Beginning with a retrospective of the past century, this book offers a panoramic picture of Chinese comparative literature, from its nascence in the early 1920s, through its evolution in the 1980s, to the new development at the turn of the century, ending with a prospective look at the future of comparative literature in the 21st century. The articles presented here reveal the author's deep understandings of the literature and culture of her own country and those of other countries. A rich array of case studies and in-depth theorizing make it an extremely interesting and enlightening read. Prof. Daiyun Yue is a prominent professor at

Peking University and a leading figure in Chinese comparative literature. She has served as Head of the Institute for Comparative Literature and Cultural Studies, PKU (1984—1998) and the third president of the Chinese Comparative Literature Association (1989—2014). Further, she is the founder of Dialogue Transcultural, a much-acclaimed journal of comparative literature. Prof. Yue approaches outstanding literature as a bridge to link people of different cultural traditions: “The reason why interdisciplinary literary research between two alien cultures is possible is because dialog between alien cultures, along with exchange

and understanding, is more readily realized through literature.” Herein lies the value of comparative literature. **Emerging and Eco-Friendly Approaches for Waste Management**

'May the eyes of Canada never be blind

to that glorious light which shines upon our young national life from the deeds of those "who counted not their lives dear unto themselves". When World War I broke out in the summer of 1914, the Canadian chaplain Frederick George Scott volunteered for service despite his fears. He spent four long years in the trenches on the western front, where he developed close bonds with his fellow soldiers and sought to maintain his faith while the world around him collapsed into chaos. In evocative language befitting his background as a poet, Scott lays bare the horrors of modern warfare. Filled with heart-wrenching descriptions and tragic detail, The Great War

as I Saw It is a powerful meditation on the Canadian experience during World War I and an important look into the life of the ordinary soldier.

This user-friendly book is aimed at helping students of Mandarin Chinese learn and remember Chinese characters. At last—there is a truly effective and enjoyable way to learn Chinese characters! This book helps students to learn and remember both the meanings and the pronunciations of over 800 characters. This otherwise daunting task is made easier by the use of techniques based on the psychology of learning and memory. key principles include the use of visual imagery, the visualization of

short "stories," and the systematic building up of more complicated characters from basic building blocks.

Although Learning Chinese Characters is primarily a book for serious learners of Mandarin Chinese, it can be used by anyone with an interest in Chinese characters, without any prior knowledge of Chinese. It can be used alongside (or after, or even before) a course in the Chinese language. All characters are simplified (as in mainland China) but traditional characters are also given, when available. Key features: Specially designed pictures and stories are used in a structured way to make the learning process more enjoyable and

effective, reducing the need for rote learning to the absolute minimum. The emphasis throughout is on learning and remembering the meanings and pronunciations of the characters. Tips are also included on learning techniques and how to avoid common problems. Characters are introduced in a logical sequence, which also gives priority to learning the most common characters first. Modern simplified characters are used, with pronunciations given in pinyin. Key information is given for each character, including radical, stroke-count, traditional form, compounds, and guidance on writing the character. This is a

practical guide with a clear, concise and appealing layout, and it is well-indexed with easy look-up methods. The 800 Chinese characters and 1,033 compounds specified for the original HSK Level A proficiency test are covered.
