Connect with Santrock 6th edition and connect with success.

Informed and driven by research. At McGraw-Hill, we have spent thousands of hours with you and your students, working to understand the key needs and concerns you face in Human Development courses. The most common topics raised include managing the vast amount of content inherent to a Lifespan course and ensuring the dependability of the assigned material—is it current and accurate? The result of this research is John Santrock's A Topical Approach to Lifespan Development 6e. Santrock 6e ensures students complete and understand the assigned material in a number of ways. Santrock's hallmark Learning Goals pedagogy provides a comprehensive roadmap to the text material, clearly pointing out the core concepts fundamental to students' learning and performance. An adaptive learning system increases students' efficiency in studying by identifying what they know and don't know and providing in-the-moment guides to learning what they do not. The research and development of the 6th edition indicated that students said that highlighting connections among the different aspects of life-span development would help them to better understand the concepts. This recurring theme of connections—Developmental Connections, Topical Connections, Connecting Development to Life, Connecting with Careers, and Connections through Research—ties together

concepts from across chapters to reinforce the learning process and connects the material to students' everyday lives and future aspirations. And the new Milestones video and assessment program helps bring the course material to life, so your students can witness development as it unfolds. And of course, all of this material is informed by our unique board of expert contributors—a who's who of developmental psychology—who ensure the material is as accurate and up-to-date as possible.

This revised and expanded second edition of *Created to Learn*—an ECPA Gold Medallion Award finalist—shows teachers how to organize and tailor classroom instruction to fit the learning styles of their students. In a real sense, author William R. Yount takes the theories of teaching and learning and brings them to life inside the classroom. Additional content in this updated edition includes:

- More information on new research into learning theories, including discoveries in the field of neuroscience that provide far more detail about brain function.
- New chapters on Constructivism and brain-based learning.
- Updated research from Yount's teaching experiences in other countries.
- Full rewrite of original text, condensing material that has moved into other books, removing data found to be less helpful, and adding research that provides support for evolving ideas about cognitive and humanistic learning theory systems, designing instructional objectives, and the revolution in brain science.

*Lives in Context* McGraw-Hill Education

John Santrock's A Topical Approach to Life-Span Development text continues with the themes of research, applications, and contexts that he is famous for. Students and instructors alike love it for its pedagogy and accessible writing. Building on these strengths, the fourth edition features more current research, more applications including new Careers in Life-Span Development profiles, and a new Visual Assets Database for Instructors.

This thorough revision of the highly successful first edition of *Life-Span Development* offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasizes that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management, education and social work.

Chronologically organized, *Lifespan Development: Lives in Context* offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.

Gregg Shorthand Series 90 -Trans. Tapes McGraw-Hill Education *Essentials of Life-Span Development* is organized chronologically and covers all periods of the human life span, from the prenatal period through late adulthood and death. Providing a broad overview of life-span development, this text especially gives attention to the theories and concepts that students seem to have difficulty mastering.
