DOMINIK JILLIAN

Adult Development and Aging McGraw-Hill Humanities, Social Sciences & World Languages

A multi-disciplinary approach to adulthood and aging, designed as a text for graduate and undergraduate courses in adult development.

Presents a positive view of aging, stressing individual, gender, and cultural aspects. Includes unique treatment of creativity, single lifestyles, religion and stepparenting.

Aging and Development Springer Science & Business Media

Reflects the most important theoretical foundations and research directions concerning aging and older adulthood

This authoritative volume provides the latest insights into, and theoretical interpretation of, our understanding of the human aging process. Newly updated and revised, this edition of the well-established student textbook offers relatable scenarios that touch upon real-world issues faced by older adults and their families. The book

explains how research studies attempt to answer questions of both theoretical and practical importance as they relate to aging and older adulthood, and it explains the hypotheses and findings of the studies in a manner that is comprehensible to readers of all levels of research experience.

Aging and Older Adulthood begins by describing the demographic characteristics of the older population, and follows with a chapter on theoretical models that apply to the study of adult development and aging, as well as approaches commonly taken to conduct research and ethical concerns involved in the study of this group. It then offers a series of chapters exploring biological aging, sensation perception and attention, memory, intellectual functioning, cognition and real-world problem-solving, personality and coping, social interaction and social ties, lifestyles and retirement, mental health and psychotherapy, and death and bereavement. The final chapter looks at aging in the future. Each chapter includes fully updated research

findings, as well as new and expanded coverage of concepts and ideas in areas such as neuroscience, and diabetes. New edition of a highly respected text exploring our contemporary understanding of a broad range of topics related to older adulthood and the psychology of aging Offers thematic treatment of core issues including health, sensory perception, memory, intellect, social interactions, employment and retirement, and mental health Uses a dual lens of two models – the selective optimization model and the ecological model – to provide cohesiveness to the presentation of both theoretical and applied material Introduces each chapter with a relevant real-world scenario and refers back to it throughout the chapter Includes pedagogical feature boxes that reflect current understanding of contemporary issues in the field as well as key points and issues for further discussion Aging and Older Adulthood, 4th Edition is an excellent text for upper division undergraduate and graduate courses focusing

on the older adulthood and aging, the psychology of aging, gerontological studies, and lifespan development.

This work clearly and concisely delivers the most current research findings in the field of adult development and aging.

Adult Development and Aging McGraw-Hill Humanities, Social Sciences & World Languages

Redesigned and thoroughly updated, *Adult Development and Aging* clearly and concisely delivers the most current research findings in the field, with a writing style that students and instructors applaud. Using a topical organization, this edition provides a balanced, positive perspective on adult development. *Adult Development and Aging with PowerWeb* McGraw-Hill Higher Education

The fifth edition of *Adult Development and Aging* offers professors and students a clear, comprehensive and current account of the salient issues and concerns that dominate the field of Adult

Development. After reading this text, students will have a keen understanding of where adult development and aging has been in the past, where it is right now, and where it will be headed in the future. In *Adult Development and Aging*, 5e authors William Hoyer and Paul Roodin combine their expertise in teaching and research to provide clear explanations of the awesome, complex unfolding of development during the adult years. The text presents findings derived from theories and ideas about understanding adulthood and aging in an interdisciplinary, process oriented perspective. Material is organized in terms of the biological, social and cultural contexts in which change occurs during the adult years. Information is presented in the context of young adults growing older in today's world, informed by research and theory.

Adult Development and Aging Wadsworth Publishing Company
Renowned experts in adult development and aging, Manfred Diehl and Hans-Werner Wahl synthesize decades of psychological research into a comprehensive

volume that considers later life in the context of lifespan development, social and physical environmental factors, and historical-cultural influences. In so doing, they review important research on cognitive functioning, behavioral processes, personality and identity development, and overall well-being in middle to late adulthood. Diehl and Wahl's three-part framework helps readers better understand that the development process is influenced by multiple factors and can take many different trajectories. Through this contextualized perspective, they examine the influence that previous life experiences, beginning in early childhood, can have on the aging process in older adults. This includes social relations, technological advances, societal perspectives on aging, and education. The authors also examine the challenges and opportunities of aging, using a strength-based approach to promote a diverse, nuanced understanding of successful, healthy aging. Chapters also conclude with dialogues from other experts in the field, offering multiple different

perspectives on the research.

[Aging and Biography](#) John Wiley & Sons

This authoritative reference work contains more than 300 entries covering all aspects of the multi-disciplinary field of adult development and aging. Brings together concise, accurate summaries of classic topics as well as the most recent thinking and research in new areas. Covers a broad range of issues, from biological and physiological changes in the body to changes in cognition, personality, and social roles to applied areas such as psychotherapy, long-term care, and end-of-life issues. Includes contributions from major researchers in the academic and clinical realms. 3 Volumes

Adult Development and Aging

John Wiley & Sons
The psychology of aging usually focuses upon cognitive changes, with a particular focus on dementia and other forms of cognitive decline. But getting older is about more than simply changes to the brain and related health issues. Changes to our social and emotional lives are also hugely significant as we adapt across our lifespan. The second edition of *Aging and Development* is the only textbook available that responds to the growing interest in social, personal and emotional development in older age. Ideally suited to complement texts on cognitive change, the book provides a holistic developmental perspective on aging. It highlights a range of issues, including the development of personal meaning and spirituality, improvements in emotional control, uses of reminiscence and life review, the importance of healthy attitudes to aging, as well as the maintenance of close personal relationships. It does not avoid the difficult issues of late life decline, but illustrates how even in

circumstances of physical and mental frailty a positive sense of self can be created and enhanced. Fully updated to provide the most cutting-edge overview on this burgeoning topic of interest, *Aging and Development* includes a glossary and list of useful websites both on the study of gerontology and the psychology of aging. It will be essential reading for all students of developmental psychology, as well as anyone either training to work or already working with older people.

The Psychology of Later Life HarperCollins College

The fourth edition continues to provide psychologists with a fresh and engaging approach to the field of psychology of adult development and aging. It focuses on three themes: a multidisciplinary approach, positive images of aging, and the newest and most relevant research. Recent articles and updates to the information on demography, economics, and public policy are presented. The *Aging in the News* feature includes a story of a remarkable achievement by a middle-aged or older adult. The

Assess Yourself boxes are also updated with new questions. Psychologists appreciate this mix of examples and discussions that make the material come to life.

DEVELOPMENTAL PSYCHOLOGY: CHILDHOOD and ADOLESCENCE John Wiley & Sons

In this timely revision of his highly respected text, John Cavanaugh offers comprehensive treatment of adult development and aging. A focus on science and the experimental method, liberal use of good examples and applications, a friendly writing style, and excellent handling of diversity issues make this book an outstanding way for readers to learn about adult development and aging.

Adult Development and Aging Wiley Global Education

Designed to meet the needs of today's students by presenting a uniquely positive perspective on aging, *Adult Development and Aging, The Canadian Experience*, challenges readers to examine their own ageism and to consider the gains as well as the losses people experience across adulthood. This first truly Canadian edition provides

relatable examples, case studies, up-to-date research, and relevant global and Canadian demographics as well as loads of StatsCan data--all set within a conversational, approachable narrative that avoids overly academic or clinical language. Engaging pedagogy, which is built to help students retain information, supplement their learning, and consider career options appears throughout the text and digital solution, CourseMate

Adult Development and Aging WCB/McGraw-Hill
In this second edition of *Adult Development and Aging: Biopsychosocial Perspectives*, Susan Krauss Whitbourne makes an important contribution to the educational mission of the field by providing accurate and current information and a positive perspective on the years of adulthood and old age. Whitbourne explores the art of successful aging, focusing on how individuals can take an active role in the aging process and make it a rewarding developmental period, filled with vitality and creativity. Now revised with substantially updated references and recent findings, the

second edition combines both research and applied perspectives, and integrates information from the biological, cognitive, and psychosocial perspectives as they relate to the middle and later years of adulthood. The text presents a complete picture of the aging process, with enough information on both adulthood and later adulthood to allow instructors to alter their emphasis according to the needs and interests of students.

Adult Development and Aging SAGE Publications

This work clearly and concisely delivers the most current research findings in the field of adult development and aging.

Adult Development and Aging Pearson Education

For courses in Adult Development and/or Aging, this text separates fact from fiction by contrasting existing myths with the most current empirical data. With a topical approach and a solid research base, written in a style accessible for undergraduates, the text is founded on the authors' expertise in psychology and gerontology. By highlighting important

biological, sociological and medical contributions as well, this text gives an interdisciplinary view of this emergent field.

Adult Development and Aging McGraw-Hill Companies

This comprehensive book helps readers process a clear picture of adult development and aging with the help and results of intensive scientific research. It challenges common stereotypes about this subject matter, and interprets the research data into an optimistic yet realistic appraisal of the many problems faced by the elderly in today's society. Chapter topics look at independence and intimacy in young adulthood; responsibility and failure in the middle years; the reintegration or despair of later life; research methodology; families; careers; personality development; learning and memory; intellectual and biological development; mental disorders; and death and bereavement. For individuals who want to view the potential richness of life— at all stages, and/or understand the lives of older adults they may care for.

Adult Development and Aging McGraw-Hill

Humanities, Social Sciences & World Languages

In a unique series of studies, Harvard University has followed 824 subjects from their teens to old age.

Professor George Vaillant now uses these to illustrate the surprising factors involved in reaching happy, healthy old age.

Adult Development and Aging Prentice Hall

Topically organized, *Adult Development and Aging: Growth, Longevity and Challenges* provides students with a comprehensive understanding of the aging process in adulthood from multiple perspectives. The authors use principles of lifespan development to show readers the directionality of changes in early, middle, and late adulthood. Within its framework of scientific literacy, the text charts four key themes to guide learners: a focus on aging as development; a global perspective on contexts; a vibrant, integrated approach to diverse coverage; and psychological science that translates into real-life

experiences. A final chapter focuses on ways to improve the experience of aging for all adults.
