This field manual provides a well-tested approach for promoting citizen participation. It breaks down the traditional boxes separating human rights, rule of law, development, and governance, and reconnects them in order to create an integrated approach to rights-based political empowerment. A New Weave of Power, People & Politics combines concrete and practical 'action steps' with a sound theoretical foundation to help users understand the process of advocacy planning and implementation. This is an 'Action Guide' that builds on the authors' 50 years of combined experience in advocacy, gender, human rights, popular education, and social change. These collective experiences were gathered in Asia, Africa, Latin America, the Middle East, Europe, the former Soviet Union, and North America, and they range from participatory research and community development, to neighbourhood organizing and legal rights education, to large-scale campaign advocacy. It delves more deeply into questions of citizenship, constituency-building, social change, gender, and accountability.

How do social movements die? Some explanations highlight internal factors like factionalization, whereas others stress external factors like repression. Christian Davenport offers an alternative explanation where both factors interact. Drawing on organizational, as well as individual-level, explanations, Davenport argues that social movement death is the outgrowth of a coevolutionary dynamic whereby challengers, influenced by their understanding of what states will do to oppose them, attempt to recruit, motivate, calm, and prepare constituents while governments attempt to hinder all of these processes at the same time. Davenport employs a previously unavailable database that

contains information on a black nationalist/secessionist organization, the Republic of New Africa, and the activities of authorities in the US city of Detroit and state and federal authorities.

Eva - A Novel by Carry van Bruggen

Thomson

*Principles of Comparative Politics* offers the most comprehensive and up-to-date introduction to comparative inquiry, research, and scholarship. In this thoroughly revised Third Edition, students now have an even better guide to cross-national comparison and why it matters. The new edition retains a focus on the enduring questions with which scholars grapple, the issues about which consensus has started to emerge, and the tools comparativists use to get at the complex problems in the field. Among other things, the updates to this edition include a thoroughly-revised chapter on dictatorships that incorporates a discussion of the two fundamental problems of authoritarian rule: authoritarian power-sharing and

authoritarian control; a revised chapter on culture and democracy that includes a more extensive examination of cultural modernization theory and a new overview of survey methods for addressing sensitive topics; a new section on issues related to electoral integrity; an expanded assessment of different forms of representation; and a new intuitive take on statistical analyses that provides a clearer explanation of how to interpret regression results.

Examples from the gender and politics literature have been incorporated into various chapters, the Problems sections at the end of each chapter have been expanded, and the empirical examples and data on various types of institutions have been updated. Online videos and tutorials are available to address some of the more methodological components discussed in the book. The authors have thoughtfully streamlined chapters to better focus attention on key topics.

*Eva*, a 1927 novel by Dutch writer Carry van Bruggen, is an experiment in depicting a woman's life from girlhood to marriage, and beyond, to sexual freedom and independence. At the same time, the narrative expresses Eva's dawning sense of self and expanding subjectivity through a stream of

consciousness told by a shifting narrator. Burdened all of her life by feelings of shame, at the end of the novel Eva overcomes this legacy of her upbringing and declares that it is 'bodily desire that makes love acceptable'. Carry van Bruggen's rich and varied language conveys Eva's experience of the world. Powerful memories of an orthodox Jewish childhood pervade the novel with its fluid sense of time. As Eva puts it, 'I let these years slip through my fingers like a stream of dry, glinting sand.' Jane Fenoulhet makes this important modernist novel accessible to English readers for the first time. While it can be described as a becoming-woman of both Eva and her creator, so can the translation be seen as the translator's own becoming, as Fenoulhet explains in the accompanying commentary, where she also describes the challenges of translating van Bruggen's dynamic, intense narrative. For Fenoulhet, translation is more a matter of personal engagement with the novel than a matter of word choice and style. In this way, the emotional and intellectual life of the main character is re-enacted through translation.

What shapes political behavior more: the situations in which individuals find themselves, or the internal psychological makeup—beliefs, values, and so on—of those individuals? This is perhaps the leading division within the psychological study of politics today. This text provides a concise, readable, and conceptually-organized introduction to the topic of political psychology by examining this very question. Using this situationism-dispositionism framework—which roughly parallels the concerns of social and cognitive psychology—this book

focuses on such key explanatory mechanisms as behaviorism, obedience, personality, groupthink, cognition, affect, emotion, and neuroscience to explore topics ranging from voting behavior and racism to terrorism and international relations. Houghton's clear and engaging examples directly challenge students to place themselves in both real and hypothetical situations which involve intense moral and political dilemmas. This highly readable text will provide students with the conceptual foundation they need to make sense of the rapidly changing and increasingly important field of political psychology.

*Vanguard of the Revolution* IDRC

This book maps the process and political economy of policy making in Africa. It's focus on trade and industrial policy makes it unique and it will appeal to students and academics in economics, political economy, political science and African studies. Detailed case studies help the reader to understand how the process and motivation behind policy decisions can vary from country to country depending on the form of government, ethnicity and nationality and other social factors.

*Biology of Parasitism* is based on the *Biology of Parasitism Course* at the Marine Biological Laboratory in Woods Hole, Massachusetts. Having just celebrated its 20th offering, this Course has distinguished itself as the premier,

world-renowned training ground for future generations of parasitologists. The primary goal of the Course is to attract and introduce the very best and most promising young researchers to the many unresolved problems in parasitology and prepare them for their future as independent investigators in the field. The rigorous program combines state-of-the-art laboratory research with a program of visiting lecturers who bring together the most current research in the field. Since at this time there are no academic institutions that have enough depth in parasitology research or teaching faculty to provide up-to-date and state-of-the-art training, the Course has become, and will remain, a global resource for providing intensive education in modern parasitology. *Biology of Parasitism* is intended to present a snapshot of the content and spirit of the *Biology of Parasitism* Course. By presenting a series of chapters that reflect the formal lectures that students receive on a daily basis, as well as the approaches used during the laboratory section of the Course, the editors hope to share some of the science that occurs there. One part of the book presents the experimental component of the Course, in particular the subject matter of the four two-week sessions covering Immunology, Biochemistry, Cell Biology and Molecular Biology of protozoan and helminth parasites. As in the Course, the experimental part is complemented by a number of review-like chapters solicited from the large number of speakers who lecture during the Course.

**Biology of Parasitism** Taylor & Francis  
In response to a request by President Barak Obama on November 24, 2010, the Presidential Commission for the Study of Bioethical Issues oversaw a thorough fact-finding investigation into the specifics of the U.S. Public Health Service-led studies in Guatemala involving the intentional exposure and infection of vulnerable populations. Following a nine-month intensive investigation, the Commission has concluded that the Guatemala experiments involved gross violations of ethics as judged against both the standards of today and the researchers' own understanding of applicable contemporaneous practices. It is the Commission's firm belief that many of the actions undertaken in Guatemala were especially egregious moral wrongs because many of the individuals involved held positions of public institutional responsibility. The best thing we can do as a country when faced with a dark chapter is to bring it to light. The Commission has worked hard to provide an unvarnished ethical analysis to both honor the victims and make sure events such as these never happen again.

The first comprehensive political history of the communist party Vanguard of the Revolution is a sweeping history of one of the most significant political institutions of the modern world. The communist party was a revolutionary idea long before its supporters came to power. A. James McAdams argues that the rise and fall of communism can be understood only by taking into account the origins and evolution of this compelling idea. He shows how the leaders of parties in countries as diverse as the Soviet Union, China, Germany, Yugoslavia, Cuba, and North Korea adapted the original ideas of revolutionaries like Karl Marx and Vladimir Lenin to profoundly different social and cultural settings. Vanguard of the Revolution is essential reading for anyone seeking to understand world communism and the captivating idea that gave it life.

The fourth volume of The Cambridge History of America and the World examines the heights of American global power in the mid-twentieth century and how challenges from at home and abroad altered the United States and its role in the world. The second half of the twentieth century marked the pinnacle of American global power in economic, political, and cultural terms, but even as it reached such heights, the United States quickly faced new challenges to its power, originating both domestically and internationally. Highlighting cutting-edge ideas from scholars from all over the world, this volume anatomizes American power as well as the counters and alternatives to 'the American empire.' Topics include US economic and military power, American culture overseas, human rights and humanitarianism, third-world internationalism, immigration, communications technology, and the Anthropocene.
