This work is a reference grammar of Hup, a member of the Nadahup family (also known as Makú or Vaupés-Japura), which is spoken in the fascinatingly multilingual Vaupés region of the northwest Amazon. This detailed description and analysis is informed by a functional-typological perspective, with particular reference to areal contact and grammaticalization. The grammar begins

with an introduction to the cultural and linguistic background of Hup speakers, gives an overview of the phonology, and follows this with chapters on morphosyntax (nominal morphology, verbs and verb compounding, tense, aspect, modality, evidentiality, etc.); it concludes with discussions of negation, the simple clause, and clause combining. A number of features of Hup grammar are typologically significant, such as its strategy of inversion in question formation, its system of Differential Object Marking, and its treatment of possession. Hup also exhibits several highly unusual paths of

grammaticalization, such as the development of a verbal future suffix from the noun 'stick, tree'. The book also includes a selection of texts and a CD-ROM with audio files.

Nurse Genene Jones and the Texas Baby Murders Tata McGraw-Hill Education

This reference resource represents the consensus opinion a team of international specialists on the diagnosis and treatment of infective endocarditis (IE), many of whom have been co-authors of American or European guidelines on the topic. It is therefore a useful tool for many practitioners: cardiologists and cardiac imagers, cardiac surgeons, echocardiographers, specialists of internal medicine, neurologists, and infectiologists. Infective endocarditis (IE) is defined as

an infection of the endocardial surface of the heart, which may include one or more heart valves, the mural endocardium, or a septal defect. Its intracardiac effects include severe valvular insufficiency, which may lead to intractable congestive heart failure and myocardial abscesses. If left untreated, IE is generally fatal. IE is a changing disease with new diagnostic techniques, new therapeutic strategies, more frequent elderly people and patients with prosthetic valves of intravenous drug users.

Reflexive Ethnography Oxford University Press

"With new examples and the incorporation of MATLAB problems, the fourth edition gives comprehensive coverage of topics not found in any other

texts." (Midwest).

PV power plant integration into the grid has been a relevant topic of interest over the last years. Policies supported by governments, technology maturity, favorable incentives, and cost decreasing have significantly promoted the integration of PV power plants into power systems at the transmission and distribution levels. Nevertheless, some barriers remain in terms of forecasting generation, grid reliability, and power quality, which must be overcome for the massive PV integration into future power systems. Additionally, the ancillary services provided by these generation units are increasingly required by different agents to facilitate grid operation under a high proportion of

renewables. Topics of interest for this Special Issue include the following areas: large-scale PV power plants, energy policies related to PV power plants, grid integration and interaction, PV power plant modeling, monitoring and case studies, communication systems for PV power plants integration, economic analyses, PV inverters and sizing analyses, new trends in PV technologies, and reviews.

Grid-Connected PV Plants
PV power plant integration into the grid has been a relevant topic of interest over the last years. Policies supported by governments, technology maturity, favorable incentives, and cost

decreasing have significantly promoted the integration of PV power plants into power systems at the transmission and distribution levels. Nevertheless, some barriers remain in terms of forecasting generation, grid reliability, and power quality, which must be overcome for the massive PV integration into future power systems. Additionally, the ancillary services provided by these generation units are increasingly required by different agents to facilitate grid operation under a high proportion of renewables. Topics of interest for this Special Issue include the following areas: large-scale PV power plants, energy policies related to PV power plants, grid integration and interaction, PV power plant modeling, monitoring and case studies, communication systems for PV

power plants integration, economic analyses, PV inverters and sizing analyses, new trends in PV technologies, and reviews. Encyclopedia of Biotechnology in Agriculture and Food Full four-color book. Some of the editors created the Bioconductor project and Robert Gentleman is one of the two originators of R. All methods are illustrated with publicly available data, and a major section of the book is devoted to fully worked case studies. Code underlying all of the computations that are shown is made available on a companion website, and readers can reproduce every number, figure, and table on their own computers.

Who Owns our Forests? Forest Ownership in the ECE Region
 Diversion Books

This book is intended for a course that combines machinery and power systems into one semester. It is designed to be flexible and to allow instructors to choose chapters a la carte, so the instructor controls the emphasis. The text gives students the information they need to become real-world engineers, focusing on principles and teaching how to use information as opposed to doing a lot of calculations that would rarely be done by a practising engineer. The author compresses the material by focusing on its essence, underlying principles. MATLAB is used throughout the book in examples and problems. [Climatological Data](#) BoD - Books on Demand

In 1950, Timothy Evans was hanged for the murder of his baby daughter; he was

also assumed to have murdered his wife but 3 years later, another tenant, John Christie, killed six women in the same house. Evans got a posthumous pardon. Edna Gammon's new book casts doubt on the decision and discusses what she believes really happened in that house. *Laparoscopic Urology* Food and Agriculture Organization
The Encyclopedia of Biotechnology in Agriculture and Food provides users with unprecedented access to nearly 200 entries that cover the entire food system, describing the concepts and processes that are used in the production of raw agricultural materials and food product manufacturing. So that users can locate the information they need quickly without having to flip through pages and pages of content, the

encyclopedia avoids unnecessary complication by presenting information in short, accessible overviews.

Addresses Environmental Issues & Sustainability in the Context of 21st Century Challenges Edited by a respected team of biotechnology experts, this unrivaled resource includes descriptions and interpretations of molecular biology research, including topics on the science associated with the cloning of animals, the genetic modification of plants, and the enhanced quality of foods. It discusses current and future applications of molecular biology, with contributions on disease resistance in animals, drought-resistant plants, and improved health of consumers via nutritionally enhanced foods. Uses Illustrations to Communicate Essential

Concepts & Visually Enhance the Text

This one-of-a-kind periodical examines regulation associated with biotechnology applications—with specific attention to genetically modified organisms—regulation differences in various countries, and biotechnology’s impact on the evolution of new applications. The encyclopedia also looks at how biotechnology is covered in the media, as well as the biotechnology/environment interface and consumer acceptance of the products of biotechnology. Rounding out its solid coverage, the encyclopedia discusses the benefits and concerns about biotechnology in the context of risk assessment, food security, and genetic diversity. ALSO AVAILABLE ONLINE This Taylor & Francis

encyclopedia is also available through online subscription, offering a variety of extra benefits for both researchers, students, and librarians, including: Citation tracking and alerts Active reference linking Saved searches and marked lists HTML and PDF format options For more information, visit Taylor & Francis Online or contact us to inquire about subscription options and print/online combination packages. Is the Recent Burst of Therapeutic Anti-Tumor Antibodies the Tip of an Iceberg?

Walter de Gruyter

Reflexive Ethnography is a unique guide to ethnographic research for students of anthropology and related disciplines. It provides practical and comprehensive guidance to ethnographic research methods, but also encourages students to develop a critical understanding of the philosophical basis of ethnographic authority. Davies examines why

reflexivity, at both personal and broader cultural levels, should be integrated into ethnographic research and discusses how this can be accomplished for a variety of research methods. This revised and updated second edition includes: a new chapter on internet-based research and 'interethnography' chapters on selection of topics and methods, data collection and analysis, and ethics and politics of research practical advice on writing up ethnographic study new and updated research examples. Postmodernist relativism can lead to an over-emphasis on reflexivity that denies the possibility of social research. Reflexive Ethnography utilises postmodernist insights – incorporation of different standpoints, exposure of the intellectual

tyranny of meta-narratives – but proposes that reflexive ethnographic research be undertaken from a realist perspective. Reflexive Ethnography will help students to use and understand ethnographic research practices that fully incorporate reflexivity without abandoning claims to develop valid knowledge of social reality.

A Guide to Researching Selves and Others United Nations

In August 20-23, 2004, a conference was held in Kamilche, WA, with the title S2Productivity of Western Forests: A Forest Products Focus.S3 The meeting brought together researchers and practitioners interested in discussing the economic and biological factors influencing wood production and value. One of the underlying assumptions of

the meeting organizers was that management activities would be practiced within a framework of sustaining or improving site productivity; thus, several papers deal with methods to protect or improve productivity or discuss new studies designed to test the effects of various practices. This proceedings includes 11 papers based on oral presentations at the conference, 3 papers based on posters and 2 papers describing the Fall River and Matlock Long-Term Site Productivity study areas visited on the field tours. The papers cover subjects on forest harvesting activities, stand establishment, silviculture, site productivity, remote sensing, and wood product technologies. **Standard Catalog of Baseball Cards** Springer Science & Business Media

Biocatalysis, the application of enzymes as catalysts for chemical synthesis, has become an increasingly valuable tool for the synthetic chemist. Enzymatic transformations carried out by enzymes or whole-cell catalysts are used for the production of a wide variety of compounds ranging from bulk to fine chemicals. The primary consideration for the incorporation of biotransformation in a synthetic sequence is regio- and stereocontrol that can be achieved with enzyme-catalyzed reactions.

Biotransformations are thus becoming accepted as a method for generating optically pure compounds as well as for developing efficient routes to target compounds. This Special Issue aims to address the main applications of biocatalysts, isolated enzymes, and

whole microorganisms in the synthesis of bioactive compounds and their precursors.

Creep and Shrinkage of Concrete
Routledge

The true story of a killer nurse whose crimes were hidden by a hospital for years. It's 1980, and Genevieve Jones is working the 3 to 11 PM shift in the pediatric ICU in San Antonio's county hospital. As the weeks go by, infants under her care begin experiencing unexpected complications—and dying—in alarming numbers, prompting rumors that there is a murderer among the staff. Her eight-hour shift would come to be called “the death shift.” This strange epidemic would continue unabated for more than a year, before Jones is quietly sent off—with a good

recommendation—to a rural pediatric clinic. There, eight children under her care mysteriously stopped breathing—and a 15-month-old baby girl died. In May 1984, Jones was finally arrested, leading to a trial that revealed not only her deeply disturbed mind and a willingness to kill, but a desire to play “God” with the lives of the children under her care. More shocking still was that the hospital had shredded records and remained silent about Jones’ horrific deeds, obscuring the full extent of her spree and prompting grieving parents to ask: Why? Elkind chronicles Jones’ rampage, her trials, and the chilling aftermath of one of the most horrific crimes in America, and turns his piercing gaze onto those responsible for its cover-up. It is a tale with special

relevance today, as prosecutors, distraught parents, and victims’ advocates struggle to keep Jones behind bars. “A horrifying true-life medical thriller...”—Publishers Weekly
“Gripping...A remarkable journalistic achievement!”—Newsweek
“Murder, madness, and medicine...superb!”—Library Journal
“Shocking...true crime reporting at its most compelling.”—Booklist

Indian Trade Journal Elsevier

This book presents a critical assessment of progress on the use of nuclear magnetic resonance spectroscopy to determine the structure of proteins, including brief reviews of the history of the field along with coverage of current clinical and in vivo applications. The book, in honor of Oleg Jardetsky, one of

the pioneers of the field, is edited by two of the most highly respected investigators using NMR, and features contributions by most of the leading workers in the field. It will be valued as a landmark publication that presents the state-of-the-art perspectives regarding one of today's most important technologies.

Catalog of Copyright Entries Springer Science & Business Media

This publication highlights the use of wood for energy and includes the most recent statistics on wood energy markets across the UNECE region. It aims to communicate the relevance of wood energy in the region and help bridge information about the forest and energy sectors. It also intends to offer some of the best-available information

on the role that wood energy can play in various sectors to support environmental, energy, and socio-economic strategies toward a greener economy. It focuses on commercial wood energy uses in the UNECE including energy generated for cooking, heating and electricity generation.

Third series Springer Science & Business Media

This book contains a collection of different research activities that include the biodegradation compounds with contaminant characteristics and special products of different interests as an added value product or that allows following up various biological processes. The chapters consider the degradation of contaminant compounds generated by industrial activities, i.e., oil

industry by-product compounds and halogen compounds or compound generated by natural phenomena such as tsunamis, which require interventions to recover damaged soils. In addition, the book contains chapters that involve special product degradation processes such as chlorophyll, which corresponds to a biological process indicator as photosynthesis.

Infective Endocarditis Mereo Books, mereobook, mereobooks

Milk and dairy products are a vital source of nutrition for many people. They also present livelihood opportunities for farm families, processors and other stakeholders in dairy value chains. Consumers, industry and governments need up-to-date information on how milk and dairy

products can contribute to human nutrition and how dairy-industry development can best contribute to increasing food security and alleviating poverty. This publication is unique in drawing together information on nutrition, and dairy-industry development, providing a rich source of useful material on the role of dairy products in human nutrition and the way that investment in dairy-industry development has changed.

Decomposition Techniques in

Mathematical Programming MDPI

There is much industry guidance on implementing engineering projects and a similar amount of guidance on Process Safety Management (PSM). However, there is a gap in transferring the key deliverables from the engineering group

to the operations group, where PSM is implemented. This book provides the engineering and process safety deliverables for each project phase along with the impacts to the project budget, timeline and the safety and operability of the delivered equipment.

A Grammar of Hup Spon Press

Presents the proceedings of the 5th RILEM International Symposium, held in Barcelona in September 1993. The papers discuss creep and shrinkage of concrete, and should be of interest to cement and concrete technologists and researchers, as well as structural engineers.
