Mind Penetration: The Ancient Art Of Mental Mastery Graphic Arts Books
The art of murder knows many forms, but few more harrowing than murder for reasons of ritual or the supernatural. Supposedly serving a higher cause, they are often little more than acts of self-gratifying blood-lust. Voodoo Killers chronicles the disturbing history of ritualistic killing around the world, with

shocking examples of human sacrifice from past and present, voodoo hexes, sexual slavery and satanic murder. It is a history that incorporates vampires, serial killers and rapists as well as institutionalized killers such as the Aztec high priests and Spanish Inquisitors whomurdered in the name of religion. Murder does not come much worse than this – premeditated, organized, ritualized and, in the past, accepted as permissible. The Voodoo Killers stand alone in the annals of horror.

The Phantom of the Opera (1910) is a novel by French writer Gaston Leroux. Originally serialized in *Le Galois*, the novel was inspired by legends revolving around the Paris Opera from the early nineteenth century. Originally a journalist, Leroux turned to fiction after reading the works of Arthur Conan Doyle and Edgar Allan Poe. Despite its lack of success relative to Leroux's other novels, *The Phantom of the Opera* has become legendary through several adaptations for film, theater, and television, including Andrew Lloyd Webber's celebrated 1886 Broadway musical of the same name. In 1880s Paris, the legendary Palais Garnier Opera House is rumored to be haunted by a malignant entity. Known as the Phantom of the

Opera, he has been linked to the hanging death of a stagehand in addition to several strange and mysterious occurrences. Just before a gala performance, a young Swedish soprano named Christine is called on to replace the opera's lead, who is suffering from a last-minute illness. From the audience, the Vicomte Raoul de Chagny recognizes Christine, his childhood sweetheart, and goes backstage after the opera has ended to reintroduce himself. While waiting by her dressing room, he hears her talking to an unknown man, but upon entering finds himself alone with Christine. Pressing her for information, she reveals that she has been receiving lessons from a figure she calls the Angel of Music, prompting suspicion and terror in Raoul, who is familiar with the legend of the Phantom. As Raoul makes his feelings for Christine known, the Phantom professes his love for his protégé, and a battle for her affection ensues. Caught in this love triangle, threatened on all sides by jealousy and pursuit, Christine struggles to hold on as her star in the Paris Opera rises. With a beautifully designed cover and professionally typeset manuscript, this edition of Gaston Leroux's

Formed by a small group of university students in the early 1980s, Studio Gainax is now one of the most adventurous and widely esteemed anime companies on the scene. And it is fascinating for its unique approach to animation. Formal experimentation, genre-straddling, self-reflexivity, unpredictable plot twists, a gourmet palate for stylishness, proverbially controversial endings, and a

singularly iconoclastic worldview are some of the hallmarks. This documentation of the studio's achievements provides a critical overview of both the company and its films: in-depth examinations of particular titles that best represent the company's overall work, including television series such as *Nadia: The Secret of Blue Water* and *Neon Genesis Evangelion*, and feature films such as *Royal Space Force: The Wings of Honneamise* and *Gunbuster vs. Diebuster*. Each chapter highlights the contribution made by a specific production to the company's progress.

In the hands of many of the great writers, the unravelling of mystery is only one strand within a complex project. Other things get unravelled, too - the belief in a rationally explicable world, in the beneficent, ordering force of culture and civilization. Constantly the detective story delights in muddying the waters, in acknowledging the omnipresent possibilities of anarchy and carnage. As a genre, it is supremely able to combine popular appeal with the ability to disturb,

provoke and challenge the reader. The essays in this volume all pay tribute to, and seek to account for, the astonishing durability of the detective story as a narrative genre. They range generously, taking a variety of theoretical approaches and including detective fiction in languages other than English, but particular attention is paid to the 'Golden Age' of English detective story-writing and to the 'hard-boiled' American version of the genre. This is a collection that will appeal to the scholar and to the devotee alike; to all those, in fact, who cannot resist the lure of finding out whodunit.

"The Languages of Psyche illuminates principal aspects of eighteenth-century medicine and literature and shows how evolving patterns of thought established continuities that helped shape nineteenth- and twentieth-century conceptions of the mental anatomy. Specialists in the history of ideas, including the history of medical psychology, philosophy, political science, and literature and the arts, should welcome its publication."—Gloria Sybil Gross, California State University, Northridge "This is a splendid anthology, which I read with unflagging interest. . . . Traditions of sacrifice exist in almost every human culture and often embody a society's most meaningful religious and symbolic acts. Ritual violence was particularly varied and enduring in the prehistoric South American Andes, where

human lives, animals, and material objects were sacrificed in secular rites or as offerings to the divine. Spectacular discoveries of sacrificial sites containing the victims of violent rituals have drawn ever-increasing attention to ritual sacrifice within Andean archaeology. Responding to this interest, this volume provides the first regional overview of ritual killing on the pre-Hispanic north coast of Peru, where distinct forms and diverse trajectories of ritual violence developed during the final 1,800 years of prehistory. Presenting original research that blends empirical approaches, iconographic interpretations, and contextual analyses, the contributors address four linked themes—the historical development and regional variation of north coast sacrifice from the early first millennium AD to the European conquest; a continuum of ritual violence that spans people, animals, and objects; the broader ritual world of sacrifice, including rites both before and after violent offering; and the use of diverse scientific tools, archaeological information, and theoretical interpretations to study sacrifice. This research proposes a wide range of new questions that will shape the research

agenda in the coming decades, while fostering a nuanced, scientific, and humanized approach to the archaeology of ritual violence that is applicable to archaeological contexts around the world.

Bodies mangled, limbs broken, skin flayed, blood spilled: from paintings to prints to small sculptures, the art of the late Middle Ages and early modern period gave rise to disturbing scenes of violence. Many of these torture scenes recall Christ's Passion and its aftermath, but the martyrdoms of saints, stories of justice visited on the wicked, and broadsheet reports of the atrocities of war provided fertile ground for scenes of the body's desecration. Contributors to this volume interpret pain, suffering, and the desecration of the human form not simply as the passing fancies of a cadre of proto-sadists, but also as serving larger social functions within European society. Taking advantage of the frameworks established by scholars such as Samuel Edgerton,

Mitchell Merback, and Elaine Scarry (to name but a few), *Death, Torture and the Broken Body in European Art, 1300-1650* provides an intriguing set of lenses through which to view such imagery and locate it within its wider social, political, and devotional contexts. Though the art works discussed are centuries old, the topics of the essays resonate today as twenty-first-century Western society is still absorbed in thorny debates about the ethics and consequences of the use of force, coercion (including torture), and execution, and about whether it is ever fully acceptable to write social norms on the bodies of those who will not conform.
