## WENDY LEWIS

---

### **Creative Destruction** SAGE

This book explores how discourses of the local, the particular, the everyday, and the situated are being transformed by new discourses of globalization and transnationalism, as used both by government and business and in critical academic discourse. Unlike other studies that have focused on the politics and economics of globalization, *Articulating*

the Global and the Local highlights the importance of culture and provides models for a cultural studies that addresses globalization and the dialectic of local and global forces. Arguing for the inseparability of global and local analysis, the book demonstrates how global forces enter into local situations and how in turn global relations are articulated through local events, identities, and cultures; it includes studies of a wide range of cultural forms including sports, poetry, pedagogy, ecology, dance, cities, and democracy. *Articulating the Global and the Local* makes the ambitious claim that the

category of the local transforms the debate about globalization by redefining what counts as global culture. Central to the essays are the new global and translocal cultures and identities created by the diasporic processes of colonialism and decolonization. The essays explore a variety of local, national, and transnational contexts with particular attention to race, ethnicity, gender, and sexuality as categories that force us to rethink globalization itself.

*Globalization: The Reader* SAGE

*Globalization: The Reader* addresses the big issues: communications and global

media, political economy, cultural homogeneity and heterogeneity, new technologies, tourism, beliefs, and identity.

**A User's Guide** New Internationalist

One of the inaugural books discussing the increasing tendency of cultural practices to cross national boundaries. Updated with a new preface, these influential essays by a distinguished group of cultural critics lay the groundwork for a vital new field of inquiry.

*Global Mélange* Oxford University Press

Fear and terror have come to drive world politics, and the people who do the driving have shaped and used them to carry out their policies. As the world's political economy devolves into chaos, *Globalization of American Fear Culture* posits that violence and fear have become the new statecraft.

*Globalization of American Fear Culture*

GRIN Verlag

We live in a world that is marked by the twin processes of economic and cultural globalization. In this thought provoking book, Kumaravadivelu explores the impact of cultural globalization on second and foreign language education.

*Globalization* Springer

*Cultural Globalization: A User's Guide* is a personal and engaging journey through theories of culture and globalization.

Drawing on extensive examples and interdisciplinary research, Wise explores concepts of culture, territory and identity in order to give students a new perspective on issues of globalization. Includes numerous examples from Asian, European, and North American youth culture and popular music Draws on interdisciplinary research from the fields of anthropology, cultural studies, cultural geography, and media studies Considers how global processes carry with them the ethical questions of how to act in the world and how to care for others Provides an original and stimulating overview of theories of culture and globalization, encouraging students think more broadly about the key issues

**Contemporary Conditions for the Representation of Identity:**

The author illuminates the process of "Latinization" currently underway in the

U.S., tracing the largest migration in the history of the Americas--the movement north of large numbers of people from Latin America. *Simultaneous*. (Social Science)

**The Influence of Globalization on Culture** Duke University Press

In the first decade of the twenty-first century, globalization and identity have emerged as the most critical challenges to world peace. This volume of *Peace & Policy* addresses the overarching question, "What are the effects of globalization in the areas of culture, ethnic diversity, religion, and citizenship, and how does terrorism help groups attain a sense of global identity?" Part I, "Citizenship in a Globalizing World," reexamines globalization in light of the traditions from which human civilizations have evolved. Linda Groff focuses on Samuel R. Huntington's thesis that the Cold War would be followed by a clash of civilizations. Joseph A. Camilleri traces the history of the concept of citizenship and its transformation through the ages to modern times. Kamran Mofid argues that the marketplace is not just an economic sphere but one where economic and

business interests must embrace the spiritual assets of the community. Majid Tehranian raises the problem of identity and advocates the assumption of global identity, responsibility, and citizenship. Part II, "Convergence in Global Cultures," explores the complex issues of diversity in religions. Christopher Leeds, Vladimir Korobov, and Bharat Gupta show how the reconceptualization of the world both geographically and regionally can recreate new sensibilities needed to overcome differences. Part III, "Divergence in Global Conflicts," discusses the multiple dimensions of the globalizing effects of economic expansion and political strife experienced by different cultures at local and regional levels. Audrey Kitigawa and Ade Ogunrinade use Nigeria as an example of political manipulation of religious and ethnic groups to divert attention from the real problems of social and economic marginalization. Fred Riggs looks at how the Web has become a medium in the globalization of religious movements. The authors maintain that continuing efforts for dialogue across cultural and religious boundaries in today's *Media, Arts, Policy, and Globalization*

Culture, Globalization and the World System Contemporary Conditions for the Representation of Identity  
The world's cultures and their forms of creation, presentation and preservation are deeply affected by globalization in ways that are inadequately documented and understood. The Cultures and Globalization series is designed to fill this void in our knowledge. In this series, leading experts and emerging scholars track cultural trends connected to globalization throughout the world, resulting in a powerful analytic tool-kit that encompasses the transnational flows and scapes of contemporary cultures. Each volume presents data on cultural phenomena through colourful, innovative information graphics to give a quantitative portrait of the cultural dimensions and contours of globalization. This second volume *The Cultural Economy* analyses the dynamic relationship in which culture is part of the process of economic change that in turn changes the conditions of culture. It brings together perspectives from different disciplines to examine such critical issues as: • the production of cultural goods and services and the

patterns of economic globalization • the relationship between the commodification of the cultural economy and the aesthetic realm • current and emerging organizational forms for the investment, production, distribution and consumption of cultural goods and services • the complex relations between creators, producers, distributors and consumers of culture • the policy implications of a globalizing cultural economy By demonstrating empirically how the cultural industries interact with globalization, this volume will provide students of contemporary culture with a unique, indispensable reference tool.

### **Cultural Globalization and Language Education** Routledge

What does it mean to be young in a changing world? How are migration, settlement and new urban cultures shaping young lives? And in particular, are race, place and class still meaningful to contemporary youth cultures? This path-breaking book shows how young people are responding differently to recent social, economic and cultural transformations. From the spirit of white localism deployed by de-industrialized football supporters, to

the hybrid multicultural exchanges displayed by urban youth, young people are finding new ways of wrestling with questions of race and ethnicity. Through globalization is whiteness now being displaced by black culture -- in fashion, music and slang -- and if so, what impact is this having on race politics? Moreover, what happens to those people and places that are left behind by changes in late modernity? By developing a unique brand of spatial cultural studies, this book explores complex formations of race and class as they arise in the subtle textures of whiteness, respectability and youth subjectivity. This is the first book to look specifically at young ethnicities through the prism of local-global change. Eloquently written, its riveting ethnographic case studies and insider accounts will ensure that this book becomes a benchmark publication for writing on race in years to come.

Social Theory and Global Culture Polity  
Now fully revised and updated, this book argues that we are witnessing the formation of a global *mélange* culture through processes of cultural mixing. Jan Nederveen Pieterse's historically deep and

geographically wide approach to globalization is essential reading as we face the increasing spread of conflicts bred by cultural misunderstanding.

The Novel and the Globalization of Culture  
Routledge  
Seminar paper from the year 2012 in the subject Politics - International Politics - Topic: Globalization, Political Economics, grade: A, Webster University, language: English, abstract: In recent decades, many regions of the world have seen a marked increase in economic development due to the process of globalization as states have opened their borders to international markets, allowing for multinational corporations, non-governmental organizations, and foreign state actors to have an increasingly powerful influence over traditionally domestic matters. With this development and the advance of technology, media and communication have had the ability to reach regions of the world, which may have never been exposed to other cultures in the past. Undoubtedly, this has had an impact on the culture and societal norms of countless cultures as dominant world cultures expand their realm of influence

through such media as TV programs and the internet. This report will examine to what extent dominant world cultures' impacts are on what will be termed 'traditional cultures' - a unique culture, which up until recently has been relatively unaware of and influenced by other outside cultures. Furthermore, it will examine whether this trend of globalization will advance the creation of a singular global culture. The debate of whether the erosion between traditional culture and the strengthening of a global culture is of particular concern as within recent history many groups, who are often termed minorities to the more dominant cultures, are concerned with the loss of their individuality, way of life, and even their national sovereignty. To pro or hyper-globalists, this loss of sovereignty is viewed as progress as the process of cultural homogenization will inevitably be responsible for the decay of conflict among differing cultural groups. However, to the 'minorities' or traditional cultures opposed to this form of cultural transformation, this theory poses a threat to their unique values and it is not likely that traditional cultures will likely submit

to the notion that a growing global culture is an unavoidable fact.

**Culture** John Wiley & Sons

Bringing together canonical European authors with authors from the Third World, this book analyzes the emergence of the modern global novel, and the way it mirrors the underlying process of cultural globalization. Through detailed readings of Stendhal, Hardy, Conrad, Achebe, and Vargas Llosa, this study reveals how the spread of Western modernity--materially and culturally--has been shadowed by the destruction of traditional societies. These novels focus on the individual tragedies of those who represent pre-modern ways of life; in the process, offering a corrective to Hegel's abstruse philosophy of history. From rural Victorian England to the Malay Archipelago, and from the Igbo heartland in Africa to the backlands of Brazil, a global narrative unfolds, one where the forces of modernization clash with the defenders of traditional society. Moses contributes to the ongoing debate on Alexandre Kojève and the "end of history", while, at the same time, moving beyond sterile oppositions--canonical versus non-canonical works, formal literary criticism

versus political/historical critique. With its new conceptualization of modernity and globalization, this book will interest the literary scholar, cultural critic, social scientist, and political theorist.

The Empire in the Twenty-First Century  
Rowman & Littlefield

Argues that when globalization brings together foreign cultures, it allows the free exchange of cultural ideas and language, without allowing one or the other to dominate and overwhelm the native culture of the other.

*The Cultural Economy* SAGE

Since 9-11-01, misunderstandings and stereotypical judgments between the West and the Arab states have become increasingly evident. This clear, useful book blends economics, politics, and history to provide insights into different perspectives of Western and Arab Cultures regarding globalization, presenting a spectrum of opinions and beliefs on each side, with particular attention to the psychology of Arab decision-makers. Too many people hold uninformed opinions without understanding the expectations, the fears, and the concerns of the stakeholders. The Threat of Globalization

to Arab Islamic Culture will bring about a more defined comprehension of the issues involved with globalization.

*Contemporary Conditions for* Routledge

Now fully revised and updated, this seminal text asks if there is cultural life after the "clash of civilizations" and global McDonaldization. Jan Nederveen Pieterse argues that what is taking place is a global culture of hybridization. In a new chapter, the author explores East-West hybridities—the idea that globalization is a process of braiding rather than simply a diffusion from developed to developing countries. His historically deep and geographically wide approach to globalization is essential reading as we face the spread of conflicts bred by cultural misunderstanding.

**Russian Culture in the Age of**

**Globalization** Univ of California Press

'Many Globalizations' is an attempt to account for the cultural impact of globalisation in the lives of ordinary citizens from ten countries. The results of the study portray vast numbers of people intermixing participation in a global economy with indigenous values and lifestyles.

### Understanding Cultural Globalization

Yale University Press

The original articles presented in this anthology reflect a world changed by globalization, and an anthropology committed to documenting the effects of the vast cultural flows of people, information, goods, and technology, now in motion the world over. The editors write an introduction to the topic of cultural change, and each of the fifteen anthropologists in the anthology take students on a return visit to their original field sites, asking questions for a new era and writing of peoples to some extent familiar, but at the same time changed, transformed by global forces. A "Fieldwork Bio" on the researcher begins each chapter, and together they document four main dimensions in culture change including: challenges to identity and power; changing gender hierarchies; new patterns of migration and mobility; and the effects of economic change and modernization.

*Race, Place and Globalization* John Wiley & Sons

A stimulating appraisal of a crucial contemporary theme, this comprehensive

analysis of globalizatn offers a distinctively cultural perspective on the social theory of the contemporary world. This perspective considers the world as a whole, going beyond conventional distinctions between the global and the local and between the universal and the particular. Its cultural approach emphasizes the political and economic significance of shifting conceptions of, and forms of participation in, an increasingly compressed world. At the same time the book shows why culture has become a globally contested issue - why, for example, competing conceptions of 'world order' have political and economic consequences.

*Cultural Dimensions of Globalization* NYU Press

Edited by one of the most prominent scholars in the field and including a distinguished group of contributors, this collection of essays makes a striking intervention in the increasingly heated debates surrounding the cultural dimensions of globalization. While including discussions about what globalization is and whether it is a meaningful term, the volume focuses in

particular on the way that changing sites—local, regional, diasporic—are the scenes of emergent forms of sovereignty in which matters of style, sensibility, and ethos articulate new legalities and new kinds of violence. Seeking an alternative to the dead-end debate between those who see globalization as a phenomenon wholly without precedent and those who see it simply as modernization, imperialism, or global capitalism with a new face, the contributors seek to illuminate how space and time are transforming each other in special ways in the present era. They examine how this complex transformation involves changes in the situation of the nation, the state, and the city. While exploring distinct regions—China, Africa, South America, Europe—and representing different disciplines and genres—anthropology, literature, political science, sociology, music, cinema, photography—the contributors are concerned with both the political economy of location and the locations in which political economies are produced and transformed. A special strength of the collection is its concern with emergent styles of subjectivity,

citizenship, and mobilization and with the transformations of state power through which market rationalities are distributed and embodied locally. Contributors. Arjun
