on auditing procedures  
and techniques, the text  
has been thoroughly  
revised and updated, and  
is completely oriented to  
the practical application  
of computers in the field  
of auditing. It addresses

five major issues in this  
area that have imposed  
change on the auditing  
environment: use of  
computer systems by  
audit clients; types of  
computer-based systems  
used by audit clients;  
form of working papers  
used in general practice;  
student knowledge of  
automated systems; and  
integration of automated  
systems into the review  
questions, problems, and  
cases. Students will learn  
not only auditing  
procedures, but also how  
to analyze data.

The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at

the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet.
