Think of a  
CCTV camera  
as an eye. Just  
like an eye,  
light enters  
the camera  
through a  
lens. In an  
eye, the light  
then hits the  
retina which  
sends signals

to the brain. In  
a camera, it  
strikes an  
electronic  
sensor which  
turns the  
image into an  
electronic  
signal. An
