As a mother, are you comfortable in your skin? Want to know how best to be a stay-at-home or working mum? Babies have very simple needs, yet many parents are overwhelmed with elaborate advice on how to meet them. In *How Not to F\*\*\* Them Up*, leading child psychologist Oliver James argues that your under-threes do not need training; it's getting your head straight as a parent that's important. Drawing on extensive interviews and the latest clinical research, James identifies three basic types of mum: the Hugger, the Organiser and the Fleximum. Outlining the benefits and pitfalls of each, *How Not to F\*\*\* Them Up* shows you how to recognise which style suits you best and outlines simple strategies to reconcile personal ambitions with the needs of your family. Empowering and provocative, Oliver James will help you make the best choices for bringing up a happy, confident child.

Coyuntura económica Haynes Manuals N. America, Incorporated

The story of a man that brought his own personal style to the world of industrial design, from automobiles to powerboats. Some 50 years after his design masterpieces wrested styling leadership away from General Motors - Harley Earl. Thirty four years after his untimely death, Virgil Exner's name still remains inexorably linked to the Chrysler Corporation in the minds of car enthusiasts

worldwide. For an all too brief period, Exner's name epitomised all that was great and exciting in America. His thrilling automobile designs from the mid-fifties took the world by storm and put Chrysler at the top. His work was nothing less than a revolution. Until the mid-fifties, engineers, creating cars that were reliable but invariably staid and conservative, had dominated auto design. Exner introduced to Chrysler, firstly with his 'idea cars' then with production models, vehicles that were wanted for their looks but at the same time, were soundly engineered; automobiles that carried classic proportions and gave the illusion of movement even whilst stationary. His design of the 1947 Studebaker established the design pattern for all modern cars and was a huge success. Along with automobile styling, his talents stretched to many other areas of industrial design, from trains to trucks and boats to Buicks. This book gets behind the character of the man, his strengths and weaknesses, his personal tragedies and his vision of modern transport. Uncover why he set up in competition with Raymond Loewy, get the real facts behind historic inaccuracies and why he was made scapegoat for the sales disaster of the early sixties, Then delight in his fine artwork and his love of motor racing. With many previously unseen works of art and family photos among the 150 colour images throughout this is a unique and fascinating insight into a pivotal player in the development of the modern automobile.

Datsun's initial offerings were fairly conventional family cars, but with the introduction of the 240Z in 1969 the marque's image received a massive boost. It was a runaway success, outselling every European sports car model in the lucrative North American market. The 280Z arrived in 1975 followed by the 280ZX in 1978 and sales of the 280ZX had reached over 446,000 units by the time production came to an end in 1983. 44 international articles include road, track and comparison tests, a service guide plus full technical and performance data.

Este libro, éxito de ventas a nivel mundial, desafía todo lo que creías saber sobre los requisitos imprescindibles para tener éxito en tus negocios. Actualizado con nuevo contenido, La estrategia del océano azul sostiene que la competencia encarnizada queda reducida a un océano ensangrentado de rivales que luchan por unos beneficios cada vez más pequeños. Basado en un estudio de 150 estrategias (que cubre más de 100 años a través de 30 sectores empresariales), los autores muestran que el éxito duradero no tiene su origen en las batallas libradas con los competidores sino en la creación de "océanos azules" -nuevos espacios de mercado sin explotar que están maduros para el crecimiento.
