The BaoFeng UV-5R is a compact hand held transceiver providing 4 watts in the frequency range of 136-174 MHz and 400-480MHz (520MHz later versions). It is a compact, economical HT that includes a special VHF receive band from 65 - 108 MHz which includes the regular FM broadcast band. Dual watch and dual reception is supported. BaoFeng UV-5R: welcome: Morty, To begin, low-band VHF television is very prone to receive interference from man-made noises such as fluorescent light ballasts, electric motors like your kitchen blender or a neighbor's air conditioner, etc., so I propose a very inexpensive test to see if you have enough signal versus noise to allow reception of channel 5. Antenna advice for Low VHF channel | DTV USA Forum VHF is the first band at which

wavelengths are small enough that efficient transmitting antennas are short enough to mount on vehicles and handheld devices, a quarter wave whip antenna at VHF frequencies is 25 cm to 2.5 meter (10 inches to 8 feet) long. So the VHF and UHF wavelengths are used for two-way radios in vehicles, aircraft, and handheld transceivers and walkie-talkies. Very high frequency - Wikipedia Shop for Low-Band, UHF, VHF, 800 and 900 Band Mobile Radios configurable for Analog, P25, Commercial Digital or Trunking Systems from all the top Manufactures like Motorola, Kenwood, Icom, Vertex, Harris, EF Johnson and more.
