## **BRENDEN ASHLEY**

South Africa Recent Economic and Political Developments  
Yearbook - Strategic Information and Developments Bloomsbury  
Publishing

This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa, but also of relevance to other areas of the Global South. All chapters are original contributions, providing a state of the art research baseline on key themes in physical, human and environmental geography, and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world, including issues of sustainable development and growth in the Global South.

Improving Learning in South African Schools Lulu.com

Discusses current issues of interest to educators including teacher training and accreditation, multicultural education, burn-out, computers in the classroom, budgetary problems, and the changing curriculum and its meaning for teaching.

From School to Higher Education? IAP

This collection presents new investigations into the role of heritage languages and the correlation between culture and language from a pedagogic and cosmopolitical point of view.

2011 Updated Reprint. Updated Annually. South Africa Recent Economic and Political Developments Yearbook

The Management of the Learner Support System for Grade 12 Learners in the Mankweng Area, Limpopo Province BRILL

This open-access edited collection, focusing on Ghana and Nigeria, offers a transatlantic, transnational exploration of barriers that threaten the wellbeing of West African youth—ranging from Black immigrant youth in the American city

of Newark, New Jersey, to students in Almajiri Islamic schools in Northern Nigeria. Incorporating themes of migration, vulnerability, and agency and aspirations, the book conveys the resilience of African youth transitioning toward adulthood in a world of structural inequality. It thus crosses the academic divide between Youth Studies and African Studies, while challenging conventional framings of Black youth as deficient and deviant—positing instead their individual and collective creativity and assets. The contributors employ different methodological approaches, including field research and autoethnography, from varying multidisciplinary and practitioner perspectives.

Empowering Students and Maximising Inclusiveness and Equality through ICT IAP

Maringe ought to be commended for putting together an invaluable contribution to our understanding of research into a complex education system in South Africa. This volume provides a useful foundation to the current state of education quality in South Africa including the impact of interventions. It also brings to the fore challenges still facing education transformation. The evidence presented which, taken together, lays out a coherent view of how improvements could be made. Albert Chanee Head of Planning, Gauteng Department of Education For too long the weight of educational scholarship produced in South Africa has been limited to that simple and standard form called the literature review. Now, for the first time, education researchers are provided with an African-based text on the concepts and methods of conducting systematic reviews. In this exceptional work of editorship, Felix Maringe brings together some of the leading researchers on South African education to model and demonstrate how to review a significant body of research on a chosen topic which is adjudicated strictly on the basis of the quality and efficacy of the evidence in hand. I have no doubt that this remarkable book will become a standard reference for educational researchers in and beyond the African continent. It will also lift the quality of educational inquiry by equipping a new generation of scholars with the capacity for doing evidence-based research that compels the attention of policymakers, planners and practitioners alike. Prof Jonathan Jansen Stellenbosch University

**Emerging Paradigms** Springer Nature

This text analyses how technical colleges have responded to the emerging field of further education and training (FET) in South Africa. The data and theories presented are the result of research conducted by the Human Sciences Research Council, including surveys of technical college graduates and employers on their satisfaction with college graduates and institutional profiles of local labor markets. The international case studies of vocational and technical education demonstrate the interrelatedness of education and training systems.

The Influence of Language Competency on Learner Academic Achievement A Case Study of Grade 12 Learners and Educators in Capricorn District, Limpopo Province, South Africa

Higher Education Pathways Springer Nature

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate

education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

**West African Youth Challenges and Opportunity Pathways** Routledge

The present book entitled “co-operative learning: a strategy for effective classroom teaching in social science” (An empirical study) has been specially designed to equip the teacher and teacher educators with as much knowledge on all aspects as per recommendations of NPE-1986, NCF-2005 and 2011. Education is one of the most important factors in achieving the developmental goals of a country. Social Science is one among those subjects which is an essential element of education. Social Science is a subject which broadens the horizon of an individual and develops various skills and provides opportunity for the professional growth of an individual. Social Science has become a greater value in the present day; Social Science has spread its net on all over the fields of life. Before the days of early printing when books were not easily available, the knowledge was imparted by the teachers from their own store by lecturing and discussion. With the advancement of educational technology and educational research the educationists evolved many teaching skills and techniques, which resulted in effective teaching. The teachers are required to teach in such a way that the students should learn better, understand well and also feel interested while learning. The scope of the book has been made broad-based and comprehensive and the approach is practical and functional. Practical approach followed in dealing with topics such as model approach with reference to Cooperative learning model, current trends in social science teaching-learning process like collaborative learning approach, methodology, analysis and interpretation of data and at the end findings of research along with educational implications of present study are discussed. The author, therefore hope that this book which is very informative for teachers working at secondary schools and teacher-educators. We hope that this book would meet the needs of both the students, teachers and teacher educators and especially would be researchers in the field of education. We look forward to and appreciate suggestions from the intelligentsia to improve the book.

**Rural Education Across the World** Wakefield Press

Encouraging the participation of girls and women in science, technology, engineering and mathematics (STEM) remains as vital today as it was in the 1970s. ... hence, the sub-title: “A Never Ending Story.” This volume is about ongoing advocacy on behalf of the future workforce in fields that lie on the cutting edge of society’s future. Acknowledging that deeply embedded beliefs about social and academic entitlement take generations to overcome, the editors of this volume forge forward in the knowledge that these chapters will resonate with readers and that those in positions of access will learn more about how to provide opportunities for girls and women that propel them into STEM fields. This volume will give the reader insight into what works and what does not work for providing the message to girls and women that indeed STEM fields are for them in this second decade of the 21st century. Contributions to this volume will connect to readers at all levels of STEM education and workforce participation. Courses that address teaching and learning in STEM fields as well as courses in women’s studies and the sociology of education will be enhanced by accessing this volume. Further, students and scholars in STEM fields will identify with the success

stories related in some of these chapters and find inspiration in the ways their own journeys are reflected by this volume.

*Route to a Burkina Faso – the Land of the Upright Man* HSRC Press

Given the challenges of shortage of skills as informed by low performance in Grade 12 Mathematics, it seemed appropriate that a study on factors behind poor performance in Mathematics amongst grade 12 learners be undertaken. The study explored various factors that contribute to poor performance of learners in Mathematics in grade 12.

*Technical College Responsiveness* Pearson South Africa

This book deals with access to participation in education as a potential to construct inclusiveness and equality.

*The Geography of South Africa* Springer Science & Business Media

This book analyses the nexus between ideology, the state, and education reforms worldwide. The research evinces the neo-liberal ideological imperatives of current education and policy reforms and illustrates the way these shifts in the relationship between the state and education policy are affecting current trends in education reforms and schooling around the globe. With this as its focus, the chapters represent hand-picked scholarly research on major discourses in the field of global education reforms. Offering a compendium of the very latest thought on the subject, this book is, like the others in the series, a state-of-the-art sourcebook for researchers, practitioners and policymakers alike. Not only do the chapters offer a timely analysis of current issues shaping education policy research; the work also contains ideas about future directions that education and policy reforms could take. By doing so, it provides a comprehensive view of the diverse and intersecting discourses on globalisation and policy-driven reforms in education. The book draws on recent studies in the areas of globalisation, education reforms, and the role of the state. Respective chapters critically assess the dominant discourses and debates on education and policy reforms. Using diverse comparative education paradigms, ranging from critical theory to historical-comparative research, they focus on globalisation, ideology and democracy, and examine both the reasons for and outcomes of education reforms and policy change.

*Handbook of Research on Science Education* Idea Publishing

This book brings together authors from United States, South Africa, United Kingdom, China, Canada and Australia to provide insights and case studies from across a range of contexts to explore the interplay between the notions of rurality, innovation and education. The book reveals a hopeful and resilient approach to innovative rural education and scholarship collectively and provides important evidence to speak against an often deficit view of rural education. Three patterns are revealed, namely: the importance of place-attentive strategies, the importance of joined up alliances to maximise resources and networks and finally, the need to utilize alternative methodologies and frameworks that have a starting point of difference rather than deficit for any rural initiative or approach. By drawing from international examples and responding in innovative ways to rural education challenges, this book provides an opportunity to share international insights into innovations, interventions and partnerships that promote and support rural education in its broadest sense.

**Learner Destinations and Labour Market Environments in South Africa** AOSIS

This study gives statistical and evidential illustration to what influences student choices and behavioral patterns as well as trends in the youth market in South Africa.

**Medium of Instruction Policies** Springer Nature

Aspiring to be upright and honourable: This book is about

metaphorical bricks (small things) that make walls of all types of buildings within which people work and live. The figurative walls in the pages of this book are the Noah social types of the holy Bible. Behaviour is the function of character. A well-behaved person, young and old, develops to be a paragon of virtue, a rare species amongst the peoples of this world. Universal and generic good behavior project starts with casual greeting one's family members in the morning and after intervals of absence from one's home. Greeting people anywhere should be spontaneous. Children learn being courteous from their homes, same as telling the truth all the time giving lies no space. Hence building average good and steadfast citizenry is the responsibility of each homestead and family. If being sturdy is the essential feature of leadership, then every citizen in any country in the world can have her/his turn to lead.

**Perspectives on Multigrade Teaching** Africa Institute of South Africa

"This paper presents a quantitative overview of the current South African independent schooling sector. Historically, research on the sector has been partial, resulting in questions about its current size and profile. A recent survey revealed that the sector has grown considerably since the nineties and that official sources underestimate its size. Some popular myths about the sector being largely white and elitist are dispelled by the study, which shows that historically disadvantaged learners currently constitute more than 70% of all learners and that more than 50% of all schools charge low to average fees. However, there is also evidence of new forms of inequity emerging and poor performance in parts of the independent sector, of which roleplayers in the sector should be aware."--HSRC website.

*Education in a New South Africa* The Influence of Language Competency on Learner Academic Achievement A Case Study of Grade 12 Learners and Educators in Capricorn District, Limpopo Province, South Africa Language is considered to be a crucial means of gaining access to knowledge and skills. It is the key to cognitive development which promotes or impedes scholastic success. Communicative or language competence refers to the capacity of persons to select, recognise and organise the language variety appropriate to the occasion, situation and subject matter at hand. Language competency assists learners to construct and integrate acquired information to one's own understanding. It is therefore pivotal to encourage education reforms through core knowledge that building a strong oral language and early development could result in future academic success. This study examined the influence of language competence on the academic achievement of Grade 12 learners in selected schools of the Capricorn District (Limpopo Province in South Africa). The purpose of this study was to establish the challenges that learners and educators experience in communicating for teaching and learning purposes. The study also investigated the language factors that influence their academic achievement. Higher Education Pathways South African Undergraduate Education and the Public Good

*Challenges and Issues facing the Education System in South Africa* Routledge

This scholarly book is the third volume in an NWU book series on self-directed learning and is devoted to self-directed learning research and its impact on educational practice. The importance of self-directed learning for learners in the 21st century to equip themselves with the necessary skills to take responsibility for their own learning for life cannot be over emphasised. The target

audience does not only consist of scholars in the field of self-directed learning in Higher Education and the Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors. The book contributes to the discourse on creating dispositions towards self-directed learning among all learners and adds to the latest body of scholarship in

terms of self-directed learning. Although from different perspectives, all chapters in the book are closely linked together around self-directed learning as a central theme, following on the work done in Volume 1 of this series (Self-Directed Learning for the 21st Century: Implications for Higher Education) to form a rich knowledge bank of work on self-directed learning.
