This vibrant and prismatic exploration of 100 essential shades is an invaluable resource for designers, artists and content producers that will also delight nonprofessionals interested in learning about how color shapes our lives. From ancient plant pigments that are revolutionizing contemporary fashion to new colors, such as the recently viral Millennial Pink, this wide-ranging deep dive into the world of color guides readers through the origins, connotations, specs, brand associations and artistic use of colors throughout history. Unfolding, like a rainbow, across the visible spectrum, the chapters are divided by basic color - from red to violet and including black and white - and introduced with engaging background information. Each chapter takes a closer look at a variety of specific shades in the color family, delving into cultural references that span fashion, art history, traditional and modern crafts, and product design. Readers will learn about woad - an ancient pigment that was employed by William Morris and has resurfaced in sustainable dyes - as well as the earliest known use of violet some 25,000 years ago. Each shade is accompanied by sidebars that offer technical specifications, mood connotations, and examples of its use in art and commerce. Informative and endlessly inspiring, this guide will be indispensable to anyone interested in how to use and combine colors in their life or work.

If you're from the "I don't know zip about color - but I know what I like" school of color theory, this book's for you. You won't find color wheels or lectures on color harmony here . . . just 500+ tried-and-true color combinations derived from actual design work - posters, packages, even giftware - created over the past century by designers, artists and color experts. You'll find historical color combinations from the Victorian period, Art Deco era, Far-out Sixties, Rave craze - plus current color combinations, such as limited color, "bad color" and much more. Even if you don't know what you're looking for, you'll know it when you see it here. It's not just what colors you use, but how you use them. That's why the color combinations in this book are arranged in simple, sample layouts rather than pages of out-of-context swatches. Complete with color formulas in CMYK, these layouts show you which colors work for backgrounds, borders, type, outlines, panels and small text, so you can easily adapt them to your designs.

The Little Book of Colour Chronicle Books

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design

process is seen in the physical fit, or interface, between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.

Color Index XL Clarkson Potter Publishers

A design book filled with beautiful photography and clear ideas for how to use pattern to decorate your home. If you focus on pattern, from texture and color to furniture and textiles, everything else will fall into place. Pattern is the strongest element in any room. In Living with Pattern, Rebecca Atwood demystifies how to use that element, a design concept that often confounds and confuses, demonstrating how to seamlessly mix and layer prints throughout a house. She covers pattern usage you probably already have, such as on your duvet cover or in the living room rug, and she also reveals the unexpected places you might not have thought to add it: bathroom tiles, an arrangement of book spines in a reading nook, or windowpane gridding in your entryway. This stunning book showcases distinct uses of pattern in homes all over the country to inspire you to realize that an injection of pattern can enliven any space, helping to make it uniquely yours.

The Color Scheme Bible Quarry Books

Color plays a significant role in design due to its visual impact and psychological influence on the viewer. Combining two or more colors effectively in a single layout or design can be difficult to achieve without a working knowledge of color theory. As a result, companies will often invest in specialists to aid in color selection for their products or campaigns, letting the experts do what they do best. Color Matching helps demystify the process, providing an introduction to color along with an exploration of six key methods of color matching: warm color, cool color, contrast color, complementary color, similar color and integrated color. Each section includes a variety of preselected color combinations to use along with a multitude of cohesive examples from branding, packaging, product and promotion design.

1000 Ideas for Color Schemes Ryland Peters & Small

Internationally renowned textile designer Lori Weitzner presents a novel, layered perspective on the use and significance of color in design and culture in this spectacular treasury illustrated with 225 full-color images. Ode to Color, a stunning anthology by renowned and award-winning textile and wallcovering designer Lori Weitzner, principal of Lori Weitzner Design, Inc., offers an immersive, sensual, and engaging journey in the world of color as it applies to culture, design, mood, and memory. Each of the ten chapters in this richly illustrated volume presents a distinct color world through an intimate and often kaleidoscopic perspective, a compilation of the numerous—and often shifting—associations and emotions we assign to a color or group of colors. Each chapter combines diverse imagery—evocative fine art and photography, environmental interiors, details of Weitzner's gorgeous designs as well as her sketches and watercolors—with excerpts from literature and her own essays on a wide array of topics relating to the palette. The result is a fully sensory conveyance of each palette's particular power as well as a consideration of its tangible and intangible connections, from its place in religion, pop culture, and commerce to the impact it has upon our decision making, our moods, and our tastes. While each chapter is unique in its approach to the ten worlds, with its mix of essays, prose and range of art, from a Technicolor Disney cartoon in Out Loud to David Bowie as Ziggy Stardust in Silverlight, each chapter includes: An introductory essay on a subject that characterizes the palette A two-page photograph of an open drawer in Weitzner's studio that she has arranged with various fabrics, skeins, and objects that, together, comprise the palette; An evocative two-page word collage that presents both color names and the words commonly associated with the palette; Design pointers that provide in-depth insight to working with color and to decorating with each palette throughout the home, from wall treatments to accessories. Spectacular and imaginative, this experiential volume will captivate, inspire, and inform a broad audience, including interior designers and decorators, architects, graphic and fine artists, and anyone interested in art, design, fashion, pop culture, and spiritual discovery. Sumptuous, beautifully designed, and filled with wondrous imagery and compelling stories and facts, it makes an inspiring and unusual gift for almost any occasion.
