 "TRB's Transit Cooperative Research Program (TCRP) Synthesis 108: Transit Bus Operator Distraction Policies is designed to help transit agencies develop policies and programs to address and prevent distracted driving incidents"--Publication page.

**Prepared by the Products Assistance Division, Small Business Administration** John Wiley & Sons

Packed with previously unpublished photographs, this book celebrates the thirty years of Shuttle Buses.

**Resources in Education** Lulu.com

An index of state education journals.

Bus and Truck Transport [in Canada] The Stationery Office

In this report the Committee concludes that the Local Transport Act 2008 gives local authorities a range of tools to work with bus operators to improve local bus services and does not need updating. However, the Government and bus industry need to

show more leadership to raise the standard of bus services with the introduction of multi-operator smartcards, service stability and passenger information. While some bus services are good, too often passengers are dissatisfied with the reliability of the service, the level of fares and the need to buy another ticket if the trip involves two bus companies. More competition among bus operators may improve services in some areas but many routes simply cannot sustain more than one operator. It is worrying that the Traffic Commissioners who are responsible for bus safety and punctuality monitoring appear to have insufficient resources to carry out these crucial roles as effectively as they would wish. Outside London, the quality of bus services depends on partnerships between local authorities and the bus operators. In a minority of areas, such as where local authorities take on responsibility for local rail services, bus franchising may be an appropriate option. These would require additional subsidy and sustained political commitment

Whether it's the legends about breadfruit trees or ghosts inhabiting inland Tahiti, the endangered delicacies to avoid or the gift-giving protocol when invited to a local's home, how to tour a vanilla plantation on Raiatea or when to find the Nouméa flame trees "catch fire" in hues of red and orange, South Pacific Handbook covers everything about this region of boundless ocean and scarce land. Drawing on two decades of editions and incorporating the comments of countless previous readers, this user-friendly guide extends beyond the hot spots and steers readers off the beaten path throughout Polynesia and Melanesia. National Bus Company Dual Purpose Vehicles

There are approximately 4,000 fatalities in crashes involving trucks and buses in the United States each year. Though estimates are wide-ranging, possibly 10 to 20 percent of these crashes might have involved fatigued drivers. The stresses associated with their particular jobs (irregular schedules, etc.) and the lifestyle that many truck and bus drivers lead, puts them at substantial risk for insufficient sleep and for developing short- and long-term health problems. Commercial Motor Vehicle Driver Fatigue, Long-Term Health and Highway Safety assesses the state of knowledge about the relationship of such factors as hours of driving, hours on duty, and periods of rest to the fatigue experienced by truck and bus drivers while driving and the

implications for the safe operation of their vehicles. This report evaluates the relationship of these factors to drivers' health over the longer term, and identifies improvements in data and research methods that can lead to better understanding in both areas.
