 GCSE Geography Theme 1 Units - THE GEOGRAPHER ONLINE
 Population density figures often give the average for each country, but remember there can be great variety within a country. A good example is Japan, where 75% of the land is mountainous and 77% of the population live on just 16% of the land. Other countries which appear to have low population densities have very crowded major cities
 GCSE GEOGRAPHY OCR B REVISION GUIDE Population and settlement
 Population geography is a division of human geography. It is the study of the ways in which spatial variations

in the distribution, composition, migration, and growth of populations are related to the nature of places. Population geography involves demography in a geographical perspective.
 Population geography - Wikipedia
 Settlement geography is a branch of human geography that investigates the earth's surface's part settled by humans. According to the United Nations' Vancouver Declaration on Human Settlements (1976), "human settlements means the totality of the human community - whether city, town or village - with all the social, material, organizational, spiritual and cultural elements that sustain it."
