Changes in the International Political Economy

Walter de Gruyter GmbH & Co KG
The Routledge Handbook on Spaces of Urban Politics provides a comprehensive statement and reference point for urban politics. The scope of this handbook's coverage and contributions engages with and reflects upon the most important, innovative and recent critical developments to the interdisciplinary field of urban politics, drawing upon a range of examples from within and across the Global North and Global South. This handbook is organized into nine interrelated sections, with an introductory chapter setting out the rationale, aims and

structure of the Handbook, and short introductory commentaries at the beginning of each part. It questions the eliding of 'urban politics' into the 'politics of the city', reconsidering the usefulness of the distinction between 'old' and 'new' urban politics, considering issues of 'class', 'gender', 'race' and the ways in which they intersect, appear and reappear in matters of urban politics, how best to theorize the roles of capital, the state and other actors, such as social movements, in the production of the city and, finally, issues of doing urban political research. The various chapters explore the issues of urban politics of economic development,

environment and nature in the city, governance and planning, the politics of labour as well as living spaces. The concluding sections of the Handbook examine the politics over alternative visions of cities of the future and provide concluding discussions and reflections, particularly on the futures for urban politics in an increasingly 'global' and multidisciplinary context. With over forty-five contributions from leading international scholars in the field, this handbook provides critical reviews and appraisals of current conceptual and theoretical approaches and future developments in urban politics. It is a key reference to all

researchers and policy-makers with an interest in urban politics.

The consumer electronics market has never been as awash with new consumer products as it has over the last couple of years. The devices that have emerged on the scene have led to major changes in the way consumers listen to music, access the Internet, communicate, watch videos, play games, take photos, operate their automobiles—even live. Digital electronics has led to these leaps in product development, enabling easier exchange of media, cheaper and more reliable products, and convenient

services. This handbook is a much-needed, comprehensive engineering guide to the dynamic world of today's digital consumer electronics. It provides complete details on key enabling technologies, standards, delivery and reception systems, products, appliances and networking systems. Each chapter follows a logical progression from a general overview of each device, to market dynamics, to the core technologies and components that make up that particular product. The book thoroughly covers all of the key digital consumer product categories: digital TV, digital audio, mobile communications devices, gaming

consoles, DVD players, PCs and peripherals, display devices, digital imaging devices, web terminals and pads, PDAs and other handhelds, screenphones/videophones, telematics devices, eBooks and readers, and many other current and future products. Developing countries in East Asia recorded remarkable economic growth until the Asian financial crisis erupted in mid-1997. Although several countries experienced devastating setbacks, most of them recovered to achieve reasonable rates of economic growth over the next few years.

Sound macroeconomic management, export-oriented policies, and the availability of skilled and low-wage labour are among the factors that contributed to the rapid economic growth before the crisis and the recovery thereafter. Especially noteworthy in this regard is the role played by foreign direct investment (FDI). This comprehensive book identifies the factors that contributed to the expansion of FDI inflows in East Asia and the factors that enabled recipient countries to utilize FDI effectively. It includes detailed case studies on China, South Korea, Taiwan, Indonesia, Malaysia, the Philippines, Singapore, Thailand and Vietnam.

Also included is a comparative study of investing firms headquartered in the United States, Japan and Hong Kong. The authors conclude that social stability, clear and effective policy implementation and corporate governance are all key factors in reaping economic success from FDI.

The book highlights the areas of consistency and difference between the most influential European patent law jurisdictions: the European Patent Office, England and Wales, France, Germany, and the Netherlands. The book also draws insights from further afield, with contributions from other, very active,

patent jurisdictions, including Italy, Sweden, Denmark, and Switzerland. Uniquely, the book addresses European patent law by subject matter area, assessing the key national and EPO approaches together rather than nation by nation. Each chapter outlines the common ground between the national approaches and provides a guide for the possible application of European patent law in national courts and the UPC in the future. In addition to featuring content on new countries, the second edition includes new chapters dedicated to the substantive aspects of FRAND, declarations, and evidence. There is also an expanded commentary on

construction, including common terms used in patent claims. A must-read for anyone working in the field of European patent law. ASIA'S STAR BRANDS
Asian brands have come of age, and no longer can be seen as "also rans" to their Western competitors. The problem is, very little has been know about them. Paul Temporal's book fills this gap, with a series of practical 'brand biographies' which chart both the growing pains and the growth potential of the new contenders from the East. It's vital reading for anyone committed to doing business in Asia. - Miles Young,

Chairman, Ogilvy & Mather, Asia Pacific China and Japan, as well as India and the Emirates, suggest remarkable achievements by local companies in the field of branding and brands. Such a revolution shall impact not only the regional markets but also the world economy and non-Asian firms. Paul Temporal's book provides spectacular business cases and broader key lessons. it should become a major reference for any practitioner and scholar, whether Asian or not. I rank it in my short list of relevant texts about competition and success in the coming years. - Professor Jean-Claude Thoenig, INSEAD A well-managed brand is the

lifeline of any successful company. this helpful book explains how Asian companies have built their brands to create sustainable competitive advantage. Using up-to-date Asian case studies, it will help readers have a better understanding of the creation, management and evolution of brands. - Professor John Quelch, Harvard Business School It is often said that the 21st Century is Asia's. It is very encouraging to see many Asian brands succeeding, as wonderfully showcased by Paul Temporal, both regionally and globally. Branding is investment for the future. *Multinationals and Economic Growth in East Asia* Packt Publishing Ltd
