The ADIS16507 provides a simplified, cost effective method for integrating accurate, multi-axis inertial sensing into industrial systems.

MEMS Based Inertial Measurement Units | Analog Devices

The ADIS16460 i Sensor ® device is a complete inertial system that includes a triaxial gyroscope and a triaxial accelerometer. Each sensor in the ADIS16460 combines industry leading i MEMS ® technology with signal conditioning that optimizes dynamic performance. The factory calibration characterizes each sensor for sensitivity, bias, and alignment.

Analog Devices' MEMS IMU Wins Electronics Industry Award ...

The ADIS16448 i Sensor ® device is a complete inertial system that includes a triaxial gyroscope, a triaxial accelerometer, a triaxial magnetometer, and pressure sensors. Each sensor in the ADIS16448 combines industry-leading i MEMS ® technology with signal conditioning that optimizes dynamic performance. The factory calibration characterizes each sensor for sensitivity, bias, and alignment.
