The Mathematics of Computerized Tomography | Society for ... The Mathematics Of Computerized TomographyBy computerized tomography (CT) we mean the reconstruction of a function from its line or plane integrals, irrespective of the field where this technique is applied. In the early 1970s CT was introduced in diagnostic radiology and since then,

many other applications of CT have become known, some of them preceding the application in radiology by many years.The Mathematics of Computerized Tomography | Society for ...The Mathematics of Computerized Tomography. In this context one usually speaks of

computerized (computed, computer assisted) tomography, since for actually performing the reconstructions in practice one needs to use a digital computer.
