## ROSS EVERETT

---

Unholy Trinity Routledge

Our lives are all affected by three hugely powerful and well financed, but undemocratic, organizations: the International Monetary Fund, the World Bank and the World Trade Organization. These institutions share a common ideology. They aggressively promote "corporate" capitalism, neoliberalism, giving free rein to the interests of a small number of transnational corporations. This book presents the history and fundamental ideas of this economic ideology. Describing each member of the "unholy trinity," it shows how neoliberalism hijacked the IMF, World Bank and WTO in relation to their global financial, development and trade management roles.

**Broadcasting Cablecasting Yearbook** Routledge

This fourth edition of an enduring and popular book has been fully updated and revised, exploring the two opposing paradigms of sustainability in an insightful and accessible way. Eric Neumayer contends that central to the debate on sustainable development is the question of whether natural capital can be substituted by other forms of capital. Proponents of weak sustainability maintain that such substitutability is possible, whilst followers of strong sustainability regard natural capital as non-substitutable. The author examines the availability of natural resources for the production of consumption goods and the environmental consequences of economic growth. He identifies the critical forms of natural capital in need of preservation given risk, uncertainty and ignorance about the future and opportunity costs of preservation. He goes on to provide a critical discussion of measures of sustainability. Indicators of weak sustainability such as Genuine Savings and the Index of Sustainable Economic Welfare  $\mathcal{D}$  also known as the Genuine Progress Indicator  $\mathcal{D}$  are analysed, as are indicators of strong sustainability, including ecological footprints, material flows and sustainability gaps. This book will prove essential reading for students, scholars and

policymakers with an interest in ecological and environmental economics and sustainable development.

Nonmetro, Metro, and U.S. Bank-operating Statistics, 1987-89  
Springer

Explores the possibility of combining three economically desirable goals: an adequate rate of economic growth, substantially full employment or maximum employment, and substantial price stability. pt. 6c: Contains answers to questions on monetary policy and debt management submitted to the Secretary of the Treasury, the Chairman of the Board of Governors of the Federal Reserve System, and 17 firms dealing in Government securities. pt. 10: Contains written responses from Treasury Dept and Federal Reserve Board to questions submitted by Joint Economic Committee on the Government's management of its monetary, fiscal, and debt operations.

**Focus, Law of the Sea** Springer

Raymond F. Mikesell deals with sources of conflict between private foreign investors and the governments of developing countries. He concludes that government ownership and control will expand and that foreign investors are most likely to become sellers of their special services rather than remain investors who act freely for the benefit of parent companies. Originally published in 1971.

**The Economics of Foreign Aid** Zed Books

This book brings together for the first time in a single volume a complete survey of the theoretical foundations of economic aid policies and a critical analysis of aid programs and practices. The book focuses on the contributions of familiar economic growth models and other economic and social theories of development to foreign aid practices, and provides a broad and penetrating overview of the economics of foreign aid. At the macroanalytical level, the author investigates the savings constraint and the foreign exchange constraint approaches and the models employed for determining the quantity of external capital required for achieving growth goals under varying economic conditions in the recipient economies. The author examines other approaches to aid requirements (including the capital absorptive

approach), analyzes debt service capacity, and reviews various debt cycle models. The nature and significance of indicators of economic performance are investigated, and both theoretical and practical policy issues relating to the employment of aid as a means of influencing domestic policies are analyzed. In his final chapter, the author applies his theoretical conclusions to the formulation of an integrated approach to foreign aid, encompassing the major foreign assistance problems faced today. A clear and comprehensive text for every student of development economics, as well as the most thorough reference of its kind for professional economists, the book, a volume in the Aldine Treatises in Modern Economics series, will be useful to all who are concerned with the analysis, development, and execution of aid programs.

*Hearings* Springer

This book brings together key, incisive writings (published and unpublished) of the late Andre Gunder Frank on world development and world history. The selections provide the reader with a historical tracing of Gunder Frank's conceptual thinking on development, through to his views on world history, world development and globalization.

*Challenge and Response in the Middle East* Durham, N.C. : Duke University Press

A New York Times Bestseller A Washington Post Notable Nonfiction Book of 2020 Named a Best Book of 2020 by NPR "A fascinating scientific, cultural, spiritual and evolutionary history of the way humans breathe—and how we've all been doing it wrong for a long, long time." —Elizabeth Gilbert, author of *Big Magic* and *Eat Pray Love* No matter what you eat, how much you exercise, how skinny or young or wise you are, none of it matters if you're not breathing properly. There is nothing more essential to our health and well-being than breathing: take air in, let it out, repeat twenty-five thousand times a day. Yet, as a species, humans have lost the ability to breathe correctly, with grave consequences. Journalist James Nestor travels the world to figure out what went wrong and how to fix it. The answers aren't found in pulmonology labs, as we might expect, but in the muddy digs of ancient burial

sites, secret Soviet facilities, New Jersey choir schools, and the smoggy streets of São Paulo. Nestor tracks down men and women exploring the hidden science behind ancient breathing practices like Pranayama, Sudarshan Kriya, and Tummo and teams up with pulmonary tinkerers to scientifically test long-held beliefs about how we breathe. Modern research is showing us that making even slight adjustments to the way we inhale and exhale can jump-start athletic performance; rejuvenate internal organs; halt snoring, asthma, and autoimmune disease; and even straighten scoliotic spines. None of this should be possible, and yet it is. Drawing on thousands of years of medical texts and recent cutting-edge studies in pulmonology, psychology, biochemistry, and human physiology, *Breath* turns the conventional wisdom of what we thought we knew about our most basic biological function on its head. You will never breathe the same again.

*European Factor Mobility* Taylor & Francis

First Published in 2011. This is Volume 6 of the library collection of seven on Natural Resource Management and gives an analysis of the structure, physical characteristics, economics and a survey of the world copper industry and of the problems with which policy makers and students of the industry are currently concerned.

There is heavy emphasis on foreign investment in mining, especially in the Third World copper producing countries.

**Hearings** Edward Elgar Publishing

The top 9,500 publicly traded companies on the New York, NASDAQ and OTC exchanges. All companies have assets of more than \$5 million and are filed with the SEC. Each entry describes

business activity, 5 year sales, income, earnings per share, assets and liabilities. Senior employees and major shareholders are named. Seven indices give unrivalled access to the information.

**United Nations Library on Transnational Corporations** Irwin Professional Publishing

A brief survey of the present economic, social and political situations in the Middle East.

Moody's Manual of Railroads and Corporation Securities.

Government, State and Municipal Supplement Penguin

pt. 10: Contains written responses from Treasury Dept and Federal Reserve Board to questions submitted by Joint Economic Committee on the Government's management of its monetary, fiscal, and debt operations

*Petroleum Company Operations and Agreements in the Developing Countries* Springer

Originally published in 1984, this study focuses on petroleum agreements between non-OPEC LDCs with oil-importing LDCs and how issues such as high oil prices affect each country. The information presented in this study was drawn from interviews with petroleum officials in petroleum companies, petroleum ministries and unpublished documents such as contracts and

focussing on case studies of countries such as Peru, Guatemala and Malaysia. This title will be of interest to students of environmental studies and economics.

**Employment, Income Distribution and Development Strategy: Problems of the Developing Countries** Routledge

This collection of essays represents the proceedings of the conference of the Confederation of European Economic Associations at the University of Kent in 1986. Subjects include international migration, labour mobility and capital flows and movements.

Publishers' Circular Routledge
