Ten years ago, the first edition of Graves' Orbitopathy: A Multidisciplinary Approach was published. Since then, the book has become very popular and much has happened in the field to warrant a third edition. What has not changed is the successful and attractive question-and-answer format of the book. In the 3rd, revised and expanded edition, new chapters have been added on co-morbidity, local treatment modalities, novel immunosuppressive therapy, detailed protocols, and questions frequently asked by patients. All chapters of the previous edition have been thoroughly updated. Subjects covered then include the pathology of Graves' Orbitopathy (GO) and the controversial views on its pathogenesis; assessment of changes using reliable measuring techniques; medical management of GO including established and alternative treatment options; technical explanations and illustrations of various surgical procedures; and finally, the molecular, immunologic, and clinical aspects of this complex disorder. Additionally, ample consideration is given to the new 2016 ETA/EUGOGO guidelines on the management of GO.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

What methodological tools have been most useful in doing evaluation? What are some of the new methodologies that are being used and developed? Will the types of things evaluated expand from programs, personnel, and products to foreign aid, medical technology, environmental interventions, and World Bank loan programs? What will evaluation be like in the 21st century? These impressive evaluators from around the globe explore how evaluation has come to be what it is today and what the professional evaluation landscape will be like in the future. They examine the following: -What makes evaluation different from other disciplines? -The links and differences between evaluation and auditing professions? -Which activities have priority in evaluation, under what circumstances, and for what purposes? -New methodological approaches to doing evaluation. - The issues of advocacy versus truth in evaluation and between evaluating programs versus empowering people to evaluate their

own programs. Evaluation for the 21st Century features thoughtfully written introductions to each of the main sections that provide a context and synthesis of the various evaluators' chapters. After reading this groundbreaking book, researchers and practitioners will be able to recognize these new developments in evaluation as they encounter them, place them in context, and incorporate them into their own evaluation professions and practices. A stunning achievement, Evaluation for the 21st Century is for all professionals and practitioners in evaluation, management, public administration, sociology, psychology, education research, public health, and nursing.
