Rotordynamics of automotive turbochargers is dealt with in this book encompassing the widely working field of small turbomachines under real operating conditions at the very high rotor speeds up to 300000 rpm. The broadly interdisciplinary field of turbocharger rotordynamics involves 1) Thermodynamics and Turbo-Matching of Turbochargers 2) Dynamics of Turbomachinery 3) Stability Analysis of Linear Rotordynamics with the Eigenvalue Theory 4) Stability Analysis of Nonlinear Rotordynamics with the Bifurcation Theory 5) Bearing Dynamics of the Oil Film using the Two-Phase Reynolds Equation 6) Computation of Nonlinear Responses of a Turbocharger Rotor 7) Aero and Vibroacoustics of Turbochargers 8) Shop and Trim Balancing at Two Planes of the Rotor 9) Tribology of the Bearing Surface Roughness 10) Design of Turbocharger Platforms using the Similarity Laws The rotor response of an automotive turbocharger at high rotor speeds is studied analytically, computationally, and experimentally. Due to the nonlinear characteristics of the oil-film bearings, some nonlinear responses of the rotor besides the harmonic response 1X, such as oil whirl, oil whip, and modulated frequencies occur in Waterfall diagram. Additionally, the influences of the surface roughness and oil characteristics on the rotor behavior, friction, and wear are discussed. This book is written by an industrial R&D expert with many years of experience in the automotive and turbocharger industries. The all-in-one book of turbochargers is intended for scientific and engineering researchers, practitioners working in the rotordynamics field of automotive turbochargers, and graduate students in applied physics and mechanical engineering.

This book presents selected peer-reviewed contributions from the 2019 International Conference on "Physics and Mechanics of New Materials and Their Applications", PHENMA 2019 (Hanoi, Vietnam, 7-10 November, 2019), divided into four scientific themes: processing techniques, physics, mechanics, and applications of advanced materials. The book describes a broad spectrum of promising nanostructures, crystals, materials and composites with special properties. It presents nanotechnology approaches, modern environmentally friendly techniques and physical-chemical and mechanical studies of the structural-sensitive and physical-mechanical properties of materials. The obtained results are based on new achievements in material sciences and computational approaches, methods and algorithms (in particular, finite-element and finite-difference modeling) applied to the solution of different technological, mechanical and physical problems. The obtained results have a significant interest for theory, modeling and test of advanced materials. Other results are devoted to promising devices demonstrating high accuracy, longevity and new opportunities to work effectively under critical temperatures and high pressures, in aggressive media, etc. These devices demonstrate improved comparative characteristics, caused by developed materials and composites, allowing investigation of physio-mechanical processes and phenomena based on scientific and technological progress.

She's the one woman I'd give anything to forget--and now I'm stuck living with her. I'm making a fresh start in Lake Tahoe, until my stubborn sister decides to move Mira into our cabin. I'll be damned if I move out on Mira's account. Nothing has changed in the years since I last saw Mira. Her tempting body and smart mouth taunt me daily. The only hope I have at keeping my sanity is the knowledge that Mira is hiding something. Sooner or later I'll discover her secret, and knowing her, it'll be damning. But first, I have to ignore the urge to kiss and touch and make Mira mine again. -- EXCERPT-- I grab her waist, guiding her back against the shelves. She kisses my cheekbone, nibbles my earlobe. "We can't do this here." That nibble shoots straight to my groin. "I beg to differ. I think we can manage." Once the walls come down, emotions run hot. Water plays a vital role in shaping our built environment, as it has done for centuries. We depend on it, we use it, we live with it and we must respect it. Aquitecture is the first book to outline new ways of 'designing for water,' using examples from around the world to illustrate methods of utilizing water innovatively, efficiently and safely. The first part of the book explores the historical relationship between water and architecture, examining how cities and civilisations have been drawn to water and have attempted to control it. The chapters go on to assess how this relationship has changed over time, and introduce readers to a range of brand new techniques that will revolutionise the way we think about water, design and urban planning. Solutions such as amphibious housing, wet-proof buildings, zero carbon development, rain gardens, flood storage and new methods of waterfront design are discussed and their effectiveness assessed. Full colour illustrations and international case studies are used throughout the book to bring these new theories to life; practical, technical advice sits alongside truly ground-breaking and ambitious ideas for the future. This book is an ideal reference tool for all architects, urban designers, planners and sustainability experts who have an interest in creating a beautiful, sustainable, intelligent and pleasurable built environment on land, in water and with water.

Inhaltsangabe:Zusammenfassung: Aufgrund der abzusehenden Ressourcenerschöpfung von Kraftstoffen auf Mineralölbasis sowie deren erheblichem Beitrag zum Treibhauseffekt bei der Verbrennung werden vielfältige Untersuchungen angestrebt, Dieselmotoren mit Pflanzenölkraftstoffen zu betreiben. In der vorliegenden Arbeit wird das Betriebs- und Emissionsverhalten eines direkt einspritzenden Dieselmotors beim Betrieb mit unterschiedlichen Pflanzenölmethylestern untersucht. Es sind dies im einzelnen Sojamethylester, Kokosmethylester und Palmkernmethylester. Die Versuche wurden an einem aufgeladenen, direkt einspritzenden 3-Zylinder-Dieselmotor vom Typ MWM TD 226B-3 durchgeführt. Grundlage für die vergleichenden Untersuchungen ist die ISO/DIS 8178-4, nach welcher der Motor in einem 5-Stufen-Test betrieben wurde. Während der Abfolge von 5 definierten Last-Drehzahl-Kombinationen wurde neben den Betriebsdaten auch die Konzentration der gesetzlich limitierten, gasförmigen Abgasbestandteile Kohlenmonoxid, unverbrannte Kohlenwasserstoffe und Stickoxide sowie die Schwärzungszahl nach Bosch als Anhaltspunkt für die Partikelemission protokolliert. Hauptinhalt ist jedoch die Abgasprobennahme zum Zweck der Ermittlung der Emissionen der nicht limitierten Abgaskomponenten polyzyklische aromatische Kohlenwasserstoff PAH sowie Aldehyde & Ketone. Hierfür wurden spezielle Probenahmeverrichtungen zur Verfügung gestellt. Die von der Arbeitsgruppe Organische Chemie durchgeführte nasschemische Analyse lieferte Ergebnisse, welche in geeigneter Form aufbereitet wurden. Die Wirksamkeit eines Oxidationskatalysators auf den Schadstoffausstoß wurde mituntersucht. Alle gewonnenen Ergebnisse für Betriebsverhalten, Schadstoffkonzentrationen und spezifische Schadstoffemissionen wurden rechnerisch und graphisch ausgewertet sowie in übersichtlicher Form dargestellt. Health visitors play a crucial role in supporting mothers who choose to breastfeed and their families. This accessible text enables readers to practise confidently in this vital area, focusing on underpinning knowledge and parent-centred counselling skills, and understanding cultural contexts.

Breastfeeding a child improves the lifelong health of a population, and promoting breastfeeding is an important area of public health practice.

Breastfeeding for Public Health incorporates the voices of health visitors, mothers and fathers to give insight into common practical challenges faced and suggestions for overcoming or working around them. Presenting up-to-date research, it explores the practical skills needed by health visitors to support mothers with breastfeeding; how to develop the communication skills and self-awareness necessary to build successful and trusting relationships with women and their families; why breastfeeding is so important for babies' and mothers' health and psychological attachment, closeness and long-term mental health; what we know about the content of breastmilk and the positive effect it has on the baby's gut microbiome, which in turn benefits the infant's long-term health and helps to protect against non-communicable diseases; the role of the father and grandparents in successfully initiating and sustaining breastfeeding; and how cultural awareness and sensitivity can influence practice for the better. Written by an experienced volunteer and practitioner with decades of experience as a health visitor and breastfeeding counsellor, this text is ideal for students taking Specialist Community and Public Health Nursing courses. It is also an important reference for practising health visitors.
