FOREWORD BY GUY KAWASAKI  
Presentation designer and internationally

acclaimed communications expert Garr Reynolds, creator of the most popular Web site on presentation design and delivery on the Net — presentationzen.com — shares his experience in a provocative mix of illumination, inspiration, education, and guidance that will change the way you think about making presentations with PowerPoint or Keynote. Presentation Zen challenges the conventional wisdom of making "slide presentations" in today's world and encourages you to think differently and more creatively about the preparation, design, and delivery of your presentations. Garr shares lessons and perspectives that draw upon practical advice from the fields of communication and business. Combining solid principles of design with the tenets of Zen simplicity, this book will help you along the path to simpler, more effective presentations. Hearings McGill-Queen's Press - MQUP

Organisation structure can make or break the project manager... New forms of organisation are emerging in the construction industry - from partnering to virtual teams. There is a growing need to consider project organisational structures carefully. This book differs from the many

other texts on project management by concentrating on the challenges of devising relevant structures for project management. It examines the diverse factors to be considered when determining an initial overall organisation for new construction projects. It also looks at how to vary the organisation in response to the differing environments over the lifetime of a project. In a pragmatic, accessible style, the author has both added to the body of knowledge in this area and provided the project management with a set of effectiveness management tools to: examine the criteria for designing structures within an organisation identify the factors relevant to the development of an initial project organisation structure assess the significance of an individual factor in the operation of a structure

ECSCW '99 Taylor & Francis

Business Communication is a comprehensive and authoritative textbook designed to meet the requirements of students of commerce, management and other professionals courses. It serves both as a learner's text and a practitioner's guide. The book provides a sharp focus on all relevant concepts and cardinal

principles of business communication and adds value to the reader's understanding of the subject. Following a simple, need-based and sequential approach, the book is relevant, highly stimulating and readable. It makes learning exciting and prepares the reader to face real-life situations with confidence and understanding.

Strategic planning is the starting point for projects and often the primary reason for a project's success or failure. Project leaders and project-orientated organisations need to understand strategic planning to understand their position and environment, and make rational decisions when selecting and defining their projects and programmes. The authors provide the reader with a straightforward, comprehensive understanding of the basics of project management, including the present status of the discipline, its history, and theoretical foundations. With emphasis on the project life cycle, it is designed to support the IPMA D, C, or B level qualifications, and IPMA Competence Baseline 4.0, providing you with all the information needed to pursue certification. Project: Execution is also an ideal introductory textbook to progressive programmes on strategic planning, with a

focus on collaborative work, open strategy, and an exploration of open strategic planning on a social level. It provides a wealth of learning tools and case studies to demonstrate best practice.

This is the ideal guide to project planning for anyone that wants their planning decisions to be as wise as they are savvy.

Drawing together a wealth of primary sources, J.A. Sokalski examines the aims, inventions, and methods of the pictorial style that defined MacKaye's art. Sokalski shows how MacKaye's famous Madison Square Theatre, which featured a double stage reminiscent of an elevator, created whirling pictorial illusions for fashionable New York. He argues that MacKaye's infamous failure, the colossal Spectatorium theatre for the 1893 Chicago World's Fair, was the most complete realization of this illusionary aesthetic. Sokalski also explores MacKaye's influence on Buffalo Bill Cody and how civil war

cycloramas expanded his concept of pictorial space.

Part of a unique series written for Access to Higher Education students, this book addresses those modules covering psychology, sociology and ethics.

Hort-Agro Project Reports Goyal Brothers Prakashan

You have a useful library of books covering the tools, techniques and aesthetics of animation, but you've been asked to put your production and creative skills to the test to produce a theatrical feature film or to deliver 52 episodes of a television series with only 18 months in the schedule. Producing Animation is your answer. Written by Catherine Winder and Zahra Dowlatabadi and edited by Tracey Miller-Zarneke, Producing Animation is a comprehensive guide to the production industry. Already a relied upon resource by professionals and students alike, this book covers the process from script to screen while defining the role of the producer at each phase. The second edition features new content such as sidebars on key topics from industry

experts, discussions on CG, 2D and stereoscopic production processes, and an overview on marketing and distributing your project. The companion website provides access to sample tables, templates and workflow outlines for CG and 2D animation production.

This book is a collection of my experience teaching lower elementary technology over the course of one year. There are lessons, curriculum documents, and thoughts regarding many issues that can arise while teaching technology to young children. This book is intended to be a reference for those who are interested in starting from scratch or for those who are looking for new ideas on how or what to teach regarding information literacy.

Federal Register Keith Wheeler

This book entitled "I.C.S.E. HISTORY AND CIVICS" is strictly based on the latest revised syllabus prescribed by the Council for the Indian School Certificate Examination for the students of Class IX.

This book forms Paper I of the subjects Civics and History. It has been divided into two sections. Section A deals with the Civics portion of the syllabus and Section B

deals with the History portion of the syllabus. This book aims • to provide an understanding of the working of the Indian government necessary for the student to grow into a responsible, enlightened citizen in a Secular democracy. • to enrich the understanding of those aspects of Indian historical development which are crucial to the understanding of contemporary India. • to awaken a desirable understanding in pupils of the various streams which have contributed to the development and growth of the Indian nation and its civilisation and culture. • to develop a world historical perspective of the contributions made by various cultures to the total heritage of mankind. The main features of this book are : • A simple style with a clear narrative and critical appreciation of all facts and events. • Numerous facts with dates and years, maps, pictures and illustrations given to make the content vivid and interesting. Latest pictures and information provided on each topic. • Lesson At a Glance, summarizes the entire lesson to help the students grasp the main points of the lesson. • Multiple Choice Questions, Short Answer Questions and Structured Essay

'Type Questions, at the end of each and every chapter, will test how far the students have understood the lesson. • A Sample Project has also been added in this new edition. • Questions have been added chapterwise under the heading Question Bank for the benefit of students. The solutions can be accessed through QR Code given at the end of each Chapter. I hope that the present volume shall find favour with both the teachers and the students like my other books published by Goyal Brothers Prakashan. Suggestions for improvement are welcome from teachers, students and other readers of this book.

The subject of financial management is gaining importance in the context of today's business environment. This book attempts to provide a clear understanding of the fundamentals of the subject, including the concepts, theories, models, tools and techniques, and their applications. Its focus on logical discussion, where it is needed for contextual understanding of the topic, makes the book different from others.

Fundamentals of Financial Management is a useful resource for undergraduate students of management and commerce, as well as for practising managers. Key Features • Logical progression of text, from fundamentals and concepts to theories, techniques, and their applications. • Discussion of various tools and their applications in decision making in the context of the situation. • Explanation of various functions of Excel spreadsheet for different applications. • Pedagogical elements to help in better learning—objective questions, worked out examples, as well as unsolved problems. *Survey of Research Projects in the Field of Aviation Safety* Nelson Thornes

The subject of management research methodology is enthralling and complex. A student or a practitioner of management research is beguiled by uncertainties in the search and identification of the research problem, intrigued by the ramifications of research design, and confounded by obstacles in obtaining accurate data and complexities of data analysis. *Management Research Methodology: Integration of Principles, Methods and Techniques* seeks a balanced

treatment of all these aspects and blends problem-solving techniques, creativity aspects, mathematical modelling and qualitative approaches in order to present the subject of Management Research Methodology in a lucid and easily understandable way.

Say GOODBYE to boring old “A is for Apple” books and say HELLO to the exciting, playful world of “My Buddy Knows Letters” by Keith Wheeler. In book 1, My Buddy Knows Letters, children are introduced to our buddy, Josh. This blue-haired, sharp-dressed character will introduce the reader to an item with the catchphrase, “My Buddy Knows”, then a picture of the item, followed by “starts with...”. The reader then decides what letter that item starts with. Once they think they know the answer, they can flip the page and see if they’re right. My Buddy Knows the answers...Do you? Project: Execution PHI Learning Pvt. Ltd. This book develops a critical and theoretical approach to the semiotics of motion pictures as they are applied to a broader range of constructions than

traditional commercial narrative productions. This interdisciplinary approach begins with the problems posed by motion perception to develop a model of cinematic interpretation that includes both narrative and non-narrative types of productions. Contrasting traditional theatrical projection and varieties of new media, this book integrates analyses of title sequences, music videos, and visual effects with discussions on classic and avant-garde films. It further explores the intersection between formative audio-visual cues identified by viewers and how viewers' desires direct engagement with the motion picture to present a framework for understanding cinematic articulation. This new theoretical model incorporates much of what was neglected and gives greater prominence to formerly critical marginal productions by showing the

fundamental connections that link all moving imagery and animated text, whether it tells a story or not. This insightful work will appeal to students and academics in film and media studies. **PROJECT APPRAISAL AND FINANCING, SECOND EDITION** Nova Publishers This book presents an extensive study on the extant constructs of corruption in infrastructure-related projects and aims to contribute to the determination and elimination of its incidence and prevalence in infrastructure projects. The book conducts a comprehensive examination of the various determining factors of corruption that negatively affect the procurement process and, in the end, result in cost and time overruns. The authors present an in-depth understanding of how the identified determining factors of corruption can be addressed. Thus, it is

intended to broaden the reader's knowledge of the causes, risk indicators, and different forms of corrupt practices in the procurement process of infrastructure works, before explaining how they affect its stages and activities A dynamic model is developed to demonstrate how to tackle the overall impact of corruption within the procurement process and, at the same time, increase the effectiveness of the extant anti-corruption measures. In short, this book demonstrates that the fight against corruption in the procurement process is strategically feasible and must continue. This book is essential reading for academics, researchers, professionals and stakeholders in the procurement of infrastructure projects and civil works, as well as those with an interest in corruption, construction management and construction project management.
