"The risk of a fatal catastrophe was constant. The NVA was the enemy, but the ultimate opponent was, quite simply, death. . . ." For assault helicopter crews flying in and around the NVA-infested DMZ, the U.S. pullout from Vietnam in 1970-71 was a desperate time of selfless courage. Now former army warrant officer Tom Marshall of the Phoenix, C Company, 158th Aviation Battalion, 101st Airborne, captures the deadly mountain terrain, the long hours flown under enormous stress, the grim determination of hardened pilots combat-assaulting through walls of antiaircraft fire, the pickups amid exploding mortar shells and hails of AK fire, the nerve-racking string extractions of SOG teams from North Vietnam. . . . And, through it all, the rising tension as helicopter pilots and crews are lost at an accelerating pace. It is no coincidence that the Phoenix was one of the most highly decorated assault helicopter units in I Corps. For as the American departure accelerated and the enemy added new, more powerful antiaircraft weapons, the helicopter pilots, crew chiefs, and gunners paid the heavy price of withdrawal in blood. For more than 30 Percent of Tom Marshall's 130 helicopter-school classmates, the price of exit was their lives. . . .

Ex-undercover cop Marshall Grade is hiding out in California when he learns that federal agent Lucas Cohen has survived a kidnapping. Cohen was Marshall's ticket into witness protection, and his captors have a simple question: where's Marshall now? Marshall's undercover work gave him a long list of enemies, and the enemy in this case is a corrupt businessman named Dexter Vine. Vine's almost broke, in debt to people even worse than himself, and he wants to settle old scores while he has time. He's hired Ludo Coltrane—a nonchalant psychopath and part-time bar manager—to find Marshall at any cost. Ludo's no stranger to killing, but his associate, the cash-strapped ex-con Perry Rhodes, may prove more of a liability than an asset. The question to be answered in *Marshall's Law* is: what has Marshall done to make Dexter want him dead? And are the contacts from his old life—ex-colleague Lana, and the heroin dealer Henry Lee—prepared to help him, or will they just sell him out? In the thrilling, action-packed *Marshall Grade* novels by Ben Sanders, an ex-undercover NYPD officer in witness protection is on the run from the criminals he ratted out. But Marshall can't remain in hiding when people's lives are at stake and he can do something about it—even if it means putting himself in the crosshairs of every contract killer hired to settle old scores. "For lovers of Jack Reacher and Jason Bourne there is a new gun in town—a noble loner called Marshall Grade." —Michael Robotham, bestselling author of *Suspect* (on *American Blood*)

A Novel Minotaur Books

A bighearted dystopian novel about the corrosive effects of fear and the redemptive power of love. With soaring literary prose and the tense pacing of a thriller, the first-time novelist Peyton Marshall imagines a grim and startling future. At the end of the twenty-first century—in a transformed America—the sons of convicted felons are tested for a set of genetic markers. Boys who test positive become compulsory wards of the state—removed from their homes and raised on "Goodhouse" campuses, where they learn to reform their darkest thoughts and impulses. Goodhouse is a savage place—part prison, part boarding school—and now a radical religious group, the Holy Redeemer's Church of Purity, is intent on destroying each campus and purifying every child with fire. We see all this through the eyes of James, a transfer student who watched as the radicals set fire to his old Goodhouse and killed nearly everyone he'd ever known. In addition to adjusting to a new campus with new rules, James now has to contend with Bethany, a brilliant, medically fragile girl who wants to save him, and with her father, the school's sinister director of medical studies. Soon, however, James realizes that the biggest threat might already be there, inside the fortified walls of Goodhouse itself. Partly based on the true story of the nineteenth-century Preston School of Industry, *Goodhouse* explores questions of identity and free will—and what it means to test the limits of human endurance.

Pulitzer Prize-winning journalist Walter Pincus exposes the darkest secret in American nuclear history—sixty-seven nuclear tests in the Marshall Islands that decimated a people and their land. The most important place in American nuclear history are the Marshall Islands—an idyllic Pacific paradise that served as the staging ground for over sixty US nuclear tests. It was here, from 1946 to 1958, that America perfected the weapon that preserved the peace of the post-war years. It was here—with the 1954 Castle Bravo test over Bikini Atoll—that America executed its largest nuclear detonation, a thousand times more powerful than Hiroshima. And it was here that a native people became unwilling test subjects in the first large scale study of nuclear radiation fallout when the ashes rained down on powerless villagers, contaminating the land they loved and forever changing a way of life. In *Blown to Hell*, Pulitzer Prize-winning journalist Walter Pincus tells for the first time the tragic story of the Marshallese people caught in the crosshairs of American nuclear testing. From John Anjain, a local magistrate of Rongelap Atoll who loses more than most; to the radiation-exposed crew of the Japanese fishing boat the *Lucky Dragon*; to Dr. Robert Conard, a Navy physician who realized the dangers facing the islanders and attempted to help them; to the Washington power brokers trying to keep the unthinkable fallout from public view . . . *Blown to Hell* tells the human story of America's nuclear testing program. Displaced from the only homes they had known, the native tribes that inhabited the serene Pacific atolls for millennia before they became ground zero for America's first thermonuclear detonations returned to homes despoiled by radiation—if they were lucky enough to return at all. Others were ripped from their ancestral lands and shuttled to new islands with little regard for how the new environment supported their way of life and little acknowledgement of all they left behind. But not even the disruptive relocations allowed the islanders to escape the fallout.
