Some 35 years ago Datsun (now Nissan) introduced the 1970 Datsun 240Z sports car, emphatically disproving the perception that Japanese automakers could only produce economy cars. Designed specifically to appeal to the American market, the Z car has enjoyed long-term popularity with its sporty styling and impressive performance. Z car fans are loyal and numerous. Over 1.4 million Z cars have been sold worldwide, including 1 million-plus in the U.S. The five generations of Z cars include the latest version, the 350Z introduced in 2003, which has refueled interest in Z cars. This book will thoroughly cover the history of this breakthrough Japanese sports car, and will include official Datsun/Nissan photography and memorabilia such as advertising and international marketing materials.

This book analyses Rabindranath Tagore's contribution to Bengali drama and theatre. Throughout this book, Abhijit Sen locates and studies Rabindranath's experiments with drama/theatre in the context of the theatre available in nineteenth-century Bengal, and explores the innovative

strategies he adopted to promote his 'brand' of theatre. This approach finds validation in the fact that Rabindranath combined in himself the roles of author-actor-producer, who always felt that, without performance, his dramatic compositions fell short of the desired completeness. Various facets of his plays as theatre and his own role as a theatre-practitioner are the prime focus of this book. This book will be of great interest to students and scholars in Theatre and Performance Studies and most notably, those focusing on Indian Theatre and Postcolonial Theatre.

The book reports on new theories and applications in the field of intelligent systems and computing. It covers computational and artificial intelligence methods, as well as advances in computer vision, current issue in big data and cloud computing, computation linguistics, cyber-physical systems as well as topics in intelligent information management. Written by active researchers, the different chapters are based on contributions presented at the workshop in

intelligent systems and computing (ISC), held during CSIT 2016, September 6-9, and jointly organized by the Lviv Polytechnic National University, Ukraine, the Kharkiv National University of Radio Electronics, Ukraine, and the Technical University of Lodz, Poland, under patronage of Ministry of Education and Science of Ukraine. All in all, the book provides academics and professionals with extensive information and a timely snapshot of the field of intelligent systems, and it is expected to foster new discussions and collaborations among different groups.
