---

*38th Annual Meeting of the International  
Institute of Ammonia Refrigeration (IIAR  
2016)* Springer

The book focuses on original approaches intended to support the development of biologically inspired cognitive architectures. It bridges together different disciplines, from classical artificial intelligence to linguistics, from neuro- and social sciences to design and creativity, among others. The chapters, based on contributions presented at the Ninth Annual Meeting of the BICA Society, held in on August 23-24, 2018,

in Prague, Czech Republic, discuss emerging methods, theories and ideas towards the realization of general-purpose humanlike artificial intelligence or fostering a better understanding of the ways the human mind works. All in all, the book provides engineers, mathematicians, psychologists, computer scientists and other experts with a timely snapshot of recent research and a source of inspiration for future developments in the broadly intended areas of artificial intelligence and biological inspiration.

### **36th Annual Meeting and Scientific Sessions** IOS Press

"Polyvocal Professional Learning through Self-Study Research illustrates the power

of “we” for innovative and authentic professional learning. The 33 contributors to this book include experienced and emerging self-study researchers, writing in collaboration, across multiple professions, academic disciplines, contexts, and continents. These authors have noted and reviewed each other’s chapters and adapted their contributions to generate a polyvocal conversation that significantly advances scholarship on professional learning through self-study research. Building on, and extending, the existing body of work on self-study research, the book offers an extensive and in-depth scholarly exploration of the how, why, and impact of professional learning through context-specific, practitioner-led inquiry. The chapters illustrate polyvocal professional

learning as both phenomenon and method, with the original research that is presented in every chapter adding to the forms of methodological inventiveness that have been developed and documented within the self-study research community. “This unique book represents an inspiring step forward in self-study research. Authors from various continents provide evidence of how the “I” can be strengthened through the “we” perspective, showing convincingly how polyvocality, transdisciplinarity, and an intercultural approach deepen professional learning. This powerful book offers important new insights for the methodology of self-study, with an impact beyond teachers and teacher educators.” Fred A. J. Korthagen, Professor Emeritus at Utrecht University,

The Netherlands “A fascinating set of chapters illustrate the importance of many lenses and many voices when studying one’s practice. Each chapter testifies that self-study and its ties to improvement through posing thoughtful questions, collecting and analyzing relevant data, and interrogating the interpretation of one’s analysis of self are global and cross-disciplinary. This book is a must-read!” Renée T. Clift, Professor and Associate Dean, University of Arizona, USA”

Public ownership is more widespread and popular in the United States than is commonly understood. This book is the most comprehensive and up-to-date analysis of the scope and scale of U.S.

public ownership, debunking frequent misconceptions about the alleged inefficiency and underperformance of public ownership and arguing that it offers powerful, flexible solutions to current problems of inequality, instability, and unsustainability—explaining why after decades of privatization it is making a comeback, including in the agenda of Jeremy Corbyn’s Labour Party in Britain. Hanna offers a vision of deploying new forms of democratized public ownership broadly, across multiple sectors, as a key ingredient of any next system beyond corporate capitalism. This book is a valuable, extensively researched resource that sets out the past record and future possibilities of public ownership at a time when ever more

people are searching for answers.  
TMS 2016 Supplemental Proceedings  
John Wiley & Sons  
The 2016 Annual Meeting will be held at the Marriott Wardman Park located in a charming neighborhood in the heart of Washington, DC. We hope to build on the tremendous success of the 2015 Nice meeting, the best attended meeting in the Society's history. We plan a traditional meeting schedule, opening on Wednesday and closing on Saturday. The format of the Washington meeting will be similar to previous meetings, beginning with a day of pre-meeting symposia on Wednesday morning and closing mid-day Saturday. The majority of the meeting will be devoted to submitted content. In anticipation of contributions of high quality, novel

scientific work, we plan to run concurrent oral sessions to showcase the highest scoring abstracts and mini-oral sessions and general poster sessions are planned to share other excellent submitted work with our members.

Polyvocal Professional Learning through Self-Study Research  
This book presents the proceedings of the 24th European Conference on Artificial Intelligence (ECAI 2020), held in Santiago de Compostela, Spain, from 29 August to 8 September 2020. The conference was postponed from June, and much of it conducted online due to the COVID-19 restrictions. The conference is one of the principal

occasions for researchers and practitioners of AI to meet and discuss the latest trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology. The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence (PAIS 2020) held at the same time. A record number of more than 1,700 submissions was received for ECAI 2020, of which 1,443 were reviewed. Of these, 361 full-papers and 36 highlight papers were accepted (an acceptance rate of 25% for full-papers and 45% for highlight papers). The book is divided into three sections: ECAI full papers; ECAI highlight papers; and PAIS papers. The topics of these papers cover all aspects of AI, including

Agent-based and Multi-agent Systems; Computational Intelligence; Constraints and Satisfiability; Games and Virtual Environments; Heuristic Search; Human Aspects in AI; Information Retrieval and Filtering; Knowledge Representation and Reasoning; Machine Learning; Multidisciplinary Topics and Applications; Natural Language Processing; Planning and Scheduling; Robotics; Safe, Explainable, and Trustworthy AI; Semantic Technologies; Uncertainty in AI; and Vision. The book will be of interest to all those whose work involves the use of AI technology.

November 2016** Springer

The TMS 2016 Annual Meeting Supplemental Proceedings is a collection of papers from the TMS 2016 Annual Meeting & Exhibition, held February 14-18 in Nashville, Tennessee, USA. The papers in this volume represent 21 symposia from the meeting. This volume, along with the other proceedings volumes published for the meeting, and archival journals, such as Metallurgical and Materials Transactions and Journal of Electronic Materials, represents the available written record of the 67 symposia held at TMS2016. This proceedings volume contains both

edited and unedited papers; the unedited papers have not necessarily been reviewed by the symposium organizers and are presented “as is.” The opinions and statements expressed within the papers are those of the individual authors only, and no confirmations or endorsements are intended or implied.

**Third Chemical Congress of North  
America, Toronto, Canada, June  
5-10, 1988** UNESCO Publishing

This book constitutes the proceedings of the 20th Annual Conference on Research in Computational Molecular Biology, RECOMB 2016, held in Santa Monica, CA, USA, in April 2016. The 15 regular papers presented in this volume were carefully reviewed and selected from 172 submissions. 20 short abstracts are

included in the back matter of the volume. They report on original research in all areas of computational molecular biology and bioinformatics.
