaps you are the executive decision maker and just need some answers. Bianca Scholten, the author of the best-selling book, *The Road to Integration: Applying ISA-95 in Manufacturing*, shares her expertise on the topic in her latest easy-to-read guide to MES. In recent decades, says Scholten, industrial companies have invested much time and money in not only machine and production line automation but also in ERP (Enterprise Resource Planning) systems. The MES falls between these two layers. Many of the preparatory activities (e.g., detailed production scheduling and recipe management), but also retrospective activities (e.g., data collection, reporting, and analysis) are primitive at best. Ideal for CEOs, CFOs, and managers, Scholten sheds some light on how to get out of this outdated situation using real-world examples and the knowledge gleaned from IT, production managers, and other colleagues who have been through the MES experience. She covers MES selection, company expectations during implementation and initial use of the MES, advice on developing and maintaining a multi-site MES template, and return on investment. She also adds a bird's-eye view of the ISA-95 standard for better communication between systems and their applications.

The Condition Assessment Scheme (CAS) for oil tankers was adopted in 2001 and is applicable to all single-hull tankers of 15 years or older. Although the CAS does not specify structural standards in excess of the provisions of other IMO conventions, codes and recommendations, its requirements stipulate more stringent and transparent verification of the reported structural condition of the ship and that documentary and survey procedures have been properly carried out and completed. The Scheme requires that compliance with the CAS is assessed during the Enhanced Survey Program of Inspections concurrent with intermediate or renewal surveys currently required by resolution A.744(18), as amended.--Publisher's description.

The United Nations world water development report 2020 Vintage
 The 2020 edition of the WWDR, titled 'Water and Climate Change' illustrates the critical linkages between water and climate change in the context of the broader sustainable development agenda. Supported by examples from across the world, it describes both the challenges and opportunities created by climate change, and provides potential responses - in terms of adaptation, mitigation and improved resilience - that can be undertaken by enhancing water resources management, attenuating water-related risks, and improving access to water supply and sanitation services for all in a sustainable manner. It addresses the interrelations between water, people, environment and economics in a changing climate, demonstrating how climate change can be a positive catalyst for improved water management, governance and financing to achieve a sustainable and prosperous world for all. The report provides a fact-based, water-focused contribution to the knowledge base on climate change. It is complementary to existing scientific assessments and designed to support international political frameworks, with the goals of helping the water community tackle the challenges of climate change, and informing the climate change community about the opportunities that improved water management offers in terms of adaptation and mitigation.

In *Canaries Reflect on the Mine: Dropouts' Stories of Schooling*, Jeanne Cameron invites the reader to see schooling and early school leaving through the eyes of high school dropouts themselves. The transcendent desires revealed by this research - to be known and valued, to learn with purpose and autonomy - are spoken with poignant clarity by the young people who story these pages. This study offers a compelling and timely critique of the dominant, neoliberal discourse on schooling and early school leaving. It challenges conventional wisdom about dropouts, and shows how the experiences and needs of those who leave school early and those who persist to graduation are more similar than different. Collectively, these young people's stories evoke a canary-in-the-mine metaphor, one where the canaries exit and the miners remain. They implore us to see the dropout crisis as a symptom of the alienating and dehumanizing school practices advanced by No Child Left Behind and Race to the Top. More importantly, they offer a vision for schooling that lovingly embraces and extends all students' experiences, enriches their biographies, and celebrates and supports each of their talents and purposes with equal passion. Pre-service and in-service teachers, educational researchers and policy makers, administrators, and advocates for equitable and democratic schooling have much to learn from this book. Qualitative researchers will find a powerful model for working collaboratively with youth to represent their experiences and to craft solutions to the challenges they face. Students of sociology will discover a compelling illustration of C. Wright Mills' sociological imagination and his charge to "take it big" by drawing connections between individual biographies and the social and historical structures that frame lived experience. For professional social scientists, it embodies Mills' challenge to embrace the moral sensibilities required to understand and improve the human condition.

 On the Swiss border with Austria in 1938, a police captain refuses to enforce a law barring Jewish refugees from entering his country. In the Balkans half a century later, a Serb from the war-blasted city of Vukovar defies his superiors in order to save the lives of Croats. At the height of the Second Intifada, a member of Israel's most elite military unit informs his commander he doesn't want to serve in the occupied territories. Fifty years after Hannah Arendt examined the dynamics of conformity in her seminal account of the Eichmann trial, *Beautiful Souls* explores the flipside of the banality of evil, mapping out what impels ordinary people to defy the sway of authority and convention. Through the dramatic stories of unlikely resisters who feel the flicker of conscience when thrust into morally compromising situations, Eyal Press shows that the boldest acts of dissent are often carried out not by radicals seeking to overthrow the system but by true believers who cling with unusual fierceness to their convictions. Drawing on groundbreaking research by moral psychologists and neuroscientists, *Beautiful Souls* culminates with the story of a financial industry whistleblower who loses her job after refusing to sell a toxic product she rightly suspects is being misleadingly advertised. At a time of economic calamity and political unrest, this deeply reported work of narrative journalism examines the choices and dilemmas we all face when our principles collide with the loyalties we harbor and the duties we are expected to fulfill.
