pedal. Today due to non renewable energy cries its basic need to utilize the energy from other way. or save the energy. This project includes the construction and utilization of the peddling washing machine which can with any amount of requirement. Pedal Operated Washing Machine Project Report Pdf Download Pedal Powered Washing Machine (PPWM) is a

low cost washing machine made up of easily and readily available scrap parts in daily life. It is a machine which generates power through human pedaling and with the drive mechanism, converts the pedaling motion into required rotary motion of the drum. Its innovation lies in its simple design, use of inexpensive parts, very low repairing and maintenance cost,

affordability to each member of the society and it does not affect the environment.
