**150 Great Tech Prep Careers** John Huntington

(Book). This beginner's guide to the basics of live concert sound mixing and mic techniques is written by industry vet Jerry Slone, whose baptism-by-fire road experiences will teach you need-to-know stuff they simply don't teach in school! It provides easy-to-understand coverage aimed at the novice on topics such as: sound and hearing; microphone models, specs and techniques; mixers; equalization; amplifiers; speakers; the audio chain; schools and universities for continuing education; and much more. Ever since talent show appearances in his pre-teen years, Jerry Slone 's been the guy who got stuck hooking up the PA and trying to tweak it to make it sound better. After graduating from the Recording Industry program at Middle Tennessee State University (MTSU), he road-managed and mixed house audio for a touring band. Today, he works with acts signed to major labels.

Introduction to Show Networking covers the basics of how Ethernet networks provide a platform for entertainment control and audio/video media distribution for concerts, theatre productions, corporate and special events, cruise ship revues, wrestling shows, houses of worship, museum presentations, fountain spectacles—any kind of show presented live for an audience. The book's bottom-up approach was designed with show technicians in mind, starting with the basics and then moving up through cables, network switches, and layering, and on through Ethernet, and network components like TCP, UDP, IP

and subnet masks, all with a practical focus. More advanced concepts are introduced, including broadcast storms and VLANs, along with show networking best practices. Closing out the book is a network design process demonstrated through practical, real-world examples for lighting, sound, video, scenic automation, and show control networks. An appendix covering binary and hexadecimal numbers is also included. This easy-reading book draws from Huntington's Show Networks and Control Systems, the industry standard since 1994, but is completely re-focused, reorganized, and updated.
