Throughout the NCAA Tournament's history, underdogs, Cinderella stories, and upsets have captured the attention and imagination of fans. Making March Madness is the story of this premiere tournament, from its early days in Kansas City, to its move to Madison Square Garden, to its surviving a point-shaving scandal in New York and taking its games to different sites across the country. Chad Carlson's analysis places college basketball in historical context and connects it to larger issues in sport and American society, providing fresh insights on a host of topics that readers will find interesting, illuminating, and thought provoking.

The high-pressured, fast-paced environment of television production leaves little time for producers to reflect on how the potentialities of texts and images will be interpreted outside of the immediate broadcast imperatives. This volume brings together the producers and analysts of

television in a formal and productive way.

Why does Australia, a nation with one of the world's best economies, have such a dim view of its own performance? Why does it see itself as worse off than some of the basket-case economies of southern Europe? How did a country that was smart enough to avoid recession and mass unemployment despite a global meltdown get so down on itself? In *Glory Daze* Jim Chalmers argues that the combination of hyper-partisanship and self-serving incentives in politics have resulted in a deficit of national self-esteem. This insider account provides a unique perspective on national identity. Chalmers concludes that unless a stop is put to the poisonous politics of recent years, Australia runs the risk of squandering existing national advantages and compromising our ability to tackle the challenges of the future.

Revealing the diversity of Aboriginal life in the Sydney region, this study examines a variety of

source documents that discuss not only Aboriginal life before colonization in 1788 but also the early years of first contact. This is the only work to explore the minutiae of Sydney Aboriginal daily life, detailing the food they ate; the tools, weapons, and equipment they used; and the beliefs, ceremonial life, and rituals they practiced. This updated edition has been revised to include recent discoveries and the analyses of the past seven years, adding yet more value to this 2004 winner of the John Mulvaney award for best archaeology book from the Australian Archaeological Association. The inclusion of a special supplement that details the important sites in the Sydney region and how to access them makes the book especially appealing to those interested in visiting the sites.

'A brilliant critical and fresh look at the public choice school of thought.' - Paul Streeten This book challenges theories of public goods, public enterprise and public choice on three fronts.

Government action reflects wider interests and commitments than just the material self-interest assumed as primary by the three theories. Government contributes to the productivity and quality of the modern mixed economy in ways not captured by theories stressing the inherent superiority of private markets. Lastly, old and new ideas within established traditions of political thought justify government action beyond the libertarian argument for limited government.

The volume is divided into two parts. The first part presents four conversations with the founding fathers of modern social choice and welfare theory: Kenneth Arrow, John Harsanyi, Paul Samuelson, and Amartya Sen. The second part includes conversations with scholars who made important contributions to the discipline from the early 1970s onwards. Selecting a leader is a momentous and defining choice for a political party. Leaders symbolize their party and are a primary factor in election outcomes. While much is known about the selection of national party leaders, less is known about the provincial selection process, particularly in the Maritimes. Breaking new ground, Conventional Choices examines twenty-five different leadership elections in three maritime provinces. The analysis draws on an extraordinarily rich data set spanning thirty-two years to explore the backgrounds, attitudes, and motivations of those who select party leaders. It is an impressive study that offers fresh insights into leadership selection and Maritime party politics.

Originally published in 1981. Discrete-choice modelling is an area of econometrics where significant advances have been made at the research level. This book presents an overview of these advances, explaining the theory underlying the model, and explores its various applications. It shows how operational choice models can be used, and how they are particularly useful for a better understanding of consumer demand theory. It discusses particular problems connected with the model and its use, and reports on the authors' own empirical research. This is a comprehensive survey of research developments in discrete choice modelling and its applications. Cengage AU

"This book bears the hallmark of Open University Press texts. It is well laid out and nicely produced. It manages a good balance between textbook and cutting edge research... The book is impressive in its command of a wide range of writings on sexuality, gender, masculinity and schooling." - Educational Review "Secondary school teachers, principals and school counsellors would be the primary audience for this book, although youth workers and other workers with adolescent males should also find the boys' perceptions of school and adolescent culture of great interest and considerable use." -Youth Studies Australia This book focuses on the impact and effects of masculinities on the lives of boys at school. Through interviews with boys from diverse backgrounds, the authors explore the various ways in which boys define and negotiate their masculinities at school. The following questions and issues are addressed: What does it mean to be a 'normal' boy and who decides this? How do issues of masculinity impact on boys from culturally diverse backgrounds, indigenous boys, those with disabilities and boys of diverse sexualities? What issues of power impact on these boys' lives and relationships at school? What effects do these issues have on boys' learning at school? Through problematizing and interrogating the question of what makes a boy a boy, this fascinating title offers recommendations and indicates future directions for working with boys in school.

To mark Bob Hawke's extraordinary life and legacy, this master work brings together the story of the man in full in a definitive hardback commemorative biography. Bob Hawke began life as a good Christian boy from a teetotal family, became a wild, drinking, womanising student, a Rhodes Scholar, a champion of workers, a folk hero recognised throughout the country, a dynamic politician who was elected four times as Australia's Prime Minister - and transformed his country. He was our longest serving Labor Prime Minister and considered by many our greatest. By the early 1980s Australia was on the road to becoming 'the poor white trash of Asia'. Hawke as prime minister, with Paul Keating as treasurer, changed all that. Australia became a forward-looking and humane country whose voice commanded respect on the international stage. Hawke was an environmentalist before it was fashionable, he loathed racism, helped end apartheid in South Africa, sent ministers to end the war in Cambodia, foresaw that China would become a great world power and established the first Chinese investment in an iron ore mine in Australia. His journey from the manse of a small South Australian country town to the palaces of Europe, Asia and the United States is the odyssey of a leader it is hard to imagine we will ever see the like of again - a man of towering passions and commitment to causes, and an unshakeable love of humanity.

Photography is a ubiquitous part of the public sphere. Yet we rarely stop to think about the important role that photography plays in helping to define what and who constitute the public. Photography and Its Publics brings together leading experts and emerging thinkers to consider the special role of photography in shaping how the public is addressed, seen and represented. This book responds to a growing body of recent scholarship and flourishing interest in photography's connections to the law, society, culture, politics, social change, the media and visual ethics. Photography and Its Publics presents the public sphere as a vibrant setting where these realms are produced, contested and entwined. Public spheres involve yet exceed the limits of families, interest groups, identities and communities. They are dynamic realms of visibility, discussion, reflection and possible conflict among strangers of different race, age, gender, social and economic status. Through studies of photography in South America, North America, Europe and Australasia, the contributors consider how photography has changed the way we understand and locate the public sphere. As they address key themes including the referential and imaginative qualities of photography, the transnational circulation of photographs, online publics, social change, violence, conflict and the ethics of spectatorship, the authors provide new insight into photography's vital role in defining public life.
