*Engineering Ethics: Concepts and Cases* John Wiley & Sons  
.0000000000No thinker has had a more profound influence on Western civilisation than Aristotle. In the Middle Ages many questions were settled by appeal to his authority alone, and his position was so pre-eminent that he was often referred to simply as 'the philosopher'. His work represents a vast, encyclopaedic treatment of virtually every field of knowledge: logic, rhetoric, ethics, politics, metaphysics, poetry, biology, zoology, physics and psychology. The depth and clarity of his understanding are remarkable, and nowhere more so than in the Nicomachean

Ethics and Politics. With an Introduction by Hugh Griffith.  
Discourses and Selected Writings Modern Library  
Introduction by Allen W. Wood With translations by F. Max Müller and Thomas K. Abbott The writings of Immanuel Kant became the cornerstone of all subsequent philosophical inquiry. They articulate the relationship between the human mind and all that it encounters and remain the most important influence on our concept of knowledge. As renowned Kant scholar Allen W. Wood writes in his Introduction, Kant "virtually laid the foundation for the way people in the last two centuries have confronted such widely differing subjects as the experience of beauty and the meaning of human history." Edited and compiled by Dr. Wood, *Basic Writings of Kant* stands as a comprehensive summary of Kant's contributions to modern thought, and gathers together the

most respected translations of Kant's key moral and political writings.

This volume collects a wealth of articles covering a range of topics of practical concern in the field of ethics, including active and passive euthanasia, abortion, organ transplants, capital punishment, the consequences of human actions, slavery, overpopulation, the separate spheres of men and women, animal rights, and game theory and the nuclear arms race. The contributors are Thomas Nagel, David Hume, James Rachels, Judith Jarvis Thomson, Michael Tooley, John Harris, John Stuart Mill, Louis Pascal, Jonathan Glover, Derek Parfit, R.M. Hare, Janet Radcliffe Richards, Peter Singer, and Nicholas Measor.

The Ethics of Belief. [By William K. Clifford. A Paper Read Before the Metaphysical Society.] Routledge

In *Ethics: The Essential Writings*, philosopher Gordon Marino skillfully presents an accessible, provocative anthology of both ancient and modern classics on matters moral. The philosophers represent 2,500 years of thought—from Plato, Kant, and Nietzsche to Alasdair MacIntyre, Susan Wolf, and Peter Singer—and cover a broad range of topics, from the timeless questions of justice, morality, and faith to the hot-button concerns of today, such as animal rights, our duties to the environment, and gender issues. Featuring an illuminating preamble, concise introductory essays on the giants of ethical theory, and incisive chapter headnotes to the modern offerings, this Modern Library edition is a perfect single-volume reference for students, teachers, and anyone eager to engage in reflection on ethical questions, including “What is the basis for our ethical

views and judgments?” Gordon Marino is professor of philosophy and director of the Hong Kierkegaard Library at St. Olaf College in Northfield, Minnesota. A recipient of the Richard J. Davis Ethics Award for excellence in writing on ethics and the law, he is the author of *Kierkegaard in the Present Age*, co-editor of *The Cambridge Companion to Kierkegaard*, and editor of the Modern Library's *Basic Writings of Existentialism*. His essays have appeared in *The New York Times*.

**Nicomachean Ethics** Oxford University Press

'The task of the benevolent person is surely to diligently seek to promote the benefit of the world and eliminate harm to the world' The *Mohzi* is among the founding texts of the Chinese philosophical tradition, presenting China's earliest ethical, political, and logical theories. The collected works introduce concepts, assumptions, and issues that had a profound, lasting influence throughout the classical and early imperial eras. Mohzi and his followers developed the world's first ethical theory, and presented China's first account of the origin of political authority from a state of nature. They were prominent social activists whose moral and political reform movement sought to improve the welfare of the common people and eliminate elite extravagance and misuse of power. In this new translation, Chris Fraser focuses on the philosophical aspects of the writing and allows readers to truly enter the Mohists' world of thought. This abridged edition includes the essential political and social topics of concern to this vital movement. Informed by traditional and recent scholarship, the translation presents the Mohists' ideas and arguments clearly, precisely, and coherently, while accurately reflecting the meaning, terminology, and style of the

original.

Essential Writings Modern Library

Contains *The Discourses/Fragments/Enchiridion* 'I must die. But must I die bawling?' Epictetus, a Greek Stoic and freed slave, ran a thriving philosophy school in Nicopolis in the early second century AD. His animated discussions were celebrated for their rhetorical wizardry and were written down by Arrian, his most famous pupil. The Discourses argue that happiness lies in learning to perceive exactly what is in our power to change and what is not, and in embracing our fate to live in harmony with god and nature. In this personal, practical guide to the ethics of Stoicism and moral self-improvement, Epictetus tackles questions of freedom and imprisonment, illness and fear, family, friendship and love. Translated and Edited with an Introduction by Robert Dobbin

Now in a special gift edition, and featuring a brand new foreword by Anthony Gottlieb, this is a dazzlingly unique exploration of the works of significant philosophers throughout the ages and a definitive must-have title that deserves a revered place on every bookshelf.

*82 Brief Essays on Things That Matter Ethics*The Essential Writings

*Nicomachean Ethics* Aristotle - The *Nicomachean Ethics* is one of Aristotle's most widely read and influential works. Ideas central to ethics—that happiness is the end of human endeavor, that moral virtue is formed through action and habituation, and that good action requires prudence—found their most powerful proponent

in the person medieval scholars simply called "the Philosopher." Drawing on their intimate knowledge of Aristotle's thought, Robert C. Bartlett and Susan D. Collins have produced here an English-language translation of the *Ethics* that is as remarkably faithful to the original as it is graceful in its rendering. Aristotle is well known for the precision with which he chooses his words, and in this elegant translation his work has found its ideal match. Bartlett and Collins provide copious notes and a glossary providing context and further explanation for students, as well as an introduction and a substantial interpretive essay that sketch central arguments of the work and the seminal place of Aristotle's *Ethics* in his political philosophy as a whole. The *Nicomachean Ethics* has engaged the serious interest of readers across centuries and civilizations—of peoples ancient, medieval, and modern; pagan, Christian, Muslim, and Jewish—and this new edition will take its place as the standard English-language translation.

A Vocabulary Princeton University Press

Provocative essays on real-world ethical questions from the world's most influential philosopher Peter Singer is often described as the world's most influential philosopher. He is also one of its most controversial. The author of important books such as *Animal Liberation*, *Practical Ethics*, *Rethinking Life and Death*, and *The Life You Can Save*, he helped launch the animal rights and effective altruism movements and contributed to the development of bioethics. Now, in *Ethics in the Real World*, Singer shows that he is also a master at dissecting important current events in a few hundred words. In this book of brief essays, he applies his controversial ways of thinking to issues like climate

change, extreme poverty, animals, abortion, euthanasia, human genetic selection, sports doping, the sale of kidneys, the ethics of high-priced art, and ways of increasing happiness. Singer asks whether chimpanzees are people, smoking should be outlawed, or consensual sex between adult siblings should be decriminalized, and he reiterates his case against the idea that all human life is sacred, applying his arguments to some recent cases in the news. In addition, he explores, in an easily accessible form, some of the deepest philosophical questions, such as whether anything really matters and what is the value of the pale blue dot that is our planet. The collection also includes some more personal reflections, like Singer's thoughts on one of his favorite activities, surfing, and an unusual suggestion for starting a family conversation over a holiday feast. Now with a new afterword by the author, this provocative and original book will challenge—and possibly change—your beliefs about many real-world ethical questions.

*Basic Writings of Existentialism* Routledge

Edited and with an Introduction by Gordon Marino Basic Writings of Existentialism, unique to the Modern Library, presents the writings of key nineteenth- and twentieth-century thinkers broadly united by their belief that because life has no inherent meaning humans can discover, we must determine meaning for ourselves. This anthology brings together into one volume the most influential and commonly taught works of existentialism. Contributors include Simone de Beauvoir, Albert Camus, Fyodor Dostoevsky, Ralph Ellison, Martin Heidegger, Søren Kierkegaard, Friedrich Nietzsche, Jean-Paul Sartre, and Miguel de Unamuno y Jugo.

*A Testament of Hope* Modern Library

Edited by Richard McKeon, with an introduction by C.D.C. Reeve Preserved by Arabic mathematicians and canonized by Christian scholars, Aristotle's works have shaped Western thought, science, and religion for nearly two thousand years. Richard McKeon's *The Basic Works of Aristotle*—constituted out of the definitive Oxford translation and in print as a Random House hardcover for sixty years—has long been considered the best available one-volume Aristotle. Appearing in ebook at long last, this edition includes selections from the *Organon*, *On the Heavens*, *The Short Physical Treatises*, *Rhetoric*, among others, and *On the Soul*, *On Generation and Corruption*, *Physics*, *Metaphysics*, *Nicomachean Ethics*, *Politics*, and *Poetics* in their entirety.

*The Basic Works of Aristotle* Hackett Publishing

Aristotle's moral philosophy is a pillar of Western ethical thought. It bequeathed to the world an emphasis on virtues and vices, happiness as well-being or a life well lived, and rationally motivated action as a mean between extremes. Its influence was felt well beyond antiquity into the Middle Ages, particularly through the writings of St. Thomas Aquinas. In the past century, with the rise of virtue theory in moral philosophy, Aristotle's ethics has been revived as a source of insight and interest. While most attention has traditionally focused on Aristotle's famous *Nicomachean Ethics*, there are several other works written by or attributed to Aristotle that illuminate his ethics: the *Eudemian Ethics*, the *Magna Moralia*, and *Virtues and Vices*. This book brings together all four of these important texts, in thoroughly revised versions of the translations found in the authoritative

complete works universally recognized as the standard English edition. Edited and introduced by two of the world's leading scholars of ancient philosophy, this is an essential volume for anyone interested in the ethical thought of one of the most important philosophers in the Western tradition.

Ethics Penguin UK

This major discussion takes a look at some of the most important ethical issues confronting us today by some of the world's leading thinkers. Including essays from leading thinkers, such as Jurgen Habermas, Alasdair MacIntyre, Julia Kristeva and Paul Ricoeur, the book's highlight – an interview with Jacques Derrida – presents the most accessible insight into his thinking on ethics and politics for many years. Exploring topics ranging from history, memory, revisionism, and the self and responsibility to democracy, multiculturalism, feminism and the future of politics, the essays are grouped into five thematic sections: \* hermeneutics \* deconstruction \* critical theory \* psychoanalysis \* applied ethics. Each section considers the challenges posed by ethics and how critical thinking has transformed philosophy today. *Questioning Ethics* affords an unsurpassed overview of the state of ethical thinking today by some of the world's foremost philosophers.

In this landmark work, noted comparative philosopher Roger T. Ames interprets how the classics of the Confucian canon portray the authentic, ethical human being. He argues that many distinguished commentators on Confucian ethics have explained the fundamental ideas and terms of this distinctively Chinese philosophy by superimposing Western concepts and categories, effectively collapsing this rich tradition into a subcategory of "virtue ethics." Beginning by addressing the problem of responsible cultural comparisons, Ames then formulates the interpretive context necessary to locate the texts within their own cultural ambiance. Exploring the relational notion of "person" that grounds Confucian philosophy, he pursues a nuanced understanding of the cluster of terms through which Confucian role ethics is expressed. Drawing on Western and Chinese sources, Ames provides a convincing argument that the only way to understand the Confucian vision of the consummate life is to take the tradition on its own terms.

This book brings together essential writings by the unjustly neglected nineteenth-century philosopher Frances Power Cobbe (1822-1904). A prominent ethicist, feminist, champion of animal welfare, and critic of Darwinism and atheism, Cobbe was very well known and highly regarded in the Victorian era. Together, these writings demonstrate the range, systematicity and philosophical character of Cobbe's work and make her core ethical theory and its central applications and developments available for teaching and scholarship.
