In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately.

A Standing Order service is available for the Series and out-of-print volumes are available on microfiche.

Analyzing changes in the role and place of NATO, European integration, and Franco-American relations in foreign policy discourse under Presidents Jacques Chirac and Nicolas Sarkozy, this book provides an original perspective on French foreign policy and its identity construction. The book employs a novel research design for the analysis of foreign policies, which can be used beyond the case of France, by combining the discourse theory of the Essex School with Interpretive Policy Analysis to examine political ideas and how they are organized into a foreign policy identity. On these grounds, the volume undertakes a comparative analysis of parliamentary and executive discourse of President Chirac's failed attempt at NATO reintegration in the 1990s, Sarkozy's

successful attempt in the 2000s, and the Libyan War. Ostermann depicts French foreign policy and identity as turning away from the European Union, atlanticizing, and losing its American nemesis. As a result, France uses a much more pragmatic, de-unionized, and pro-American strategy to implement foreign policy objectives than before. Offering a new and innovative explanation for a major change in French foreign policy and grand strategy, this book will be of great interest to scholars of NATO, European defense cooperation, and foreign policy.

 The beginning of the
 millennium has been
 influenced by a visible
 acceleration of the
 globalisation process. A
 complex and dynamic
 phenomenon, it has
 generated a series of
 consequences at the
 political, strategic and
 military levels, as well as
 the cultural level. The
 increase of
 interdependence between
 actors on the international
 stage, modern
 technologies, means of
 communication, cross-

 constant flux of goods,

 changes for the tools used
 by states in international

How France Changed Foreign Policy

International Potato Center

This collection of papers by an international chort of contributors explores the nature of the maritime connections that appear to have existed in the Transmanche/English Channel Zone during later prehistory. Organised into three themes, 'Movement and Identity in the Transmanche Zone'; 'Travel and exchange'; 'Identity and Landscape', the papers seek to articulate notions of frontier, mobility and identity from the end of the 3rd to the beginning of the 1st millennium BC, a time when the archaeological evidence suggests that the sea facilitated connections between peoples on both sides of the Channel rather than acting as a barrier as it is so often perceived today. Recent decades have since a massive increase in large-scale excavation programmes on either side of the Channel in advance of major infrastructure and urban development, resulting in the acqusition of huge, complex new datasets enabling new insights into later prehistoric life in this crucially important region.

Papers consider the role of several key archaeologists in transforming our appreciation of the connectivity of the sea in prehistory; consider the extent to which the Channel zone developed into a closely unified cultural zone during later Bronze Age in terms of communities that serviced the movement of artefacts across the Channel with both sides sharing widely in the same artefacts and social practices; examine funerary practices and settlement evidence and consider the relationship between communities in social, cultural and ideological terms; and consider mechanisms for the transmission of ideas and how they may be reflected in the archaeological record. Brings together leading scholars from the UK and northern Europe in a thought-provoking and revealing new examination of the relationship between communities in the 'Transmanche Zone' in the Bronze and Iron Ages. The premise is that the English Channel was a conduit for connectivity and exchange of ideas, artefacts and social practices and rather than

a barrier or frontier that had to be overcome before such connections could be fostered. Martinus Nijhoff Publishers Ce manuel présente la logique des processus de la vie psychique à tous les âges de la vie, de la naissance à la vieillesse. Les auteurs, issus de la pensée psychanalytique, retracent tout d'abord l'histoire de la réalité psychique de la subjectivité. Ils présentent ensuite les logiques, en large partie inconscientes, qui sous-tendent les formes d'expression de la psychopathologie. L'apport des neurosciences dans le champ de la psychopathologie est également abordé. Une approche projective complète enfin cette démarche d'ensemble et fournit une méthode pour médiatiser la subjectivité propre du clinicien. Ainsi composé, ce manuel s'adresse à tous ceux qui, étudiants, jeunes professionnels et psychologues confirmés, sont soucieux d'une vue d'ensemble et actualisée de l'approche clinique de la vie psychique et des formes de sa pathologie. Cette deuxième édition a été enrichie des nouvelles thématiques suivantes: le travail de psychothérapie

et les médiations thérapeutiques, ainsi que la psychopathologie du sujet vieillissant.

Many questions were raised during this multidisciplinary meeting during which geneticists, haematologists, embryologists, immunologists, transplant surgeons and physicians exchanged views on these questions. The second part of the meeting was devoted to an examination of the mechanisms of medullary deficiency. A more clinical approach was taken to the epidemiological, molecular and genetic aspects of medullary deficiency. There was also discussion of various therapeutic methods, including transplants, the use of haematopoietic growth factors, immunosuppressive treatments and gene therapy. Le développement des compétences en Afrique subsaharienne, un exercice d'équilibre
Berghahn Books

This volume explores the way in which composers, performers, and critics shaped individual and

collective identities in music from Europe and the United States from the 1860s to the 1950s. Selected essays and articles engage with works and their reception by Richard Wagner, Georges Bizet (in an American incarnation), Lili and Nadia Boulanger, William Grant Still, and Aaron Copland, and with performers such as Wanda Landowska and even Marilyn Monroe. Ranging in context from the opera house through the concert hall to the salon, and from establishment cultures to counter-cultural products, the main focus is how music permits new ways of considering issues of nationality, class, race, and gender. These essays - three presented for the first time in English translation - reflect the work in both musical and cultural studies of a distinguished scholar whose international career spans the Atlantic and beyond.

Die Wettbewerbsfähigkeit von Industrieunternehmen hängt massgeblich von der Produktivität der eingesetzten Anlagen und Produktionsprozesse ab. Um ein hohes Mass an Produktivität zu garantieren, müssen durch Fehler verursachte Standzeiten so kurz wie möglich gehalten werden. Dazu werden effiziente Methoden zur Fehlerdiagnose benötigt. In der vorliegenden Arbeit wurde ein modellbasiertes Diagnose-Verfahren für ereignisdiskrete Closed-Loop Systeme entwickelt.

Die betrachteten Systeme bestehen aus dem geschlossenen Kreis von Steuerung und Prozess. Durch den systematischen Vergleich von aktuell beobachtetem und durch ein Systemmodell erwartetem Verhalten können Fehler in Echtzeit erkannt und isoliert werden. In der Arbeit wurden geeignete Modellidentifikationsverfahren für Ereignisdiskrete Systeme entwickelt, sodass die aufwendige manuelle Modellbildung vermieden wird. Die entwickelten Methoden wurden im Labor und im Rahmen einer Industrieanwendung erfolgreich getestet.

With about 200,000 entries, StarBriefs Plus represents the most comprehensive and accurately validated collection of abbreviations, acronyms, contractions and symbols

within astronomy, related space sciences and other related fields. As such, this invaluable reference source (and its companion volume, StarGuides Plus) should be on the reference shelf of every library, organization or individual with any interest in these areas. Besides astronomy and associated space sciences, related fields such as aeronautics, aeronomy, astronautics, atmospheric sciences, chemistry, communications, computer sciences, data processing, education, electronics, engineering, energetics, environment, geodesy, geophysics, information handling, management, mathematics, meteorology, optics, physics, remote sensing, and so on, are also covered when justified. Terms in common use and/or of general interest have also been included where appropriate.

Traité pratique et complet de tous les mesurages, métrages jaugeages de tous le corps appliqué aux arts, aux métiers, à l'industrie, ... avec atlas de 20 planches

John Libbey Eurotext

This compilation probably looks like one of the craziest things a human being could spend his or her time on. Yet nobody would wonder at someone taking a short walk every day - after twenty five

years that person would have covered a surprisingly long distance. This is exactly the story behind this list, which appeared first as a few pages within the directory StarGuides (or whatever name it had at that time) and as a distinct sister publication since 1990. The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations, acronyms, contractions and symbols which they might encounter in all aspects of the vast range

of their professional activities, including traveling. Perhaps it is a bit paradoxical, but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline, they will probably encounter more difficulties when dealing with adjacent fields. It is for this purpose that this dictionary might be most often used. Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions.
