Crossing Borders, Crossing Cultures

Gospel Women and the Long Ending of Mark

Libraries and archives contain many thousands of early modern mathematical books, of which almost equally many bear readers' marks, ranging from deliberate annotations and accidental blots to corrections and underlinings. Such evidence provides us with the material and intellectual tools for exploring the

nature of mathematical reading and the ways in which mathematics was disseminated and assimilated across different social milieus in the early centuries of print culture. Other evidence is important, too, as the case studies collected in the volume document. Scholarly correspondence can help us

understand the motives and difficulties in producing new printed texts, library catalogues can illuminate collection practices, while manuscripts can teach us more about textual traditions. By defining and illuminating the distinctive world of early modern mathematical reading, the volume seeks to close the gap between the history of mathematics as a history of texts and history of mathematics as part of the broader history of human culture.

Driver intended this volume to provide insight toward the philology and textual criticism of the Old Testament. He regarded Samuel as an excellent field for training the intermediate Hebrew student in the uses of Hebrew idiom. Driver also regarded the books of Samuel as filled with transcriptional corruption, thus quite appropriate for introduction to the grounds and principles of textual criticism.

Tyndale House Publishers, Inc.

This volume explores the challenges and possibilities of research into the European dimensions of popular print culture. Popular print culture has

traditionally been studied with a national focus. Recent research has revealed, however, that popular print culture has many European dimensions and shared features. A group of specialists in the field has started to explore the possibilities and challenges of research on a wide, European scale. This volume contains the first overview and analysis of the different approaches, methodologies and sources that will stimulate and facilitate future comparative research. This volume first addresses the benefits of a media-driven approach, focussing on processes of content recycling, interactions between text and image, processes of production and consumption. A second perspective illuminates the distribution and markets for popular print, discussing audiences, prices and collections. A third dimension refers to the transnational dimensions of genres, stories, and narratives. A last perspective unravels the communicative strategies and dynamics behind European bestsellers. This book is a source of inspiration for everyone who is interested in research into transnational cultural exchange and in the fascinating history of popular print culture in Europe.

pt. 1. Genesis-Deuteronomy Penguin

This is an edition of the Hieroglyphic inscriptions of the Late Hittite states of Turkey and Syria. These inscriptions, surviving largely on stone, include monuments of kings to their reigns and works as well as the humbler memorials of subordinates. A few precious survivals of documents in the form of lead strips give us a different type of document: letters and economic texts. Recent discoveries have improved the decipherment and understanding of these inscriptions to a point where new and comprehensive translations can be offered, and the presentation of this in English will make them available for the first time to the wide audience of the English-speaking world. At the same time we are in a position to present more reliable texts than those which have appeared in editions hitherto regarded as standard.

For the past eight hundred years, the study of Confucian doctrine has been largely dominated by the crucial works known as the “Four Books”: the Analects, the Mencius, the Daxue, and the Zhongyong. In their original forms, the Daxue and Zhongyong were two of the more than forty chapters of the larger Li ji (Book of Rites), only gaining prominence

thanks to the Song Neo-Confucian scholar Zhu Xi. In this groundbreaking text, Ian Johnston and Wang Ping have translated both of these versions of the Daxue and Zhongyong, one version as chapters of the Li ji that contain the influential commentary and notes of Zheng Xuan and Kong Yingda, and the second after they were reorganized into standalone works and reinterpreted by Zhu Xi. Johnston and Wang also include extensive explanatory and supplemental materials to help contextualize and familiarize readers with these supremely influential works.

A dual-language edition of Japanese stories—many appearing in English for the first time. This volume of eight short stories, with parallel translations, offers students at all levels the opportunity to enjoy a wide range of contemporary literature without having constantly to refer back to a dictionary. The stories—many of which appear here in English for the first time—are by well-known writers like Haruki Murakami and

Banana Yoshimoto, as well as emerging voices like Abe Kazushige, Ishii Shinji, and Kawakami Hiromi. From the orthodox to the cutting-edge, they represent a range of styles and themes, showcasing the diversity of Japanese fiction over the past few decades in a collection that is equally rewarding for beginning, intermediate, and advanced students of English or Japanese. Complete with notes, the stories make excellent reading in either language.

Through the real-life context of one child learning to be bilingual and biliterate, this book raises questions and provides a context for pre-service and practicing teachers to understand and reflect on how children learn to read and write in multiple languages. Highlighting the social and cognitive advantages of biliteracy, its purpose is to help teachers better understand the complexity by which young children become biliterate as they actively construct meaning and work through tensions resulting from their everyday life circumstances. Perspectives regarding identity and language ideologies are presented to help teachers refine their own pedagogical approaches to teaching linguistically diverse children. Readers are engaged in understanding early biliteracy through a process of articulating and questioning their own assumptions and beliefs about learning in multiple languages and literacies.
