Match-Fixing and Sport studies match-fixing in historical perspective, revealing how match-fixing has always been a major sporting continuity, alongside another longstanding continuity, a widely-held belief in a mythical recent past of pristine purity. The volume begins with a brief overview of match-fixing's global contemporary contexts, the broad range of sports where it now surfaces, increased recognition of its moral, social, and economic threat, and the varied responses of leading sports organizations, legal gambling operators, police forces, governmental departments, and regulators. The following chapters explore the challenges of finding any reliable evidence of match-fixing in the past. An overview shows that match-fixing has been a major and

substantial longstanding historical continuity in sport, usually but not always is linked to gambling and sporting materialism.

Examples are brought forward to show that it could be found in Ancient Greece and Egypt and was widespread across the early modern and modern periods around the globe. Overall, the volume assists scholars by suggesting some key questions which a future agenda for the historical study of match-fixing might address. Revealing how high-stakes betting, dishonest dealings and suspicious performances can be found throughout history, Match-Fixing and Sport will be of great interest to scholars of Sport History and Sport Ethics. This book was originally published as a special issue of The International Journal of the History of Sport.

"Every once in a while an author arrives with the rare talent to combine reality with romance. This is Janis Reams Hudson." —RT BOOK REVIEWS The stigma of his heritage has made Hawk accustomed to ridicule in Comanche County. Shunned by nearly everyone in town, he finds comfort in the one person who always accepted him: the beautiful Abby McCormick. But even as their childhood friendship blossoms into a passion neither of them can

keep at bay, they know that Abby's father will never accept their love. Then, after an evening with Abby, Hawk is ambushed and beaten. Believing him dead, Abby spends four years mourning him. But when, against all odds, he storms back into her life, her hope for a love that never had a chance to truly be realized is restored. Hawk has returned for more than Abby, though. With his sights set on revenge, will he miss his second chance at the love that is right before his eyes?

User friendly, concise, and thorough, Bradley Erford's 40 Techniques Every Counselor Should Know gives students a succinct look at the theoretical basis underlying each of 40 counseling techniques, and the common variations that can be used to ensure their successful implementation. The book identifies techniques from diverse theoretical approaches, including: Brief Counseling; Adlerian or Psychodynamic, Gestalt; Mindfulness; humanistic-phenomenological; Social Learning; Cognitive; Behavioral; and Cognitive-behavioral. Transcripts and descriptions show step-by-step how to implement the techniques, outcome research on each technique helps in determining which techniques are best for use with various populations, and multicultural implications help readers learn more about applying each technique and approach to counseling clients from diverse cultures. Added to this new edition are: new chapters on Journaling, Miller and Rollnick's motivational interviewing, self-disclosure, empathic confrontation, and strength bombardment; new sections on mindfulness-based procedures and humanistic-phenomenological approach to counseling; a number of new, edited, or expanded transcripts; and; thorough updating of sources throughout.

This best-selling book is also “#1 book in motorcycle safety”

(Nielsen BookScan) and essential reading for all motorcyclists

regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called “Motorcycle Dynamics,” Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider’s safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider’s braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called “Cornering Habits” is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough’s skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough’s voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it’s road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or “blind” truck drivers. The book offers the kind of first-hand experience that can literally save riders’ lives, as illustrated in the chapters “Booby Traps” and “Special Situations,” which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, “Sharing the Ride,” is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms;

and a complete index.

More than a memoir of a custom cafe racer build this book is a tribute to a teacher who inspired young people to be creative with their minds and capable with their hands. Growing up in Fargo, North Dakota in the 1970s and 80s, The Urban Monk had the opportunity to develop a love for machines, metal working and motorcycles. This book provides a glimpse into what life was like for the author and his young friends in Fargo during that time. It is also a poignant defense of industrial arts education in public schools. After an over three year effort building a custom cafe racer in his spare time and documenting the entire process in videos shared with the world on his YouTube channel Urban Monk TV, the author tells the story of how this project became more than a custom motorcycle build - it became a tribute to his middle school Metal Shop teacher who inspired him to go on to a life time of peaceful meditation in his garage with a wrench in his hand. Anyone interested in motorcycles, mechanics, do-it-yourself projects or a historical retrospective of life in 70s-80s Fargo will enjoy this pleasant read.
