Living in Democracy

Simon and Schuster

A gripping behind-the-scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war On July 17, 2018,

starting an unjust war became a prosecutable international crime alongside genocide, crimes against humanity, and war crimes. Instead of collective state responsibility, our leaders are now personally subject to indictment for crimes of aggression, from invasions and preemptions to drone strikes and cyberattacks.

The Crime of Aggression is Noah Weisbord's riveting insider's account of the high-stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start. Weisbord, a key drafter of the law for the International Criminal Court, takes readers behind the scenes of one of the most consequential

legal dramas in modern international diplomacy. Drawing on in-depth interviews and his own invaluable insights, he sheds critical light on the motivations of the prosecutors, diplomats, and military strategists who championed the fledgling prohibition on unjust war—and those who tried to sink it. He untangles the complex history behind the measure, tracing how the crime of aggression was born at the Nuremberg trials only to fall dormant during the Cold War, and

he draws lessons from such pivotal events as the collapse of the League of Nations, the rise of the United Nations, September 11, and the war on terror. The power to try leaders for unjust war holds untold promise for the international order, but also great risk. In this incisive and vitally important book, Weisbord explains how judges in such cases can balance the imperatives of justice and peace, and how the fair prosecution of aggression can humanize modern statecraft.

### The Death of Punishment

Larousse Kingfisher  
Chambers

Drawing on his personal fascinating story as a prosecutor, a defendant, and an observer of the legal process, Paul Butler offers a sharp and engaging critique of our criminal justice system. He argues against discriminatory drug laws and excessive police power and shows how our policy of mass incarceration erodes communities and perpetuates crime. Controversially, he

supports jury nullification—or voting “not guilty” out of principle—as a way for everyday people to take a stand against unfair laws, and he joins with the “Stop Snitching” movement, arguing that the reliance on informants leads to shoddy police work and distrust within communities. Butler offers instead a “hip hop theory of justice,” parsing the messages about crime and punishment found in urban music and culture. Butler’s argument is powerful, edgy, and

incisive.

**In the Cause of Peace**  
Routledge

Franz Kafka’s vision of the Law in “The Trial” is so strange, arbitrary, and unjust that it would seem to be the antithesis of our own. Yet, that is what makes Robert Burns’ latest book so compelling. Robert Burns brilliantly shows that Kafka’s masterpiece provides an uncanny lens through which to see and understand the American criminal justice system today. It provokes a shock of recognition that makes

us see it in a very different light. Assuming no prior knowledge of Kafka’s book, Burns tells the story, at once funny and grim, of Josef K., caught in the Law’s grip and then crushed by it. Laying out the characteristics of Kafka’s Law, Burns argues that the American criminal justice system has taken on too many of those same qualities. In the overwhelming majority of cases, our system is composed of police interrogation followed by plea bargaining, where

the courts only function is but to set a sentence on an individual already determined to be guilty. Like Kafka's nightmarish vision, too much of our criminal law and procedure has become unknowable, ubiquitous, and bureaucratic. It too has come to rely on deception in dealing with suspects and jurors, to limit the role of defense counsel, and to increasingly dispense justice without the protections of formal procedures. Burns compellingly explains how

and why we have become an increasingly punitive society. Finally, he takes up the question of whether we have the resources to change these Kafkaesque aspects of our criminal justice system and shows how the jury trial has that potential, but only if it is returned to a more central place in our system."

**Let's Get Free** Council of Europe

This book explores the way domestic courts contribute to the maintenance of the international of law by

providing judicial control over the exercises of public powers that may conflict with international law. The main focus of the book will be on judicial control of exercise of public powers by states. Key cases that will be reviewed in this book, and that will provide empirical material for the main propositions, include Hamdan, in which the US Supreme Court reviewed detention by the United States of suspected terrorists against the 1949 Geneva Conventions; Adalah, in

which the Supreme Court of Israel held that the use of local residents by Israeli soldiers in arresting a wanted terrorist is unlawful under international law, and the Narmada case, in which the Indian Supreme Court reviewed the legality of displacement of people in connection with the building of a dam in the river Narmada under the ILO Indigenous and Tribal Populations Convention 1957 (nr 107). This book explores what it is that international law requires, expects, or aspires that

domestic courts do. Against this backdrop it maps patterns of domestic practice in the actual or possible application of international law and determines what such patterns mean for the protection of the international rule of law. [World Economic Outlook, October 2018](#) Princeton University Press Global growth for 2018–19 is projected to remain steady at its 2017 level, but its pace is less vigorous than projected in April and it has become

less balanced. Downside risks to global growth have risen in the past six months and the potential for upside surprises has receded. Global growth is projected at 3.7 percent for 2018–19—0.2 percentage point lower for both years than forecast in April. The downward revision reflects surprises that suppressed activity in early 2018 in some major advanced economies, the negative effects of the trade measures implemented or approved between April and mid-September, as well as a

weaker outlook for some key emerging market and developing economies arising from country-specific factors, tighter financial conditions, geopolitical tensions, and higher oil import bills. The balance of risks to the global growth forecast has shifted to the downside in a context of elevated policy uncertainty. Several of the downside risks highlighted in the April 2018 World Economic Outlook (WEO)—such as rising trade barriers and a reversal of capital flows to

emerging market economies with weaker fundamentals and higher political risk—have become more pronounced or have partially materialized. Meanwhile, the potential for upside surprises has receded, given the tightening of financial conditions in some parts of the world, higher trade costs, slow implementation of reforms recommended in the past, and waning growth momentum. *Studime Historike* The New Press  
This is a manual for

teachers in Education for Democratic Citizenship (EDC) and Human Rights Education (HRE), EDC/HRE textbook editors and curriculum developers. Nine teaching units of approximately four lessons each focus on key concepts of EDC/HRE. The lesson plans give step-by-step instructions and include student handouts and background information for teachers. In this way, the manual is suited for trainees or beginners in the teaching profession and teachers who are receiving in-

service teacher training in EDC/HRE. The complete manual provides a full school year's curriculum for lower secondary classes, but as each unit is also complete in itself, the manual allows great flexibility in use. The objective of EDC/HRE is the active citizen who is willing and able to participate in the democratic community. Therefore EDC/HRE strongly emphasize action and task-based learning.

Walker Connor, perhaps the leading student of the origins and dynamics of ethnonationalism, has consistently stressed the importance of its political implications. In these essays, which have appeared over the course of the last three decades, he argues that Western scholars and policymakers have almost invariably underrated the influence of ethnonationalism and misinterpreted its passionate and nonrational qualities. Several of the essays have become classics:

together they represent a rigorous and stimulating attempt to establish a secure methodological foundation for the study of a complicated phenomenon increasingly, if belatedly, recognized as the major cause of global political instability. The book opens by reviewing a wide range of scholarship on ethnonationalism. Connor examines nineteenth- and early twentieth-century debate among British scholars on the viability and desirability of the multinational state, the

American "nation-building" school of thought that dominated the literature on political development in the post-World War II era, and the recent explosion of literature on ethnonationalism. In the second part of the book, he shows how progress in the study of ethnonationalism has been hampered by terminological confusion, an inclination to perceive homogeneity even where heterogeneity thrives, an unwarranted tendency to seek explanation for

ethnic conflict in economic differentials, and lack of historical perspective. The book closes with a consideration of the inherent limitations of rational inquiry into the realm of group-identity. National Courts and the International Rule of Law Canongate Books This book presents an overview of inter-municipal cooperation in eight European countries. Each country study sketches its attendant forms, their institutional design, the tasks and

competencies attributed to joint authorities of municipalities and the way inter-municipal cooperation operates in practice. Both performance and democratic aspects of cooperation are recurring topics. *Kosovakosovo.com* World Scientific Terrorism has become part of our daily news diet. Hardly a day goes by without news of an assassination, political kidnapping, hijacking, or bombing somewhere in the world. As such

incidents of terrorism have increased in the past decade, the phenomenon of terrorism has become one of increasing concern to governments and of increasing interest to scholars.

Basic Criminal Procedure: Cases, Comments and Questions - CasebookPlus

Oxford University Press

When teenagers scuffle during a basketball game, they are typically benched. But when Will got into it on the court, he and his rival were sprayed in the face at close range by a chemical similar to

Mace, denied a shower for twenty-four hours, and then locked in solitary confinement for a month. One in three American children will be arrested by the time they are twenty-three, and many will spend time locked inside horrific detention centers that defy everything we know about how to rehabilitate young offenders. In a clear-eyed indictment of the juvenile justice system run amok, award-winning journalist Nell Bernstein shows that there is no right way to lock up a child. The very

act of isolation denies delinquent children the thing that is most essential to their growth and rehabilitation: positive relationships with caring adults. Bernstein introduces us to youth across the nation who have suffered violence and psychological torture at the hands of the state. She presents these youths all as fully realized people, not victims. As they describe in their own voices their fight to maintain their humanity and protect their individuality in

environments that would deny both, these young people offer a hopeful alternative to the doomed effort to reform a system that should only be dismantled. *Burning Down the House* is a clarion call to shut down our nation's brutal and counterproductive juvenile prisons and bring our children home.

**Inter-Municipal Cooperation in Europe**

Oxford University Press, USA

This volume combines the efforts of leading practitioners and

academics in criminology to address the challenges of such persistent international problems as organized crime and illegal immigration. This book offers the most current and detailed account of new international cooperative initiatives.

An old woman is awoken in the dead of night by knocks at her front door.

The woman opens it to find her daughter, Doruntine, standing there

alone in the darkness. She has been brought home from a distant land by a mysterious rider she claims is her brother Konstandin. But unbeknownst to her, Konstandin has been dead for years. What follows is chain of events which plunges a medieval village into fear and mistrust. Who is the ghost rider?

"Constitution of the Republic of Kosovo" by Constitutional

Commission of the Republic of Kosovo. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks

that are user-friendly and accessible to everyone in a high-quality digital format.

*Ethics in Public Service for the New Millennium*

Routledge

"[This book provides a] history of special prosecutors in American politics. For more than a century, special prosecutors have struck fear into the hearts of presidents, who have the power to fire them at any time. How could this be, [the author] asks? And how could the nation entrust such a high

responsibility to such subordinate officials? [The author] demonstrates that special prosecutors can do much to protect the rule of law under the right circumstances. Many have been thwarted by the formidable challenges of investigating a sitting president and his close associates; a few have abused the powers entrusted to them. But at their best, special prosecutors function as catalysts of democracy, channeling an unfocused popular will to safeguard the rule of law. By raising

the visibility of high-level misconduct, they enable the American people to hold the president accountable. Yet, if a president thinks he can fire a special prosecutor without incurring serious political damage, he has the power to do so. Ultimately, [the author] concludes, only the American people can decide whether the President is above the law."--

Being Fair, Faring Better

This publication sets out the core competences needed by teachers to put democratic citizenship and human rights into practice in the classroom, throughout the school and in the wider community. It is intended for all teachers, not only specialists but teachers in all subject areas, and teacher educators working in higher-education institutions or other settings, both in pre- and in-service

training. Some 15 competences are presented and grouped into four clusters. Each cluster of competences corresponds to one chapter, within which the competences are described in detail and exemplified. The reader will find progression grids and suggested developmental activities for each competence: these grids, featuring focusing, developing, established and advanced practice, aim to help teachers and teacher educators determine the

level to which their professional practice corresponds, and thus identify specific and practical improvements upon which they can focus.

**The Enforcement of Intellectual Property Rights: A Case Book**

University of Chicago Press

This book offers an introductory guide for students to four centuries of diplomatic thought. Since diplomacy as we know it was created during the Renaissance in Italy, a number of major

figures have reflected on the place of diplomacy in foreign affairs and the problems associated with its pursuit. These include statesmen, international lawyers and historians, most of whom had experience as diplomats of the first or second rank. This book examines the thought of some of the most important of them, from Niccolò Machiavelli in the early sixteenth century to Henry Kissinger in the late twentieth century.

*Diplomatic Theory from Machiavelli to Kissinger*

The New Press  
Decision-making is a process of choosing from possible courses of action in order to attain goals and objectives. Nobel laureate Herbert Simon wrote that the whole process of managerial decision-making is synonymous with the practice of management. Decision-making is at the core of all managerial functions. Planning, for example, involves the following decisions: What should be done? When? How? Where? By whom? Other managerial

functions, such as organizing, implementing, and controlling, rely heavily on decision-making. Decision by Objectives is an invaluable book about the art and science of decision-making. It presents a very practical approach to decision-making that has a sound theoretical foundation, known as the analytic hierarchy process. Intended for both the student and the professional, the book includes approaches to prioritizing, evaluating

alternative courses of action, forecasting, and allocating resources. By focusing on objectives rather than alternatives alone, it shows the reader how to synthesize information from multiple sources, analyses, and perspectives. The methods presented have been gaining popularity throughout the world.

**Sourcebook on Criminal Law** New Press, The  
In many industrial applications, the existing constraints mandate the use of controllers of low

and fixed order while typically, modern methods of optimal control produce high-order controllers. The authors seek to start to bridge the resultant gap and present a novel methodology for the design of low-order controllers such as those of the P, PI and PID types. Written in a self-contained and tutorial fashion, this book first develops a fundamental result, generalizing a classical stability theorem – the Hermite–Biehler Theorem – and then applies it to

designing controllers that are widely used in industry. It contains material on: • current techniques for PID controller design; • stabilization of linear time-invariant plants

using PID controllers; • optimal design with PID controllers; • robust and non-fragile PID controller design; • stabilization of first-order systems with time delay; • constant-gain stabilization with desired damping •

constant-gain stabilization of discrete-time plants.
