Mastery of light and shade - rendered with accuracy and expressive power - is the key to three-dimensional form in drawing and painting. Here is the first book on this essential subject, the product of years of study by one of the world's great teachers of drawing and an artist of international renown, Burne

Hogarth. Hogarth begins with the simplest kind of light and shade, showing how a dark silhouette on white paper can communicate form and space. He then shows how the silhouette is transformed into three dimensions with the addition of minimal light - the highlight. Following these instructory chapters, Hogarth devotes a separate chapter to each of the given basic categories of light and shade: single-source light; double-source light; flat, diffused light; moonlight; and sculptural light. In these chapters Hogarth illustrates the effects of these different kinds of light on a variety of subjects and examines both natural and artificial light sources. Moving on to more complex lighting effects, Hogarth explains spatial light - how light and shade can create a

sense of "near and far"; environmental light - the effects of weather, time of day, and the changing of seasons; textural light - how light reveals the surface qualities of forms that range from rough stone to silk and satin draperies; transparent light - the effects passing through transparent materials like glass and water, and translucent substances like moving water or sailcloth; fragmentation light - the disrupted light we see in such subjects as fire, rain, and flying snow; radiant light - the intense light we see when we look into the light source itself, which may range from the sun to a candle flame; and finally the various kinds of expressive light invented by the artist - such as the symbolic and mystic light of religious art, or the patterns of light and

shade that convey a mood or a psychological state. Burne Hogarth illustrates every effect of light and shade with brilliant drawings in pencil, charcoal, carbon, pen and ink, and brush and ink, encouraging the reader to experiment with diverse drawing media. Dynamic Light and Shade is an essential volume for everyone who draws and paints.

In 300 extraordinary drawings, Hogarth shows how to draw the head from every angle, age the face from infancy to old age, and delineate every feature and wrinkle.

Force: Animal Drawing The Monacelli Press, LLC

Many artists are unsure how to bridge

the gap between the many basic 'how to draw' books and the more advanced ones dealing with the esoteric details of composition, perspective and anatomy. Force: Animal Drawing is the comprehensive guide to developing artistic animals that are creative, dynamic and anatomical, bridging the gap between foundational art and advanced techniques. Artists and animators alike all find animal inspiration when animating characters- be they human or inhuman. For a unique 'larger than life' character, readers will learn to apply the unique facets of animal movement, locomotion, expressions, facial features, physical build and personality to their traditional and digital art. Readers will also adapt key industry tricks and techniques to personify animal

animations with key characteristics of a human's face. Explore the practical application of force theories and learn from today's leading character designers with the included artist interviews and an extended video tutorial via www.drawingforce.com.
