"Barnow, Trutko, and Piatak focus on whether persistent occupation-specific labor shortages might lead to inefficiencies in the U.S. economy. They describe why shortages arise, the difficulty in

ascertaining that a shortage is present, and how to assess strategies to alleviate the shortage. Four occupations are used as test cases: 1) special education teachers, 2) pharmacists, 3) physical therapists, and 4) home health and personal care aides. For each of these occupations the authors summarize evidence that reveals whether it is currently or has recently experienced a labor shortage and suggest possible ways to alleviate the shortage if it is present. The authors close with a chapter discussing their conclusions and potential uses for occupational shortage data, including in helping determine immigration policy.

They also discuss the limited nature of the occupational data currently collected by the Bureau of Labor Statistics and how the federal and state governments could expand their data collection efforts to assist policy formation."--Publisher's website

Journal of the Assembly, Legislature of the State of California Informing Science

This book provides the reader with an overview of the evolution of career and technical education in California over the 20th century and some insight as to its strengths and weaknesses as well as the challenges it faces in the new millennium. This book delves into why career and technical education/vocational education are so important and needed in California's public schools. Among the things it looks at are "What is vocational education?" "What are the benefits of

vocational education, and in particular, to the student?" and "Why does California need vocational education?" Section one of this book discusses the historical foundation of career and technical education in California starting from the beginning of 1900 to 2000. Section two contains research on the 21st century workforce and the community college's CTE programs and role in the economy. This book provides a forum and voice for scholars in California. It allows us to learn and understand how career and technical education was viewed at the beginning of its foundation, its curriculum, and its impact on the California labor force today. It also looks at

the labor market disadvantages we are facing due to lack of proper structures in the CTE programs across the State.

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years

as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say.

Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when

- coworkers push their work on you—then take credit for it
- you accidentally trash-talk someone in an email then hit “reply all”
- you're being micromanaged—or not being managed at all
- you catch a colleague in a lie
- your boss seems unhappy with your work
- your cubemate's loud speakerphone is making you homicidal
- you got drunk at the

holiday party

Praise for *Ask a Manager* “A must-read for anyone who works . . .
