Synopsis A pond has been the starting point for many a life-long interest in natural history. Whether it is the first jam jar full of frogspawn, a tiddler caught in a net, a graceful swan or a diving duck, the pond gives us all an immediate contact with nature.

**Gem Guide to Pond Life (Collins Gems): Amazon.co.uk ...**

In a pond ecosystem, the algae are at the bottom of the food chain, providing food for many animals. These small living things resemble plants and make their own food by the process of photosynthesis. Pond algae may be single-celled and microscopic, or it may form nets and long filaments.

Algae can make the water in a pond appear green or cloudy.

We have found that nature guides and handbooks are valuable resources for learning about pond life. Teaching kids to look up different plants and wildlife that they see helps them learn on a deeper level. Once they have looked up a bird or a flower in their guide book, they are much less likely to forget its name or characteristics!
