NATIONAL BESTSELLER • From the author of the New York Times bestseller *Choke* and the cult classic *Fight Club*, a cunningly plotted novel about the ultimate verbal weapon, one that reinvents the apocalyptic thriller for our times. "A harrowing and hilarious glimpse into the future of civilization." —Minneapolis Star-Tribune

Ever heard of a culling song? It's a lullaby sung in Africa to give a painless death to the old or infirm. The lyrics of a culling song kill, whether spoken or even just thought. You can find one on page 27 of *Poems and Rhymes from Around the World*, an anthology that is sitting on the shelves of libraries across the country, waiting to be picked up by unsuspecting readers. Reporter Carl Streater discovers the song's lethal nature while researching

Sudden Infant Death Syndrome, and before he knows it, he's reciting the poem to anyone who bothers him. As the body count rises, Streator glimpses the potential catastrophe if someone truly malicious finds out about the song. The only answer is to find and destroy every copy of the book in the country.

Accompanied by a shady real-estate agent, her Wiccan assistant, and the assistant's truly annoying ecoterrorist boyfriend, Streator begins a desperate cross-country quest to put the culling song to rest.

Have you ever woken up in the morning to find that your socks have gone missing? You've searched high and low for them, only to wonder if The Phantom Sock Eater has taken them. Maybe he's eaten them or maybe you just haven't looked hard enough for your socks. You could make a fiendish plan to catch him if you can, but you would have to stay awake, and that might be difficult especially if you are tired. Maybe trust your kitty cat to protect your socks, and he will keep a watchful eye as he looks towards the moonlit sky. So when you go to bed, make sure that your socks are safely put away in the sock drawer, and sleep well because you never know when the hungry phantom will come a-calling.

NEW YORK TIMES BESTSELLER * NEW YORK TIMES NOTABLE BOOK OF 2019 * WINNER OF THE J ANTHONY LUKAS WORK-IN-PROGRESS AWARD * FINANCIAL TIMES' BEST BOOKS OF 2019 * NPR FAVORITE BOOKS OF 2019 * FINALIST FOR THE FINANCIAL

TIMES/MCKINSEY BUSINESS BOOK OF 2019 * KIRKUS REVIEWS BEST BOOKS OF 2019 * SCHOOL LIBRARY JOURNAL BEST BOOKS OF 2019 "Superb...Among the best books ever written about an American corporation." —Bryan Burrough, The New York Times Book Review Just as Steve Coll told the story of globalization through ExxonMobil and Andrew Ross Sorkin told the story of Wall Street excess through Too Big to Fail, Christopher Leonard's Kochland uses the extraordinary account of how one of the biggest private companies in the world grew to be that big to tell the story of modern corporate America. The annual revenue of Koch Industries is bigger than that of Goldman Sachs, Facebook, and US Steel combined. Koch is everywhere: from the fertilizers that make our food to the chemicals that make our pipes to the synthetics that make our carpets and diapers to the Wall Street trading in all these commodities. But few people know much about Koch Industries and that's because the billionaire Koch brothers have wanted it that way. For five decades, CEO Charles Koch has kept Koch Industries quietly operating in deepest secrecy, with a view toward very, very long-term profits. He's a genius businessman: patient with earnings, able to learn from his mistakes, determined that his employees develop a reverence for free-market ruthlessness, and a master disrupter. These strategies made him and his brother David together richer than Bill Gates. But there's another side to this story. If you want to understand how we killed the unions in this country, how we widened the income divide, stalled progress on climate change, and how our corporations bought the influence industry, all you have to do is read this book. Seven years in the

making, Kochland “is a dazzling feat of investigative reporting and epic narrative writing, a tour de force that takes the reader deep inside the rise of a vastly powerful family corporation that has come to influence American workers, markets, elections, and the very ideas debated in our public square. Leonard’s work is fair and meticulous, even as it reveals the Kochs as industrial Citizens Kane of our time” (Steve Coll, Pulitzer Prize-winning author of *Private Empire*). *The Master Key System* Basic Books

A Turing Award-winning computer scientist and statistician shows how understanding causality has revolutionized science and will revolutionize artificial intelligence “Correlation is not causation.” This mantra, chanted by scientists for more than a century, has led to a virtual prohibition on causal talk. Today, that taboo is dead. The causal revolution, instigated by Judea Pearl and his colleagues, has cut through a century of confusion and established causality -- the study of cause and effect -- on a firm scientific basis. His work explains how we can know easy things, like whether it was rain or a sprinkler that made a sidewalk wet; and how to answer hard questions, like whether a drug cured an illness. Pearl’s work enables us to know not just whether one thing causes another: it lets us explore the world that is and the worlds that could have been. It shows us the essence of human thought and key to artificial intelligence. Anyone who wants to understand either needs *The Book of Why*.

“Boaler is one of those rare and remarkable educators who not only know the secret of great teaching but also know how to give that gift to others.” — CAROL DWECK, author of *Mindset* “Jo Boaler is one of the most creative and innovative educators today. *Limitless Mind* marries cutting-edge brain science with her experience in the classroom, not only proving that each of us has limitless potential but offering strategies for how we can achieve it.” — LAURENE POWELL JOBS “A courageous freethinker with fresh ideas on learning.” — BOOKLIST In this revolutionary book, a professor of education at Stanford University and acclaimed math educator who has spent decades studying the impact of beliefs and bias on education, reveals the six keys to unlocking learning potential, based on the latest scientific findings. From the moment we enter school as children, we are made to feel as if our brains are fixed entities, capable of learning certain things and not others, influenced exclusively by genetics. This notion follows us into adulthood, where we tend to simply accept these established beliefs about our skillsets (i.e. that we don’t have “a math brain” or that we aren’t “the creative type”). These damaging—and as new science has revealed, false—assumptions have influenced all of us at some time, affecting our confidence and willingness to try new things and limiting our choices, and, ultimately, our futures. Stanford University professor, bestselling author, and acclaimed educator Jo Boaler has spent decades studying the impact of beliefs and bias on education. In

Limitless Mind, she explodes these myths and reveals the six keys to unlocking our boundless learning potential. Her research proves that those who achieve at the highest levels do not do so because of a genetic inclination toward any one skill but because of the keys that she reveals in the book. Our brains are not “fixed,” but entirely capable of change, growth, adaptability, and rewiring. Want to be fluent in mathematics? Learn a foreign language? Play the guitar? Write a book? The truth is not only that anyone at any age can learn anything, but the act of learning itself fundamentally changes who we are, and as Boaler argues so elegantly in the pages of this book, what we go on to achieve.
