Every year at the High-level Political Forum, an annual theme helps an increased focus along

with an in-depth review of a selection of Sustainable Development Goals (SDGs). In 2018, SDG 6 on water and sanitation is one of the goals to be reviewed. To provide input to Member States on this goal, UN-Water has produced the SDG 6 Synthesis Report 2018 on Water and Sanitation. This represents a joint position

from the UN family on the global status on SDG 6 and other water-related targets. The report also explores the linkages within SDG 6 targets and the interlinkages between SDG 6 and the other targets and indicators. The report builds on the baseline data on SDG 6 global indicators coming from JMP, GEMI and

GLAAS.

Concepts of Biology is
designed for the single-
semester introduction to
biology course for non-
science majors, which for
many students is their
only college-level science
course. As such, this
course represents an
important opportunity for
students to develop the
necessary knowledge,
tools, and skills to make
informed decisions as
they continue with their
lives. Rather than being
mired down with facts and
vocabulary, the typical
non-science major student

needs information
presented in a way that is
easy to read and
understand. Even more
importantly, the content
should be meaningful.
Students do much better
when they understand
why biology is relevant to
their everyday lives. For
these reasons, Concepts
of Biology is grounded on
an evolutionary basis and
includes exciting features
that highlight careers in
the biological sciences
and everyday applications
of the concepts at
hand. We also strive to
show the

interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and

clicker questions to help students understand--and apply--key concepts.
