Trials of the Diaspora Informa Law from Routledge

The denial of the Holocaust has no more credibility than the assertion that the earth is flat. Yet there are those who insist that the death of six million Jews in Nazi concentration camps is nothing but a hoax perpetrated by a powerful Zionist conspiracy. Sixty years ago, such notions were the province of

pseudohistorians who argued that Hitler never meant to kill the Jews, and that only a few hundred thousand died in the camps from disease; they also argued that the Allied bombings of Dresden and other cities were worse than any Nazi offense, and that the Germans were the “true victims” of World War II. For years, those who made such claims were dismissed as harmless cranks operating on the lunatic fringe. But as time goes on, they have begun to gain a hearing in respectable arenas, and now, in the first full-scale history of Holocaust denial, Deborah Lipstadt shows how—despite tens of thousands of living witnesses and vast amounts of documentary evidence—this irrational idea not only has continued to gain adherents but has become an international movement, with organized chapters, “independent” research centers, and official publications that promote a

“revisionist” view of recent history. Lipstadt shows how Holocaust denial thrives in the current atmosphere of value-relativism, and argues that this chilling attack on the factual record not only threatens Jews but undermines the very tenets of objective scholarship that support our faith in historical knowledge. Thus the movement has an unsuspected power to dramatically alter the way that truth and meaning are transmitted from one generation to another.

Artificial Intelligence (AI) has become omnipresent in today's business environment: from chatbots to healthcare services to various ways of creating useful information. While AI has been increasingly used to optimize various creative and innovative processes, the integration of AI into products, services, and other operational procedures raises significant concerns across virtually all areas of intellectual property (IP) law. While AI has drawn extensive attention from IP experts globally, this is the first book providing a broad and comprehensive picture from the perspectives of the very nature of AI technology, its commercial implications, its interaction with different kinds of IP, IP administration, software and data, its social and economic impact on the innovation policy, and ultimately AI's eligibility as a legal entity.

This book examines the new Vienna Rules and the Austrian Arbitration Act that both came into effect on 1 July 2006 as the result of a major reform. It is devoted to two principles. First, it recognizes that no two international arbitrations are the same. Arbitration thrives, and is today the predominant method of transnational dispute resolution, because it meets the demands of international business for flexibility and efficacy. Arbitration will continue to succeed if it retains those properties, allowing for the adoption of procedures that are customized to satisfy the commercial prerogatives of the individual case. This book seeks to provide its readers with a general framework, and specific instruments, to negotiate that process.

International Arbitration in Italy Kluwer Law International B.V. Julius's critically acclaimed study (looking both at the detail of Eliot's deployment of anti-Semitic discourse and at the role it played in his greater literary undertaking) has provoked a reassessment of Eliot's work among poets, scholars, critics and readers, which will invigorate debate for some time to come.

Artificial Intelligence and Intellectual Property Simon and Schuster

Arbitrating cross-border business disputes has been common practice in Italy since centuries. It is no wonder, then, that Italian arbitration law and jurisprudence are ample and sophisticated. Italian courts have already rendered thousands of judgments addressing complex problems hidden in the regulation of arbitration. Italian jurists have been among the outstanding

members of the international arbitration community, starting from when back in 1958, Professor Eugenio Minoli was among the promoters of the New York Convention. Being Italy the third-largest economy in the European Union and the eighth-largest economy by nominal GDP in the world, it also comes as no surprise that Italian companies, and foreign companies with respect to the business they do in the Italian market, are among the main 'users' of international arbitration, nor that Italy is part to a network of more than 80 treaties aimed to protect inbound and outbound foreign direct investments and being the ground for investment arbitration cases. Moreover, in recent years, Italy has risen to prominence as a neutral arbitral seat, in particular for the settlement of 'intra-Mediterranean' disputes, also thanks to the reputation acquired by the Milan Chamber of Arbitration which has become one of the main European arbitral institutions. This book is the first commentary on international arbitration in Italy ever written in English. It is an indispensable tool for arbitrators, counsel, experts, officers of arbitral institutions and judges who happen to be involved in arbitral proceedings or arbitration-related court proceedings somewhat linked to the Italian legal system, either because Italy is the seat of the arbitration, the Italian jurisdiction has been ousted by a foreign-seated arbitration, the assistance of Italian courts is sought for the granting of interim measures or the enforcement of a foreign award or the arbitration results from a multilateral or bilateral investment protection treaty to which Italy is a party. This book may also be of general interest for scholars and practitioners of international arbitration at large to the extent that it deals with the 'theory' of international arbitration and illustrates original

solutions offered by Italian arbitration law to various complex issues, such as: the potential conflicts (and required balance) between party autonomy and State sovereignty in the governance of arbitrations; the relationship between the New York Convention and the legal system of the State of the arbitral seat; the potential impact on cross-border arbitrations of insolvencies, human rights, or European Union law; the arbitrability of corporate disputes; the extension of arbitration agreements to 'necessary parties'. Appendixes include an English translation of the main provisions of Italian law relevant to arbitration, a list of the investment protection treaties to which Italy is a party, and an English version of the Rules of Arbitration of the Milan Chamber of Arbitration. The author, who is full professor of international law, name partner of ArbLit (the first Italian boutique focusing on cross-border dispute settlement) and the current Italian member of the ICC Court of Arbitration, has written the book aiming to combine his academic background with his long-standing experience as counsel and arbitrator.

A Commentary John Wiley & Sons

This book is an essential resource for anybody involved in arbitration. It is an updated section-by-section commentary on the Arbitration Act 1996, split into a separate set of notes for each section, and subdivided into the relevant issues within that section. It contains elements of international comparative law, citing authorities from many other common law and civil law jurisdictions. Beyond the development of law since the last edition, this sixth edition contains new practical features to aid the reader. Each section now has a new contents table, with each separate topic set out clearly and in a logical order, which acts as

reminder for the reader. Further, each separate topic now has a specific individual reference, and the topics are grouped in a more systematic and logical way within each section, to improve readability. The book is primarily aimed at practitioners of arbitration both in the UK and abroad, including solicitors, barristers, arbitrators and judges who are involved in the practice of arbitration (whether domestic or international). It is also aimed at UK and international students of international arbitration, especially in relation to the sections with comparative legal analysis and comprehensive discussions on the interaction between the Arbitration Act 1996 and institutional arbitration rules. Erratum: The authors regret that the new version of the LCIA Rules will not now be published (or be applicable) until early 2020, due to unexpected circumstances. It is understood that those Articles referred to in the text as the 2019 Rules will remain unchanged, albeit that the Rules when in force should be and will be cited as the 2020 LCIA Rules. The authors accept responsibility for and apologise for this error.

The Criminal Finances Act 2017 introduced the most radical change to tackling money laundering and corruption, recovering the proceeds of crime and counter terrorist financing, since the Proceeds of Crime Act was passed in 2002. This book will provide an excellent commentary on the changes introduced by the Act, with practical insights and an explanation of the Act's provisions. Topics included are: money laundering; unexplained wealth orders; terrorist property; tax evasion; and reasonable prevention procedures. Authored by Jonathan Fisher QC and Anita Clifford, barristers specializing in proceeds of crime and financial crime

cases, this book will be of great interest and importance to all legal professionals working in the financial sector.

Artificial Intelligence and the Law John Wiley & Sons

This book is an essential resource for any legal practitioner involved in any aspect of English arbitration law. It provides a thorough annotation of the Arbitration Act 1996, and contains comprehensive explanations of developments in the relevant case law to each section of the Act. Since the fourth edition of this book, the English courts have decided many important new cases on virtually every aspect of arbitration law. The most important developments relate to: The growth of anti-arbitration injunctions; The use of freezing injunctions against third party assets and the availability of anti-suit injunctions in EU proceedings; The definition of seat, the appointment of arbitrators, choice of applicable law, jurisdiction, the form of the award and the slip rule; Enforcement of foreign awards, and challenges to domestic awards by way of jurisdictional attacks, serious irregularity or error of law. In this 5th edition, the notes to each section contain helpful sub-headings and a new Appendix will contain a fully annotated version of CPR Part 62 and the Practice Direction. The book will also be useful for academics and university students of law at all levels seeking an understanding

of the 1996 Act, including those on the Legal Practice Course.
