3rd Century BC to 6th Century AD : a Critical Study Taylor & Francis

A classic guide to the life of service and meditation practiced by Buddhist monks. Walpola Rahula's *What the Buddha Taught* is a perennial backlist bestseller and has proven to be an indispensable guide to beginning Buddhism. It is renowned for its authoritative, clear, logical, and comprehensive approach. *The Heritage of the Bhikkhu* is a vivid account of the Buddhist's monk's role as a servant to people's needs as a follower and teacher of the basic Buddhist principles. In this fascinating and informative volume, the author emphasizes Buddhism as a practical doctrine for daily living and spiritual perfection and not simply a monastic discipline. *The Heritage of the Bhikkhu* is a pioneering work that deserves to stand with the author's earlier masterpiece.

Buddhism and Gandhara Taylor & Francis

This volume cross-examines the stability of heritage as a concept. It interrogates the past which materialises through multi-layered narratives on monuments and other objects that sustain cultural diversity. It seeks to understand how interpretations of "monuments" as "texts" are affected at the local level of experience, even as institutions such as UNESCO work to globalise and fix constructs of stable and universal heritage. Shifting away from a largely Eurocentric concept associated with architecture and monumental archaeology, this book reassesses how local and regional heritage needs to be balanced with the global and transnational. It argues that material objects and monuments are not static embodiments of culture but are, rather, a medium through which identity, power and society are produced and reproduced. This is especially relevant in South and Southeast Asian contexts, where debates over heritage often have local, regional and national political implications and

consequences. Reevaluating how traditional valuation of monuments and cultural landscapes could help aid sustainability and long-term preservation of the heritage, this book will be useful for scholars and researchers of South and Southeast Asian history, heritage studies, archaeology, cultural studies, tourism studies and political history as well.

An introduction to the art of ancient India that traces major trends in artistic form and profiles key artists from prehistoric time to the period of Muslim rule.

Legends, Monasteries, and Paradise Weatherhill, Incorporated
Battling the Buddha of Love is a work of advocacy anthropology that explores the controversial plans and practices of the Maitreya Project, a transnational Buddhist organization, as it sought to build the "world's tallest statue" as a multi-million-dollar "gift" to India. Hoping to forcibly acquire 750 acres of occupied land for the statue park in the Kushinagar area of Uttar Pradesh, the Buddhist statue planners ran into obstacle after obstacle, including a full-scale grassroots resistance movement of Indian farmers working to "Save the Land." Falcone sheds light on the aspirations, values, and practices of both the Buddhists who worked to construct the statue, as well as the Indian farmer-activists who tirelessly protested against the Maitreya Project. Because the majority of the supporters of the Maitreya Project statue are converts to Tibetan Buddhism, individuals Falcone terms "non-heritage" practitioners, she focuses on the spectacular collision of cultural values between small agriculturalists in rural India and transnational Buddhists hailing from Portland to Pretoria. She asks how could a transnational Buddhist organization committed to compassionate practice blithely create so much suffering for impoverished rural Indians. Falcone depicts the cultural logics at work on both sides of the controversy, and through her examination of these logics she reveals the divergent, competing visions of Kushinagar's potential futures. *Battling the Buddha of Love* traces power, faith, and hope through the axes of globalization, transnational religion, and rural grassroots activism in South Asia, showing the unintended local consequences of an international spiritual development project.

The Cultural Heritage of India.... Oxford University Press

This multilayered historical ethnography of Bodh Gaya ♦ the place of Buddha ♦s enlightenment in the north Indian state of Bihar ♦ explores the spatial politics surrounding the transformation of the Mahabodhi Temple Complex into a UNESCO World Heritage site in 2002. The rapid change from a small town based on an agricultural economy to an international destination that attracts hundreds of thousands of Buddhist pilgrims and visitors each year has given rise to a series of conflicts that foreground the politics of space and meaning among Bodh Gaya ♦s diverse constituencies. David Geary examines the

modern revival of Buddhism in India, the colonial and postcolonial dynamics surrounding archaeological heritage and sacred space, and the role of tourism and urban development in India.

The Return of the Buddha traces the development of Buddhist archaeology in colonial India, examines its impact on the reconstruction of India's Buddhist past, and the making of a public and academic discourse around these archaeological discoveries. The book discusses the role of the state and modern Buddhist institutions in the reconstitution of national heritage through promulgation of laws for the protection of Buddhist monuments, acquiring of land around the sites, restoration of edifices, and organization of the display and dissemination of relics. It also highlights the engagement of prominent Indian figures, such as Nehru, Gandhi, Ambedkar, and Tagore, with Buddhist themes in their writings. Stressing upon the lasting legacy of Buddhism in independent India, the author explores the use of Buddhist symbols and imagery in nation-building and the making of the constitution, as also the recent efforts to resurrect Buddhist centers of learning such as Nalanda. With rich archival sources, the book will immensely interest scholars, researchers and students of modern Indian history, culture, archaeology, Buddhist studies, and heritage management.

The "monumental bias" of Buddhist archaeology has hampered our understanding of the socio-religious mechanisms that enabled early Buddhist monks to establish themselves in new areas. To articulate these relationships, Shaw presents here the first integrated study of settlement archaeology and Buddhist history, carried out in the area around Sanchi, a Central Indian UNESCO World Heritage site. Her comprehensive, data-rich, and heavily illustrated work provides an archaeological basis for assessing theories regarding the dialectical relationship between Buddhism and surrounding lay populations. It also sheds light on the role of the introduction of Buddhism in changing settlement patterns. This volume was originally published in 2007 by the British Association of South Asian Studies.

Buddhist Heritage of Orissa South Asia Books

The state of Odisha, in eastern India, is home to a unique concentration of images of deities and symbols dating from the earlier days of Tantric Buddhism up to the later developments of Vajrayana. Could Odisha be Oddiyana, the mythical kingdom from which Vajrayana is said to originate? This essay on one aspect of the history of Tantric Buddhism in South Asia tries to answer this question within the larger frame of the development of Buddhism in India. Going against some received ideas, it also exposes the role played by Buddhism in the birth of Hinduism. It concludes with an examination of the Buddhist heritage in contemporary Indian religious movements. This volume contains excerpts from The Accomplishment of Wisdom, by King Indrabodhi, as well as the integrality of the Accomplishment of Non-Duality, by Princess Lakshminakara, both translated exclusively from the original Sanskrit texts for the first time.

This book presents new studies on intellectual and cultural interactions in the context of Buddhist heritage and Indo-Japanese dialogue in the late 19th and early 20th centuries on art, religion, and cultural politics. By revisiting Buddhist connections between

India and Japan, it examines the pathways of communication on common aesthetic and religious heritage that emerged in the backdrop of colonial experiences and the rise of Asian nationalisms. The volume discusses themes such as Asian arts and crafts under colonialism, formation of East Asian art collections, development of Buddhist art history in Japan, Japanese encounters with Ajanta, India in the history of the Shinto tradition, Japan in India's xenology, and Buddhism and world

peace, and suggests paradigms of reconnecting cultural heritage within a global platform. With essays from experts across the world, this book will be an essential read for scholars and researchers of history, art history, ancient Indian history, colonial history, heritage and cultural studies, South Asian and East Asian history, visual and media studies, Asian studies, international relations and foreign policy, and the history of globalization.
