New information from *We Have Your Daughter* has been revealed. Here is some of it. The Family As a top reporter in Denver, Paula Woodward was one of the few who had access to the Ramsey attorneys and thus the family. One of the prevailing questions in most of the television specials is about the bowl of pineapple on the kitchen table with Burke and Patsy's fingerprints on the bowl. That pineapple has been linked to JonBenét's death on some television broadcasts because of a reference in the autopsy to JonBenét having “fragments like pineapple” in her stomach. For more than a year after the murder, the pineapple theory behind her death was talked about. But when Boulder police finally had the material in her stomach tested at the University of Colorado in Boulder in October of 1997, they found out two months later in December, that the material was pineapple, plus grapes, grape skins, and cherries. That is food similar to that found in a fruit cocktail. What does that mean? This is the type of exclusive and factual information you will find in *We Have Your Daughter* that allows you to challenge preconceived theories. In 2010, Woodward interviewed Burke Ramsey specifically for her book. • Burke discussed his family and the chaos surrounding the case. Woodward has obtained a Boulder Social Services Evaluation of the Child about Burke Ramsey that states “From the interview it is clear that Burke was not a witness to JonBenét's death.” That raises more doubts about those who believe Burke was involved in his sister's death and again reinforces the information Woodward has researched and uncovered. • In an interview with Burke Ramsey from 2010, he talks about his mom and how she taught him he could be optimistic or pessimistic about all the tragedies in their family. She chose positive for herself and so did he both believing it was important to find joy in each day. • After Patsy Ramsey was diagnosed again with cancer in 2002, she began sharing private conversations with Paula in 2004 and 2005. This information was to be used after she died. • John Ramsey gave Paula access to his personal journal as well as access to JonBenét's personal drawings and photos The Handwriting Test Results Handwriting is another key controversial part of this investigation and story. Paula has information and findings that show issues with how Boulder Police handled this aspect of the investigation. She discusses the results of the handwriting. Exclusive Reports & Documents Investigative Reporter Paula Woodward reviewed portions of thousands of police reports and documents for her book. Here are some highlights of her findings which she includes in the book, all of which affected the investigation and the public's view of the family. Exclusive: The police report from the Boulder Police Officer who was FIRST to arrive on scene the morning of December 26, 1996 – before JonBenét's body was found and why he didn't find it. Exclusive: In the police report from the BPD Detective who stayed on scene until JonBenét's body was found – Paula lists some discrepancies in that report. Exclusive: Paula discovered what she calls a “deliberate campaign of disinformation” by law enforcement, based on information she received from her sources. She also cites issues with the media coverage, with outlets reporting information without verifying it. Woodward says much of the information and “anonymous leaks” reported were untrue and has all had an effect on the investigation. She cites several examples. Exclusive: Paula found found that Boulder police withheld the results of the DNA tests that excluded the Ramsey family from both the Boulder district attorney and the public. The evidence that was submitted as DNA excluded the Ramseys. In *We Have Your Daughter: The Unsolved Murder of JonBenét Ramsey Twenty Years Later*, Emmy Award-winning investigative journalist Paula Woodward offers an unprecedented, definitive, insider perspective on the twentieth anniversary of one of the most heinous, sensationalized, unsolved crimes in American history. Here for the first time, Woodward examines conversations and information from all sides of those involved in the case. She shares information compiled during the twenty years she reported on the murder, including private conversations with law enforcement individuals directly involved in the case, their thoughts and dissections of what went wrong and right, and who they now believe is the killer. Woodward has included drawings by JonBenét, letters from her teachers, and photographs that show a normal, happy six-year-old whose life was cut short in such a horrible manner. She shares portions of John Ramsey's private journal, where he wrote of his torment and grief in the aftermath of the murder. And she recounts personal conversations with JonBenét's mother prior to her death from cancer in 2006. JonBenét's brother Burke talks publicly about his sister's death and how it affected the

family and his life. We have *Your Daughter* is an extraordinary work of journalism, twenty years in the making. It depicts a family under siege with their guilt or innocence still openly questioned. This book allows readers to decide in this heartbreaking story - was it Ramsey or an unknown intruder? **Theories of Psychotherapy & Counseling: Concepts and Cases** Springer Science & Business Media

**Personality** Cambridge University Press

Is there such a thing as an 'entrepreneurial personality'? What makes someone an entrepreneur is a question that has intrigued the lay person and the scholar for many years, but can such a personality be identified or is it simply a socially constructed phenomenon? Elizabeth Chell pursues an alternative line of argument: to show that the entrepreneurial personality is, on the one hand, socially constructed, but on the other hand, presents consistency in behaviours, skills and competencies. This second edition of the highly acclaimed *The Entrepreneurial Personality* revisits the topic and updates the evidence from a multi-disciplinary perspective. The book carefully weaves together the arguments and views from economists,

sociologists and psychologists in order to develop a strong conceptual foundation. It discusses the inferences that these experts have made about the nature of entrepreneurs and the entrepreneurial process, and explores whether such evidence has enabled psychometricians to develop robust instruments for assessing the characteristics of entrepreneurs. The evidence for a range of purported traits is reviewed and the models and research designs of interested social scientists are explained and evaluated. Throughout, Chell laces her argument richly with a set of cases derived from primary and secondary sources. This book presents a timely set of views on the entrepreneurial personality, and will be of great interest to academics in the fields of entrepreneurship, economics, management, applied psychology and sociology. This accessible text will also appeal to the interested general reader, as well as practitioners and consultants dealing with entrepreneurs in the field.

This unique workbook was written for the undergraduate Personality course where professors are looking for activities to help students learn and apply personality theories to real-life examples. The workbook is geared toward personality courses that are theories-based, as opposed to research-based. Because the cases explored are those based on normal behavior (as opposed to abnormal behavior), this workbook is especially useful. While most personality texts present the major concepts of personality theories, they don't help students apply the theories they have learned or to use the theories to understand other examples on their own. This workbook will help students do just that and is the perfect complement to any Personality text.
