Youth courts, also known as teen courts & peer courts, are one of the fastest growing programs in the community justice movement. This Guide will equip juvenile justice agencies with baseline info. that will aid them in developing, implementing, & enhancing teen courts programs. Chapters: overview; organizing the community; legal issues;

developing a program purpose, goals, & objectives; determining a target population & designing a referral process; designing program services; developing a program model & procedures; recruiting, using, & training volunteers; examining human & financial resource issues; & program evaluation.

Nearly a century's worth of Scurlock photographs combine to form a searing portrait of black Washington in all its

guises—its challenges and its victories, its dignity and its determination.

Beginning in the early twentieth century and continuing into the 1990s, Addison Scurlock, followed by his sons, Robert and George, used their cameras to document and celebrate a community unique in the world, and a stronghold in the history and culture of the nation's capital. Through photographs of formal weddings, elegant cotillions, ballet studios, and quiet family life, the Scurlocks revealed a world in which the black middle class refused to be defined or held captive by discrimination. From its home on the vibrant U Street corridor, the Scurlock Studio gave us indelible images of leaders and luminaries, of high society and working class, of Washingtonians at work and at play. In

photograph after photograph, the Scurlocks captured an optimism and resiliency seldom seen in mainstream depictions of segregated society. Luminaries such as Duke Ellington, Ralph Bunche, Mary McLeod Bethune, Alain Locke, Martin Luther King, Jr., and Lois Mailou Jones testify to the intellectual and cultural vibrancy that was unique to Washington and an inspiration to the nation. Photographs of a Peoples Drugstore protest and Marian Anderson's Easter morning concert at the Lincoln Memorial remind us that the struggle for equality in black Washington began long before the civil rights movement of the 1960s. Offering a rich lens into our past, The Scurlock Studio and Black Washington is a powerful trigger of personal and historical memory.

The purpose of this volume is to publish policy and procedures for garrison mobile equipment (GME) issued by the Commandant of the Marine Corps (CMC). This Manual provides administrative and technical instructions, policies, and procedures for all personnel involved in the management of procurement, operation, and maintenance of GME.

Today, Boston is in a uniquely powerful

position to make our city more affordable, equitable, connected, and resilient. We will seize this moment to guide our growth to support our dynamic economy, connect more residents to opportunity, create vibrant neighborhoods, and continue our legacy as a thriving waterfront city. Mayor Martin J. Walsh's Imagine Boston 2030 is the first citywide plan in more than 50 years. This vision was shaped by more than 15,000 Boston voices.

PEM Water Electrolysis, a volume in the Hydrogen Energy and Fuel Cell Primers series presents the most recent advances in the field. It brings together information that has thus far been scattered in many different sources

under one single title, making it a useful reference for industry professionals, researchers and graduate students. Volumes One and Two allow readers to identify technology gaps for commercially viable PEM electrolysis systems for energy applications and examine the fundamentals of PEM electrolysis and selected research topics that are top of mind for the academic and industry community, such as gas cross-over and AST protocols. The book lays the foundation for the exploration of the current industrial trends for PEM electrolysis, such as power to gas application and a strong focus on the current trends in the application of PEM electrolysis associated with energy storage. Presents the fundamentals and most current knowledge in proton

exchange membrane water electrolyzers
Explores the technology gaps and challenges for commercial deployment of PEM water electrolysis technologies
Includes unconventional systems, such as ozone generators
Brings together information from many different sources under one single title, making it a useful reference for industry professionals, researchers and graduate students alike

This book presents multiple new and classical methods for studying the vital poly-ADP-ribose (pADPr) pathway. Beginning with techniques for the detection and quantification of the product of poly(ADP-ribose) polymerase (PARP) enzymatic activity and detection of variation in pADPr production during the cell cycle, the volume continues with sections on the identification of pADPr protein acceptors, methods focusing on studying molecular mechanisms of PARP functions in eukaryotic cells, particularly those involved in control of DNA repair and oxidative stress, as well as in expression regulation, approaches to the in vitro reconstitution of PARP-1 interaction with chromatin, the

development and testing of small molecule PARP inhibitors, and the functions of understudied members of PARP family. Written for the highly successful *Methods in Molecular Biology* series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, *Poly(ADP-Ribose) Polymerase: Methods and Protocols, Second Edition* serves as an ideal companion to the first edition for scientists whose investigations involve this important pathway. The chapter
