### **The Future of Nursing**

**2020-2030** National  
Academies Press

"There are many policy books, but none are written by APRNs or focus just on APRN practice. This topic is critical in today's healthcare reform movement. APRNs are at the core, or can be, if they use their practice knowledge and education to shape policy...[The] editors eloquently make the case that policy formation is a critical nursing skill."--Doody's Medical Reviews  
iGaining a better understanding of the political landscape and its impact on nursing and the APRN practice environment, by learning through textbooks such as this, and then through active involvement at any level in the political process itself, can only strengthen nursing and its influence on health policy.  
-Loretta C. Ford, RN,

EdD, PNP, FAAN, FAANP  
From the Foreword This view of health policy from the perspective of APRN practice is a call to action for advanced practice nurses to learn about the impact and implications of current initiatives in health policy. This knowledge will assist them in determining how they define and create positive change for their patients and have an impact on community, national, and world health. This is the only text that satisfies the need for policy discussions for all APNs , it is designed to meet the requirements of both the IOM report on The Future of Nursing and the DNP criteria V for inclusion of health policy and advocacy in the curriculum. The text encompasses evolving health care policy and reform in the U.S., Canada, and internationally, addressing its impact on advanced practice nursing, APRN roles, care for special populations, health care quality, and patient safety . The book

brings together a wealth of information written by luminaries in the field. Dr. Goudreau is a Past President, and Board Member of the National Association of Clinical Nurse Specialists (NACNS), and Dr. Smolenski was Director of Certification Services at the ANCC for 11 years, directing certification for 150,000 nurses in over 30 specialties. The text discusses issues surrounding the regulation of APRNs, how the local regulatory environment shapes their practice and how they can shape their local regulatory environment. Additionally, the text brings in international perspectives on how APRNs can and are impacting patient care globally. In order to provide content relevant to a universal APRN readership, each section of the text endeavors to present information from all four APRN perspectives: NPs, CNSs, CRNAs , and CNMs. For all of these roles, the book covers the implications of current and future health

policy changes for APRN practice. Key Features: Addresses the role-specific policy informational needs of all APRN roles including NPs, CNSs, CRNAs , and CNMs Brings together in one volume all of the requisite information about health care policy and reform and its impact on advanced practice nursing Meets the requirements of the IOM report on The Future of Nursing and the DNP criteria V for inclusion of health policy and advocacy in the curriculum Offers guidance on how APRNs can influence policy development Covers impact and implications of health care policy and reform in the U.S., Canada, and internationally

*Leadership and Systems Improvement for the DNP*  
National Academies Press  
The first text to address the CNL role and the wider scope of nursing leadership This is the first text to address not only the Clinical Nurse Leader role but also the wider scope of nursing leadership through the lens of the Clinical Nurse Leader. Written for CNL programs in the US and beyond, the book is organized according to the test blueprint of the AACN's content outline for the latest CNL certification exam. By virtue of its expansive coverage of nursing leadership beyond the CNL--case managers, clinical educators, quality improvement specialists, and many other arenas--the text will also be a valuable addition to other nursing leadership programs. The text examines APRN/CNL leadership trends, types

of leadership, health care advocacy, role implementation and integration, lateral integration of care services, and ethical nurse leadership. It broadly addresses patient assessment and clinical outcomes management, and covers the many facets of the care environment, from organizational structure to risk management to health care informatics and technology. Chapter objectives, clinical examples, exemplars, and other resources facilitate information retention. The text also serves as an authoritative study guide for CNL certification exam preparation. Key Features: Serves as the only text specifically designed to address the CNL role Encompasses the wider scope of nursing leadership beyond the CNL role Follows the most recent CNL Certification text blueprint, making it an ideal resource for test preparation Facilitates in-depth understanding of material with chapter objectives, exemplars, and clinical examples  
**Evaluation of Health Care Quality for DNPs, Second Edition** Springer Publishing Company  
Second Edition rewarded First Place AJN Award! The

only policy text written specifically for APRN students, this preeminent resource delivers a sweeping examination of policy impact on the full implementation of the APRN role across all environments, including its effectiveness on specific patient populations. The expanded third edition—containing six new chapters—includes expanded information on policy analysis, nursing roles, and the impact of technology. It provides practical knowledge on developing policy to advocate for vulnerable populations—bolstered by case examples—and discusses how interprofessional education has changed and will continue to alter health policy in the United States and internationally. Additionally, the text discusses the evolving influence of the Patient Protection Affordable Care Act (PPACA) and the implications of current and future health policy changes as they affect APRN practice. New doctoral-level content adds to the book's relevance for DNP students. The text addresses the initiative within nursing for Full Practice Authority for all

APRNs, which enables them to practice to the full extent of their educational preparation. Edited by experienced APRN leaders who have been closely involved with health policy development, the text meets the requirements of the IOM report on The Future of Nursing and the DNP criteria V for the inclusion of health policy and advocacy in the curriculum. This "call to action" for APRNs is specifically designed for courses serving a variety of APRN trajectories and includes content from all APRN role perspectives in every section. New to the Third Edition: Encompasses six completely new chapters covering Health Policy Effects on Health Systems, Telehealth, Pediatrics, Quality Initiatives, Patient Protection, and more! Expanded to include developing roles, environments, and populations pertinent to APRNs and DNP students Includes new information on policy development advocating for vulnerable populations Updated to reflect the latest national nursing policy initiatives Incorporates 2020 revised AACN Essentials and Future of Nursing Report

2030 Includes new case studies and more practical application of content Key Features: Chapters include Discussion Questions; Analysis, Synthesis, and Clinical Application; Exercises/Considerations; and Ethical Considerations Explains how and why APRNs can and should influence policy development Discusses implications of not participating in health policy decisions *Nursing Knowledge and Theory Innovation* Springer Publishing Company The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in

improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing. DNP Capstone Projects Springer Publishing Company The Doctor of Nursing Practice: A Guidebook for Role Development and Professional Issues, Third Edition is a comprehensive guidebook for role development of

the DNP student. This text covers potential roles of the DNP graduate, including leader, clinician, educator, ethical consultant, and health policy advocate. The Third Edition also addresses professional issues, such as the title of doctor, educating others about the degree, making the decision to pursue the DNP degree and marketing oneself as a DNP. The future of the DNP degree is also discussed. New Features: -New Chapter on the DNP graduate as information specialist -New Chapter on issues pertaining to the BSN to DNP track - Updated interviews with a focus on leadership
